

## CONTENTS

1. Historical Background, Properties and Applications ..... 1  
*A. G. Hill and R. G. Rice*

*การสร้างโอโซน*  
**Section 1: Generation**

2. Ozone Generation by Corona Discharge ..... 41  
*J. J. Carlins and R. G. Clark*
3. Ozone Generation with Ultraviolet Radiation ..... 77  
*B. DuRon*
4. Status of Research on Ozone Generation by Electrolysis ..... 85  
*P. C. Foller*

*การถ่ายโอนโอโซน*  
**Section 2: Contacting**

5. Mass Transfer of Ozone into Aqueous Systems ..... 105  
*C.-H. Kuo and F. H. Yocum*
6. Contacting of Ozone with Water and Contactor Offgas  
 Treatment ..... 143  
*W. J. Masschelein*

*วัสดุ*  
**Section 3: Materials of Construction**

7. Recent Experimental Studies Dealing with Corrosion and  
 Degradation of Materials in Ozone-Containing  
 Environments ..... 227  
*R. Zawierucha and H. Charleson*

**Section 4: Analytical Aspects**

8. Analysis of Ozone in Aqueous Solutions ..... 255  
*J. Stanley and J. D. Johnson*
9. Interferences Between Ozone and Chlorine ..... 277  
*Y. Richard and L. Brener*

10. Analytical Instrumentation for Control of Ozonation Systems .....	285
<i>M. Paré</i>	

### **Section 5: Engineering Aspects**

11. Design Engineering Aspects of Ozonation Systems .....	307
<i>C. M. Robson</i>	

### **Section 6: Mechanisms of Organic Oxidations**

12. Mechanisms, Rates and Selectivities of Oxidations of Organic Compounds Initiated by Ozonation of Water .....	341
<i>J. Hoigné</i>	

Index .....	381
