

# CONTENTS AND SUBJECT INDEX

<b>INTRODUCTION</b> .....	1
<b>HYDROGEN PRODUCTION FOR THE HYDROGEN ECONOMY</b> .....	3
Hydrogen Production from Fossil Fuels .....	3
Hydrogen from Water by Electrolysis .....	7
Closed-Cycle Thermochemical Decomposition of Water .....	9
Mixed Thermal/Electrolytic (Hybrid) .....	11
Hydrogen from Thermonuclear Fusion .....	11
Comparison of Hydrogen Production Processes .....	11
References .....	12
<b>HYDROGEN PRODUCTION FROM FOSSIL FUELS</b> .....	15
Production of Hydrogen by Coal Gasification .....	15
Gasification Reactions for Production of Hydrogen .....	22
<b>Gas Producers</b> .....	23
Lurgi Gasifiers .....	25
<b>Koppers-Totzek</b> Gasification Process .....	27
Winkler Gasification Process .....	30
Others Coal Gasification Processes .....	31
Comparison of Various Processes of Coal Gasification .....	34
Conclusions .....	36
Commercial Technology for Hydrogen Production .....	40
Catalytic Steam Reforming of Natural Gas .....	40
Partial Oxidation of Hydrocarbons .....	44
250 x 10 <sup>9</sup> Btu of Hydrogen per Day from Montana Subbituminous Coal ...	45
By the Koppers-Totzek Process .....	46
By the U-GAS Process .....	50
By the Steam-Iron Process .....	56
Use of High Temperature Nuclear Heat from an HTGR for Hydrogen Production .....	62
Hydrogen from Natural Gas .....	62
Hydrogen from Coal .....	72
By Direct Gasification of Coal with Steam .....	78

By Lurgi Gasification of Oklahoma Coal. . . . .	85
Selection of Fossil-Based Hydrogen Production (Coal Gasification) System . . .	93
Hydrogen Production from Coal Liquefaction Residues . . . . .	100
Texaco Pilot Plant Process. . . . .	103
References. . . . .	109
<b>HYDROGEN PRODUCTION BY ELECTROLYSIS. . . . .</b>	<b>111</b>
An Overview of the Technology . . . . .	111
Principles of Electrolysis. . . . .	112
Energy Requirements for Electrolysis. . . . .	114
Effect of Pressure on the Decomposition Voltage. . . . .	116
Basic Designs of Electrolyzer Cells . . . . .	119
Electrolyzer-System Designs . . . . .	121
Survey of Types of Industrial Electrolyzers. . . . .	123
Comparative Evaluation of Various Electrolyzers . . . . .	135
Ultimate Potential. . . . .	137
Research and Development Requirements—Engineering Problems. . . . .	137
Electrolyzer-Feedwater Quality Standards . . . . .	144
Survey of Industrial Electrolyzers . . . . .	144
Electrolyser Corporation Ltd. . . . .	146
Teledyne Isotopes. . . . .	146
Lurgi Apparate-Technik GmbH. . . . .	147
Bamag Verfahrenstechnik GmbH . . . . .	147
Norsk Hydro Verksteder A/S . . . . .	147
Life Systems, Inc. . . . .	147
General Electric. . . . .	148
Comparison of Electrolysis Cells. . . . .	149
Operation and Design of Large-Scale Plants. . . . .	150
General Construction of an Electrolytic Cell. . . . .	150
Conventional and Modified Water Electrolysis Systems for Large-Scale Production . . . . .	152
Dedicated Thermal Electric Plants. . . . .	162
Component Characteristics. . . . .	163
Resource Impact. . . . .	171
Use of Heat from High-Temperature Nuclear Sources. . . . .	171
Comparative Data on Electrolyzers . . . . .	173
Environmental Constraints . . . . .	177
Water Electrolysis Plants. . . . .	177
Electrolyzer Selection. . . . .	178
Nuclear Electrolytic Hydrogen Production Facility. . . . .	178
Methods for Approaching Ideal Efficiencies for Hydrogen Production . . . .	182
Comparison of Cell Potential-Current Density Relations in Acid and Alkaline Water Electrolysis Cells. . . . .	184
Effect of Temperature on the Performance of Acid and Alkaline Water Electrolysis Cells. . . . .	185
Effect of Temperature on Hydrogen and Oxygen Overpotential at Nickel Electrodes in Concentrated Potassium Hydroxide Electrolyte. . . . .	188
Evaluation of Separator Materials to Replace Asbestos in Alkaline Solution . . . . .	190
Conclusions. . . . .	191
Solid Electrolyte and Elevated Temperature Water Electrolysis . . . . .	191
General Electric Solid Polymer Electrolyte Cells. . . . .	192
Solid Oxide Electrolyte Cells. . . . .	195

Alkaline Water Electrolysis Cells Operating at Temperatures Between 120° and 150°C . . . . .	196
Current Status of Advanced Water Electrolysis Cells. . . . .	199
Photoelectrochemical Effects . . . . .	203
References. . . . .	203
<b>HYDROGEN PRODUCTION BY THERMOCHEMICAL PROCESSES . . . . .</b>	<b>208</b>
Water Electrolysis vs Thermochemical Production . . . . .	208
Electrolytic Production—Off-Peak Power . . . . .	209
Electrolytic Production—Dedicated Nuclear Plant. . . . .	209
Thermochemical Production of Hydrogen. . . . .	210
Hydrogen Production Cost Computations. . . . .	210
Sensitivity Analysis. . . . .	214
Off-Peak Power Costs . . . . .	218
Break-Even Efficiency Ratio . . . . .	218
Sensitivity of Capital Costs to Efficiency Variations . . . . .	219
Conclusions. . . . .	220
Survey of Thermochemical Methods . . . . .	221
Basic Thermodynamic Considerations. . . . .	222
Efficiency Calculations for Thermochemical Cycles . . . . .	226
Evaluating Cycles . . . . .	232
Heat Source Specifications and Availability . . . . .	234
Status of the Technology . . . . .	236
Halide Processes . . . . .	236
Reverse Deacon Processes . . . . .	239
Metal Processes . . . . .	240
Ultimate Potential. . . . .	242
Selecting A Water Decomposition Process Using Heat From High Temperature Nuclear Sources . . . . .	243
Study of the ISPRA Mark-10 Process . . . . .	254
Assumptions and Calculation Bases. . . . .	258
Subsystem Functional Descriptions. . . . .	259
Side Reactions with Potential Process Significance . . . . .	271
Materials Availability. . . . .	277
Environmental Constraints and Plant Effluents. . . . .	278
Discussion of Results . . . . .	280
Assessment of Economics of Hydrogen Production from Lawrence Livermore Laboratories <b>ZnSe</b> Cycle . . . . .	282
Process Description. . . . .	282
Key Equipment Requirements . . . . .	286
Reference Plant. . . . .	288
Design of an Integrated Nuclear Hydrogen Production Plant Using the Sulfur Cycle . . . . .	290
The Westinghouse Sulfur Cycle Water Decomposition Process . . . . .	290
Energy Sources for the Westinghouse Sulfur Cycle Water <b>Decompo-     sition System</b> . . . . .	293
References . . . . .	299
<b>INVESTIGATIONS OF UNUSUAL METHODS OF HYDROGEN PRODUCTION . . . . .</b>	<b>303</b>
Biophotolysis of Water . . . . .	303
Survey of Photosynthetic Processes. . . . .	312
Solar Energy Conversion of Water to Hydrogen Using a Ruthenium Complex . . . . .	315

Radiolysis of Water by Dissolved Fission Products . . . . .	316
A Survey of Other Processes. . . . .	318
Hydrogen Production from Waste Materials . . . . .	318
Hydrogen Production by Radiation. . . . .	318
Direct Thermal Decomposition of Water to Produce Hydrogen. . . . .	321
Steam-Iron System for the HYGAS Process . . . . .	325
References. . . . .	333
<b>ECONOMICS OF HYDROGEN PRODUCTION. . . . .</b>	<b>336</b>
Development of Cost Estimates. . . . .	336
Hydrogen Production Costs. . . . .	338
Hydrogen from Coal . . . . .	338
Hydrogen from Electrolysis of Water . . . . .	340
Hydrogen from Thermochemical Processes. . . . .	342
Costs of Other Fuels Compared to Hydrogen Systems . . . . .	343
References. . . . .	347
<b>HYDROGEN SAFETY . . . . .</b>	<b>349</b>
Complexity of the Safety Question. . . . .	349
Properties of Hydrogen. . . . .	349
Hydrogen Behavior . . . . .	351
Experience in the Space Program and the Hindenburg . . . . .	354
Special Hazards. . . . .	354
Summary of Physical and Chemical Aspects of Safety . . . . .	355
Perceptions of Safety Hazards—A Key to Policy . . . . .	355
Voluntary vs Involuntary Exposure to Hazards. . . . .	357
