

CONTENTS

	Page
1. Introduction	1
2. Ethanolamines for Hydrogen Sulfide and Carbon Dioxide Removal	18
3. Mechanical Design and Operation of Ethanolamine Plants	63
4. Hydrogen Sulfide and Carbon Dioxide Removal with Ammonia Solutions	87
5. Alkaline Salt Solutions for Hydrogen Sulfide and Carbon Dioxide Absorption	115
6. Water as an Absorbent for Gas Impurities	153
7. Sulfur Dioxide Removal by Absorption in Liquids	197
8. Dry Oxidation Processes for Removal of Sulfur Compounds	240
9. Liquid Processes for Removal of Hydrogen Sulfide by Oxidation	281
10. Removal of Basic Nitrogen Compounds from Gas Streams	312
11. Absorption of Water Vapor by Dehydrating Solutions	343
12. Gas Dehydration and Purification by Adsorption	381
13. Catalytic Conversion of Gas Impurities	438
14. Miscellaneous Gas-purification Techniques	485
Author Index	535
Subject Index	541
