

Contents

64th Conference on Glass Problems

Preface viii

Acknowledgements ix

Refractories

Surface Treatment of AZS Refractories using High Density Infrared Heating 3

T.N.Tiegs, F.C. Montgomery, D.C. Harper, C.A. Blue, M.Velez, M. Karakus, and R.E. Moore

Investigation of Defects in High Quality Glasses 13

K.R. Selkregg and A. Gupta

Review of Improved Silica Crown Refractory and Practices for Oxy-Fuel Fired Glass Melters 33

Alonso Gonzalez, John T. Brown, Rober P.Weilacher, Michael A. Nelson

Engineered FKS Platinum Solutions for High-Temperature Applications in Modern Glass Production 43

Michael Oechsle, Hubertus Gölitzer, and Rudolf Singer

Geopolymer Refractories for the Glass Manufacturing Industries 57

Waltraud M. Kriven, Jonathan Bell, and Matthew Gordon

Anomalous Thermomechanical Properties of Network Glass 81

John Kieffer, and Liping Huang

Energy and Combustion

Advanced Investigation Methods for the Characterization of Flames aimed at an Optimization of the Heat Transfer Processes in Glass Melting Furnaces 97

Axel Scherello

Alglass SUN: An Ultra Low NO_x Oxy Burner for Glass Furnaces with Adjustable Flame Length and Heat Transfer Profile	117
Bertrand Leroux, Nicolas Perrin, Pascal DuPerray, Patric Recourt, Rémi Tsiava, and George Todd	
Glass Furnace Life Extension using Convective Glass Melting	129
Neil Simpson, Dick Marshall, and Tom Barrow	
Fire Polishing with Premixing Technology	141
Hans Mahrenholtz	
A Novel Furnace Concept Combining the Best of Oxy- and Air-Fuel Melting	153
Mark D'Agostoni, Russell J. Hewertson, Bryan C. Hoke, Jr., Julian L. Inskip, Michael E. Habel, Richard Huang, Kevin A. Lievre, and Aleksandar G. Slavejko	
How Mathematical Modeling Can Help to Reduce Energy Usage for Glass Melting	167
Erik Muijsenberg and Eric Trochta	
Attenuation and Breakage in the Continuous Glass Fiber Drawing Process	179
Simon Rekhson, Jim Leonard, and Phillip Sanger	
Energy Conservation Opportunities in the Glass Industry . . .	191
John D'Andrea	

Process Control

Application of Fast Dynamic Process Simulation to Support Glass Furnace Operation	197
Olaf Op den Camp, Oscar Verheijen, and Sven-Roger Kahl	
Application of Batch Blanket Monitoring System in Glass Furnaces	209
Jolanda Schagen, Ruud Beerkens, Annejans Faber, Peter Hemmann, and Gunnar Hemmann	

**Thermal Imaging of All Furnace Internal Surfaces
for Monitoring and Control219**

Serguei Zelepouga, David Rue, Ishwar Puri, Ping-Rey Jang, John Plodenic,
and John Connors

Improvement in Glass Blister Quality by Throat Design231

R.R.Thomas

Emerging Areas

**Overview of the Activities of the Technical Committees of
the International Commission on Glass241**

Henk de Waal

Recent Developments in Chemically Strengthened Glasses . . .253

David J. Green

**Glass Art and Glass Science: A Mutually
Beneficial Exchange267**

Margaret Rasmussen, Michael Greenman, and John Brown

Self-Repair of Glass and Polymers281

Carolyn Dry

**Thermal Imaging of All Furnace Internal Surfaces
for Monitoring and Control219**

Serguei Zelepouga, David Rue, Ishwar Puri, Ping-Rey Jang, John Plodenic,
and John Connors

Improvement in Glass Blister Quality by Throat Design231

R.R.Thomas

Emerging Areas

**Overview of the Activities of the Technical Committees of
the International Commission on Glass241**

Henk de Waal

Recent Developments in Chemically Strengthened Glasses . . .253

David J. Green

**Glass Art and Glass Science: A Mutually
Beneficial Exchange267**

Margaret Rasmussen, Michael Greenman, and John Brown

Self-Repair of Glass and Polymers281

Carolyn Dry
