

Contents

Preface	ix
Introduction	xi
IMPACT, PENETRATION AND MATERIAL MODELING	
Fragmentation of Ceramics in the Ballistic Environment Dennis E. Grady	3
Flow Behavior of Glass at the Tip of a Penetrator D. A. Shockey, D. Bergmannshoff, D. R. Curran, and J. W. Simons	19
Rheology of Powder and Porous Media in Modeling of Penetration into Porous Ceramic B.A. Galanov, V.V. Kartuzov, and S.M. Ivanov	27
Computer Modeling of Shock Wave Propagation in SiC—Sample V.L. Bekenev, V.V. Kartuzov, E.V. Kartuzov, and H.V. Hachatraian	39
Ballistic Impact Damage Observations in a Hot-Pressed Boron Carbide J.C. LaSalvia, R.B. Leavy, J.R. Houskamp, H.T. Miller, D.E. MacKenzie, and J. Campbell	45
Characterization of Microstructural Damage in Silicon Carbide Processed via Modified Chemical Vapor Deposition H.T. Miller, J.C. LaSalvia, R.B. Leavy, and D.E. MacKenzie	57
MATERIAL CONCEPTS, PROCESSES AND CHARACTERIZATION	
Effects of Grain Size, Shape and Second Phases on Properties of Sintered SiC P. G. Karandikar, G. Evans, S. Wong, and M. K. Aghajanian	69

Indenter Elastic Modulus and Hertzian Ring Crack Initiation K. T. Strong, Jr., A. A. Wereszczak, and W. L. Daloz, and O. M. Jadaan	83
High Frequency Ultrasound of Alumina for High Strain-Rate Applications S. Bottiglieri and R. A. Haber	91
The Effect of Particle Size, Particle Loading and Thermal Processing Conditions on the Properties of Alumina Reinforced Aluminum Metal Matrix Composites Allyn L. McCormick, Michael K. Aghajanian, Andrew L. Marshall	105
Pressureless Sintering of B ₄ C-SiC Composites for Armor Applications Rosa Maria da Rocha, Francisco C. L. de Melo	113

APPLICATIONS OF NDE

A Portable Microwave Interference Scanning System for Nondestructive Testing of Multi-Layered Dielectric Materials K. F. Schmidt, Jr., J. R. Little, Jr., W. A. Ellingson, and W. Green	123
Destructive Testing and Nondestructive Evaluation of Alumina Structural Ceramics Raymond E. Brennan, William H. Green, James M. Sands	135
Nondestructive Evaluation of as Fabricated and Damaged Encapsulated Ceramics William H. Green, Raymond Brennan, and Robert H. Carter	147
Microstructural Study of Sintered SiC via High Frequency Ultrasound Spectroscopy A. R. Portune and R. A. Haber	159
Impact Damage Analysis in a Level III Flexible Body Armor Vest Using XCT Diagnostics Joe Wells, Nevin Rupert, and Murray Neal	171

TRANSPARENT ARMOR

Impact onto Glass and Glass Ceramic Bars Stephan Bless, John Tolman, Scott Levinson, and Ian Polyzois	183
Numerical Study of the Effect of Surface Stresses of Transparent Ceramics of Laminated Targets for Military Armor Applications Costas G. Fountzoulas, James M. Sands, Gary Gilde, Parimal J. Patel	195
Analyses of Various Damage Mechanisms in Transparent Armor Subject to Projectile Impact Kevin C. Lai, Xin Sun, and Douglas W. Templeton	205

Pressureless Reaction Sintering of AlON Using Aluminum Orthophosphate as a Transient Liquid Phase Michael Bakas, Henry Chu	213
ALON® Transparent Armor Lee M. Goldman, Robyn Foti, Mark Smith, Uday Kashalikar, and Suri Sastri	225
Author Index	233
