CHAPTER 1	
History of the Acetylene Industry	
1. The Pre-Industrial Period 1836 – 1892	1
2. Acetylene as an Illuminant 1892 –1910	4
3. Metal Working and First Chemical Uses 1910 – 1930	13
4. Expansion and Diversification 1930 – 1944	23
5. Expansion without Diversification 1945 to Date	49
CHAPTER 2	
The Physical Properties of Acetylene	
1. Thermodynamic Properties of Acetylene Gas	55
2. Thermodynamic Properties of the Condensed Phases	65
3. Transport Properties	70
4. Solubility	74
5. Phase Equilibria	103
6. Adsorption	117
7. Spectroscopy	127
8. Other Physical Properties	157
CHAPTER 3	
Calcium Carbide	
1. Physical Properties	165
2. Manufacture	175
3. Specification and Analysis	218
4. Chemical Properties and Uses	234
5. The Calcium Carbide Industry	257
CHAPTER 4	
Acetylene from Calcium Carbide	
1. The Reaction Between Calcium Carbide and Water	283
2. Generation of Acetylene	293
3. Purification	330
4. Analysis	345
5. Acetylene Makers	363
CHAPTER 5	
Acetylene from Hydrocarbons	
1. Mechanism	371
2. Regenerative Pyrolysis	383
3. Electrical Processes	391
4. Partial Combustion	415
5. Other Ways of Cracking	448
6. Recovery of Acetylene	451
7. Industrial	472
CHAPTER 6	
Decomposition and Handling	
1. Thermal Self-Condensation	476
2. Explosive Decomposition	484
3. Handling	506
4. Dissolved Acetylene ('DA')	516
5. Regulations	535

CHAPTER 7
Combustion

1.	Ignition	543
2.	Acetylene Flames	551
3.	Flash and Shock	591
4.	Detonation	595

CHAPTER 8
Fuel Uses

1.	Welding	611
2.	Cutting	645
3.	Other Uses for Oxyacetylene	684
4.	Air – Acetylene	729

	Addenda	738
	Index of Names	739
