

Contents

Preface	vii
Introduction	ix
BINARY AND TERNARY CERAMICS	
Synthesis and Phase Development in the Cr-Al-N System M-L. Antti, Y-B. Cheng, and M. Odén	3
Phase Evolution and Properties of Ti ₂ AlN Based Materials, Obtained by SHS Method L. Chlubny, J. Lis, and M.M. Bučko	13
Synthesis of Ti ₃ SiC ₂ by Reaction of TiC and Si Powders Ida Kero, Marta-Lena Antti, and Magnus Odén	21
Toughening of a ZrC Particle-Reinforced Ti ₃ AlC ₂ Composite G.M. Song, Q.Xu, W.G. Sloof, S.B. Li, and S. van der Zwaag	31
Microstructure and Properties of the Cermets Based on Ti(C,N) S.Q. Zhou, W. Zhao, W.H. Xiong	41
Scratch-Induced Deformation and Residual Stress in a Zirconium Diboride-Silicon Carbide Composite Dipankar Ghosh, Ghatu Subhash, and Nina Orlovskaya	51
Finite Element Modeling of Internal Stress Factors for ZrB ₂ -SiC Ceramics Michael P. Teague, Gregory E. Hilmas, and William G. Fahrenholtz	65

Effects of Microstructural Anisotropy on Fracture Behavior of Heat-Pressed Glass-Ceramics and Glass-Infiltrated Alumina Composites for Dental Restorations	77
Humberto N. Yoshimura, Carla C. Gonzaga, Paulo F. Cesar, and Walter G. Miranda, Jr.	

SILICON CARBIDE, CARBON AND OXIDE BASED COMPOSITES

Mechanical Properties of Hi-NICALON S and SA3 Fiber Reinforced SiC/SiC Minicomposites	91
C. Sauder, A. Brusson, and J. Lamon	
The Effect of Holes on the Residual Strength of SiC/SiC Ceramic Composites	101
G. Ojard, Y. Gowayed, U. Santhosh, J. Ahmad, R. Miller, and R. John	
Through Thickness Modulus (E33) of Ceramic Matrix Composites: Mechanical Test Method Confirmation	109
G. Ojard, T. Barnett, A. Calomino, Y. Gowayed, U. Santhosh, J. Ahmaad, R. Miller, and R. John	
The Effects of Si Content and SiC Polytype on the Microstructure and Properties of RBSC	115
A.L. Marshall, P. Chhillar, P. Karandikar, A. McCormick, and M.K. Aghajanian	
In-Situ Reaction Sintering of Porous Mullite-Bonded Silicon Carbide, Its Mechanical Behavior and High Temperature Applications	127
Neelkanth Bardhan and Parag Bhargava	
Study on Elasto-Plastic Behavior of Different Carbon Types in Carbon/Carbon Composites	141
Soydan Ozcan, Jale Tezcan, Jane Y. Howe, and Peter Filip	
Effects of Temperature and Steam Environment on Creep Behavior of an Oxide-Oxide Ceramic Composite	151
J.C. Braun and M.B. Ruggles-Wrenn	
Characterization of Foreign Object Damage in an Oxide/Oxide Composite at Ambient Temperature	167
Sung R. Choi and Donald J. Alexander	
Processing and Properties of Fiber Reinforced Barium Aluminosilicate Composites for High Temperature Radomes	179
Richard Cass, Geoffrey Eadon, and Paul Wentzel	
Author Index	189
