

CONTENTS

	Page
Foreword	ix
Symposium Committees	xi
Acknowledgements	xiii
List of Participants	xv
The Prospects of Hydrogen as an Energy Carrier for the Future	1
Survey of the Different Types of Hydrides	19
Structure and Bonding in Metal Hydrides	33
Thermodynamics of Metal, Alloy and Intermetallic / Hydrogen Systems	43
Structural Studies of Hydrides by Neutron Diffraction	61
Localization and Diffusion of Hydrogen in Lanthanum Nickel Compounds	73
Nuclear Magnetic Resonance Studies of Metal Hydrides	83
NMR Studies of Hydrogen Relaxation and Diffusion in TiFeH_x and $\text{TiFe}_{1-y}\text{Mn}_y\text{H}_x$	97
Electronic Structure and Physical Properties of Ti-H and Zr-H Using NMR	119
The Nature of ^3He Confinement in Transition Metal Hydrides	123
Kinetics of Hydrogen Absorption and Desorption	135
The Storage and Release of Hydrogen from Magnesium Alloy Hydrides for Vehicular Applications	151
High Temperature Thermodynamics of the Solid Solutions of Hydrogen and Deuterium in Palladium and in the $\text{Pd}_{0.9}\text{Ag}_{0.1}$ Alloy	185
Calculated Heats of Formation of Metal and Metal Alloy Hydrides	193
Acoustic Emissions During Hydride Formation	205
Magnetic and Electrical Properties of Rare Earth and Rare Earth Intermetallic Hydrides	217
Hydrogen Absorption into Rare Earth Intermetallic Compounds	235
Some Applications of LaNi_5 -Type Hydrides	251
Metal Hydride Electrodes for Electrochemical Energy Storage	261
Change in Magnetic Properties of Rare Earth Transition Metal Compounds upon H_2 -Absorption	273
Hydrides of Rare-Earth-Nickel Compounds : Structure and Formation Enthalpies	287
The Plateau Pressure of RE Ni_5 and RE Co_5 Hydrides	293
Synthesis and Properties of useful Metal Hydrides A Review of Recent work at Brookhaven National Laboratory	301
The Use of FeTi-Hydrides for Production and Storage of suprapure Hydrogen	323
Hydride Formation of C-14-Type Ti Alloy	329
Hydrogen Sorption Properties in binary and Pseudobinary Intermetallic Compounds	337
The Metallurgy and Production of Rechargeable Hydrides	353
A New Rationale for the Hysteresis Effects observed in Metal-Hydrogen Systems	395
Irreversible change in Magnetic and Low Temperature Calorimetric Properties of TiFe by Hydrogenation	407
Heat Transfer Characteristics of Porous Metallic Matrix Metal-Hydrides	417
The Effect of Induced Disorder on the Hydrogenation Behaviour of the Phase ZrCo	431
Comparison of Hydrogen Absorption in Glassy and Crystalline Structures	44
Electrochemical Utilization of Metal Hydrides	463
Hydrogen Storage Electrode Systems	479
Hydrogen Electrochemical Storage by Substituted LaNi_5 Compounds	485
Research on zirconium Hydriding and Palladium Alloy-Hydrogen Systems at Risø National Laboratory	491
Rare Earth and Actinide Intermetallics as Hydrogenation Catalysts	501
Mixing Effects of Two Different types of Hydrides	515
Applications of Metal Hydrides	527
HYCSOS : A system for Evaluation of Hydrides as Chemical Heat Pumps	551
The Hydrogen / Hydride Energy Concept	569
