

CONTENTS

	Page
Preface	vii
1. Discovery and Early Work	1
2. Production and Use Patterns	10
3. Physical and Chemical Properties of Chlorine	21
4. Safe Handling of Chlorine	46
5. Electrolysis of Brines in Diaphragm Cells	81
6. Electrolysis of Brines in Mercury Cells	127
7. Electrolysis of Hydrochloric Acid Solutions	200
8. The Salt Process for Chlorine Manufacture	235
9. HCL Oxidation Processes	250
10. Pulp Bleaching and Purification	273
11. Ethylene and Propylene Oxides and Glycols	310
12. Chlorinated Methanes	334
13. Trichloroethylene and Perchloroethylene	375
14. Chlorinated Benzenes – Their Ammonolysis and Hydrolysis	429
15. Water Chlorination	457
16. Waste-Water Chlorination	485
17. Chlorinated Bleaches and Sanitizing Agents	512
18. Ethyl Chloride and Ethylene Dischloride	543
19. Magnesium Chloride	574
20. DDT	584
21. Preparation and Properties of Benzene Hexachloride	611
22. Miscellaneous Chlorinated Organic Pesticides	658
23. Allyl Chloride and Derivatives	696
24. Vinylidene Chloride	729
25. Zirconium Tetrachloride and Titanium Tetrachloride	761
26. Vinyl Chloride	781
27. Metal Chlorides	805
28. Chlorination of Alkylbenzenes	834
29. Simple Organic Compounds Containing Fluorine	864
Index	889
