

## CONTENTS

	Page
1. Chromatography and the Analysis of Lipids	1
1.1 Introduction	1
1.2 Gas Chromatography	4
1.3 High-Performance Liquid Chromatography	6
1.4 Thin-Layer Chromatography	11
1.5 Ion-Exchange Chromatography	16
1.6 Radiochromatography	17
1.7 Miscellaneous Examples	18
1.8 References	20
2. Some Applications of Wide-Line Nuclear Magnetic Resonance in the Oils and Fats Industry	25
2.1 Introduction	25
2.2 What is Nuclear Magnetic Resonance?	27
2.3 Applications of Wide-Line Nuclear Magnetic Resonance in the Oils and Fats Industry	34
2.4 Determination of Solid Fat Content in Fats	35
2.5 Conclusions	44
2.6 References	45
3. Natural Oxygenated Acids	47
3.1 Introduction	47
3.2 Hydroxy Acids	48
3.3 Oxo Acids	51
3.4 Epoxy Acids	53
3.5 Furanoid Acids	54
3.6 Chain-Fragmented Ether Acids	55
3.7 Other Oxygenated Acids	55
3.8 References	57
4. Prospects and Retrospects of Glyceride-Synthesis	59
4.1 Introduction	59
4.2 Nomenclature	60
4.3 Synthetic Methods	64
4.4 Prospects	96
4.5 Appendix	96
4.6 References	104
5. Prostaglandins – Potentially Useful Clinical Drugs for the 1980s	109
5.1 Historical	109
5.2 Structures and Nomenclature of Prostaglandins	109
5.3 Occurrence	112
5.4 Biosynthesis	112
5.5 Biological Activity	114
5.6 Interconversion and Metabolism of Prostaglandins	117
5.7 Chemical synthesis of Prostaglandins	118
5.8 Future Developments	120
5.9 bibliography	121
6. Extraction of Vegetable Oils and Fats	123
6.1 Introduction	123
6.2 Pre-treatment and Screw Pressing	123
6.3 Solvent Extraction	127

6.4	Oil Processing	130
6.5	Conclusion and the Future	133
6.6	Bibliography	134
7.	Processing of Oils and Fats	135
7.1	Introduction	135
7.2	Stages in Refining	135
7.3	Modifications	158
7.4	Automation	164
7.5	Bibliography	165
8.	Use of Fats in Confectionery	167
8.1	Introduction	167
8.2	Use of Fats in Sugar Confectionery	167
8.3	Use of Fats in Chocolate-Like Substances	168
8.4	Use of Fats in Chocolate	170
8.5	Use of Vegetable Fats in Chocolate	172
8.6	Analytical Procedures	176
8.7	Identification and Quantification of Added Vegetable Fats	178
8.8	Bibliography	180
9.	Naturally Modified Ruminant Foods	181
9.1	Introduction	181
9.2	Ruminant Fats	182
9.3	Protected Lipids	182
9.4	Manufacture of Protected Lipids	183
9.5	Applications of Protected Lipids	184
9.6	Polyunsaturated Foods and Health	185
9.7	Production of Polyunsaturated Lamb and Beef	187
9.8	Production of Polyunsaturated Milk and Dairy Products	188
9.9	Production of Polyunsaturated Cheese	190
9.10	Conclusions	190
9.11	References	191
10.	Problems of Fats in the Food Industry	193
10.1	Introduction	193
10.2	Identification of Oils and Fats	193
10.3	Identification of the Components of Blends: Adulteration	194
10.4	Problems Arising from Rancidity	196
10.5	Problems Connected with the Baking Industry	205
10.6	Analytical Techniques	210
10.7	Acknowledgements	213
10.8	References	213
11.	Growth in Importance of Palm Oil in the 1970s	215
11.1	Introduction	215
11.2	Cultivation in Pan Malaysia	220
11.3	Palm Oil Processing	222
11.4	The Properties of Palm Oil	224
11.5	Refining Process Research	230
11.6	Further Processing In South-East Asia	235
11.7	Fractionation of Palm Oil	236
11.8	Main Uses of Palm Oil	238
11.9	Palm Oil and Health	242
11.10	Palm Oil Specifications	243
11.11	References	247
	Index	249
