

CONTENTS

	Page
SECTION I. – THE CHEMICAL NATURE OF FATS	
I Introductory : the natural processes concerned in the production of fats	1
II The properties and structure of the fatty acids in natural fats and waxes	6
III The more notable alcoholic constituents of natural fats and waxes	27
IV Methods of analysis and identification employed for fats and waxes	37
V The resolution of fats and waxes into their component alcohols and acids	82
Sectional Bibliography	95
SECTION II. – THE COMPOSITION OF FATS OCCURRING IN NATURE	
I General distribution and output in nature of the fats and waxes	99
II Some of the more commonly occurring and technically useful fats and waxes	107
III The chemical composition of the more important classes of fats	157
IV Attempts to prepare synthetic fatty acids and fats	177
Sectional Bibliography	184
SECTION III. – THE TRANSFORMATION OF FATS FOR INDUSTRIAL USE	
Introduction	189
I The extraction of fats	191
II The refining of fats	216
III Fat-hydrogenation	241
IV Fat-splitting or hydrolysis	266
Sectional Bibliography	280
SECTION IV. – THE EDIBLE FAT INDUSTRY	
Introduction	283
I Butter	285
II Margarine (butter substitutes)	294
III The vegetable or nut butters	307
IV Confectionery fats	310
V Lard and lard substitutes	313
VI The nutritional values of the various types of edible fats	318
VII The problem of rancidity in edible fats	324
Sectional Bibliography	334
SECTION V. – THE SOAP INDUSTRY	
Introduction	336
I The manufacture of genuine soap in the pan, coolers and driers	339
II The physical chemistry of soaps	348
III The production of toilet and shaving soaps	368
IV The production of household soaps	378
V The production of dry soap and soap powders	386
VI Soft soaps and textile soaps	391
VII “Sulphonated oils” (“Turkey red oil”) alkyl sulphates or sulphonates, and other fatty Derivatives now employed as “soapless detergents”	396
Sectional Bibliography	407

SECTION VI. – THE USE OF FATS IN CANDLES AND ILLUMINANTS		
Introduction		409
I	The manufacture of candles from fatty material	411
II	Fatty oils as illuminants	419
	Sectional Bibliography	421
SECTION VII. – THE PRODUCTION OF GLYCERINE FROM FATS		
Introduction		422
I	Crude glycerine	424
II	Dynamite glycerine	436
III	Pure glycerine	445
IV	The manufacture of glycerine from non-fatty materials	450
	Sectional Bibliography	456
SECTION VII. – THE USE OF FATS AND WAXES IN PAINTS, VARNISHES, AND OTHER SURFACE COVERINGS		
Introduction		457
I	The “drying” of fatty oils	460
II	The technical processes employed in preparing fatty oils for use in paints and varnishes	475
III	Fatty oils and waxes employed in paints, enamels, varnishes, and polishes	485
	Sectional Bibliography	495
SECTION IX. – THE APPLICATION OF FATS TO FIBRES		
Introduction		497
I	The production of linoleum ; water-proofing and insulating fabrics	499
II	The “wool oils” or “cloth oils”	505
III	The uses of fatty oils in the leather industries	509
	Sectional Bibliography	512
SECTION X – FATTY LIBRICANTS		513
	Sectional Bibliography	519
INDEX		521
