

Contents

Preface	xi
General	
Creating a Vision for the Future of Advanced Ceramics	3
F. Kuchinski and K. Hall	
Fibers, Interphases and Interfaces	
Measurement of Fiber Coating Thickness Variation	11
R.S. Hays, G. Fair, P. Mogilevsky, and E. Boakye	
Model of Deviation of Cracks at Interfaces or Within Interphases	19
J. Lamon and S. Pompidou	
Preparation and Characterization of Magnesium-Silicon Based Oxide Coating on High-Crystalline SiC Fiber as an Interphase in SiC/SiC Composite	27
N. Igawa, T. Taguchi, R. Yamada, Y. Ishii, and S. Jitsukawa	
Polyborosilazane-Derived Ceramic Fibers in the Si-B-C-N Quaternary System for High-Temperature Applications	35
S. Bernard, D. Cornu, P. Miele, M. Weinmann, and F. Aldinger	
Microtextural and Microstructural Evolution in Poly[(Alkylamino)Borazine]-Derived Fibers During their Conversion into Boron Nitride Fibers	43
S. Bernard, F. Chassagneux, D. Cornu, and P. Miele	
Investigations on Growth of Textured and Single Crystal Oxide Fibers Using a Quadrupole Lamp Furnace	51
W. Yoon and W.M. Kriven	
Thermo-Mechanical Properties of Super Sylramic SiC Fibers	59
H. Yun, D. Wheeler, Y. Chen, and J. DiCarlo	
High Temperature Tensile Testing Method for Monofilament Ceramic Fibers	67
B.-M. Yee, P. Sarin, and W.M. Kriven	

Fracture and Damage of Ceramics and Composites

Computer Modeling of Crack Propagation Using Fractal Geometry **77**
G.W. Quinn, J.B. Quinn, J.J. Mecholsky, Jr., and G.D. Quinn

Geometry of Edge Chips Formed at Different Angles **85**
J. Quinn and R. Mohan

Threshold Stress During Crack-Healing Treatment of Structural Ceramics
Having the Crack-Healing Ability **93**
W. Nakao, K. Takahashi, and K. Ando

Ablation of **Carbon/Carbon** Composites: Direct Numerical Simulation and
Effective Behavior **99**
Y. Aspa, M. Quintard, F. Plazanet, C. Descamps, and G.L. Vignoles

Modeling of Deformation and Damage Evolution of CMC With Strongly
Anisotropic Properties **107**
D. Koch, K. Tushtev, M. Kuntz, R. Knoche, J. Horvath, and G. Grathwohl

Materials Characterization, NDE and Novel Techniques

A Novel Test Method for Measuring Mechanical Properties at the
Small-Scale: The Theta Specimen **117**
G.D. Quinn, E. Fuller, D. Xiang, A. Jilavenkatesa, L. Ma, D. Smith, and J. Beall

Nondestructive Evaluation of Machining and Bench-Test Damage in
Silicon-Nitride Ceramic Valves **127**
J.G. Sun, J.M. Zhang, J.S. Tretheway, J.A. Grassi, M.P. Fletcher, and M.J. Andrews

NDE for Characterizing Oxidation Damage in Reinforced Carbon-Carbon
Used on the NASA Space Shuttle Thermal Protection System **133**
D.J. Roth, N.S. Jacobson, J.N. Gray, L.M. Cosgriff, J.R. Bodis, R.A. Wincheski,
R.W. Rauser, E.A. Burns, and M.S. McQuater

Determination of Elastic Moduli and Poisson Coefficient of Thin Silicon-Based
Joint Using Digital Image Correlation **143**
M. Puyo-Pain, J. Lamon, and F. Hild

Use of Rupture Strength Testing in Examining the Thermal Cycle Behavior of
Various Types of Planar Solid Oxide Fuel Cell Seals **149**
K.S. Weil, J.S. Hardy, G-G. Xia, and C.A. Coyle

Characteristics of Sealed Parts Under Internal Pressure in Super High
Pressure Mercury Discharge Lamps **157**
M. Kase, T. Sawa, and Y. Iwama

Processing and Properties of Ceramics

Synthesis of Titanium Aluminate -Alumina Compositions for Low TEC Applications	167
J.A. Geodakyan, A.K. Kostanyan, K.J. Geodakyan, and W.R. Cannon	
Structuring Ceramics Using Lithography	177
M. Schulz, J. Haußelt, and R. Heldele	
The Notion of Densification Front in CVI Processing with Temperature Gradients	187
G.L. Vignoles, N. Nadeau, C.-M. Brauner, J.-F. Lines, and J.R. Puiggali	
Fabrication and Characterization of MGC Components for Ultra High Efficiency Gas Turbine	197
Y. Waku, N. Nakagawa, K. Kobayashi, Y. Kinoshita, and S. Yokoi	
Comparison of Sodium Caprylate and Sodium Stearate and the Effects of Their Hydrocarbon Chain Lengths on Adsorption Behavior and Alumina Paste Rheology	205
C.R. August, R.A. Haber, and L.E. Reynolds	
Formulation of Additives for Water-Based Tape Casting of Ceramics	213
M. Guiotoku, P. Lemes, C.M. Gomes, C.A. Valente, A.P.N. Oliveira, and D. Hotza	
A Non-Linear Programming Approach for Formulation of Three-Component Ceramics as a Function of Physical and Mechanical Properties	219
S.L. Correia, C.M. Gomes, D. Hotza, and A.M. Segadães	
Microstructural and Mechanical Properties of Directionally Solidified Ceramic in Al_2O_3 - Al_2TiO_5 System	225
A. Sayir, M.H. Berger, and C. Baudin	
Study of the Relationship Between the Young's Modulus and Microstructure of Vacuum Plasma Sprayed Boron Carbide	235
H.R. Salirni Jazi, F. Azarni, T.W. Coyle, and J. Mostaghimi	
Scalloped Morphologies of Ablated Materials	245
G.L. Vignoles, J.-M. Goyh��n��che, G. Duffa, A. Velghe, N.T.-H. Nguyen-Bui, B. Dubroca, and Y. Aspa	
Mechanical and Thermal Properties of Non-Aqueous Gel-Cast Celsian and Sialon Ceramic Materials	253
R. Vaicryanathan, T. Phillips, J. Halloran, L. Reister, W. Porter, M. Radovic, and E. Lara-Curzio	

Bend Stress Relaxation Creep of CVD Silicon Carbide	265
Y. Katoh and L.L. Snead	
Hardness and Wear Resistance of Ceramics	
Mechanical Responses of Silicon Nitrides Under Dynamic Indentation . . .	275
H. Wang and A.A. Wereszczak	
Scratch Resistance and Residual Stresses in Longitudinally and Transversely Ground Silicon Nitride	285
G. Subhash, M.A. Marszalek, A.A. Wereszczak, and M.J. Lance	
Improving the Damage-Resistance of Si₃N₄-Based Ball and Roller Bearing Components and Their Non-Destructive Evaluation	293
R. Wagner and G. Wötting	
Properties of Fiber-Reinforced Composites	
Comparison of Elevated Temperature Tensile Properties and Fatigue Behavior of Two Variants of a Woven SiC/SiC Composite	303
S. Kalluri, A.M. Calomino, and D.N. Brewer	
Tensile and Thermal Properties of Chemically Vapor-Infiltrated Silicon Carbide Composites of Various High-Modulus Fiber Reinforcements	311
T. Nozawa, Y. Katoh, L.L. Snead, T. Hinoki, and A. Kohyama	
Preparation and Properties of Dense SiC/SiC Composites	319
M. Suzuki, M. Sato, N. Miyamoto, and A. Kohyama	
Fabrication of SiC/SiC with Dispersed Carbon Nano-Fibers Composite for Excellent Thermal Properties	327
T. Taguchi, N. Igawa, S. Jitsukawa, S.-I. Shamoto, and Y. Ishii	
Transpiration Cooling Structure Effects on the Strength of 3D-Woven SiC/SiC Composites Under Thermal Cycling	335
T. Hayashi	
Constituent Properties Determination and Model Verification for Ceramic Matrix Composite Systems	343
G. Ojard, K. Rugg, L. and M. Colby, L. Riester, and Y. Gowayed	
Short-Fiber Reinforced CMCs : Potentials And Problems	351
R. Weiss and M. Henrich
