

CONTENTS

Part One / Introduction

1. THE UNQUENESS OF GLASS	1
2. TECHNIQUES FOR THE INDIVIDUAL	7
3. A BRIEF HISTORY OF GLASSFORMING TECHNIQUES	14
4. PHYSICAL PROPERTIES OF GLASS	39

Part Two / Forming Techniques

5. FORMING BY SAGGING AND LAMINATING	39
6. USING GLASS COLORS AND GLASS ENAMELS	50
7. FORMING BY MOLD-FUSING	55
8. FORMING BY MOLD-CASIING	60

Part Three / Forming Equipment

9. FURNACES	81
10. COLORS AND COLORING OF GLASSES	83
11. GRINDING EQUIPMENT	86
12. ACID ETCHING	88

Part Four / Design

13. INTRODUCTION	91
14. LAMINATING AND ENAMELS AS PAINTINGS	94
15. SAGGING FOR ASSEMBLAGES	95
16. CASTIGN SHAPES	96
17. SURFACE EFFECTS	99
18. LIMITAIONS	100
19. UNIQUENESS	101

Part Five / The Story of the Glassformer's Material

20. INTRODUCTION: MANUFACTURE OF GLASS IN THE SMALL FACTORY	102
21. METHODS AND TECHNIQUES	103
22. MANUFACTURE OF SHEET GLASS FOR SAGGING AND LAMINATING	112

Appendices

1. SOME PHYSICAL PROPERTIES OF GLASS	119
2. ANNEALING PROCEDURES AND HEATING CYCLES	138
3. REFERENCES	144
4. LIST OF SUPPLIERS	145
5. BIBLIOGRAPHY	147
6. INDEX	149
