

CONTENTS

PART I PRINCIPLES OF GLASS TECHNOLOGY

Chapter 1	Structures of Minerals and Glasses	3
Chapter 2	The nature of Silicate Glasses	18
Chapter 3	Sample Preparation and Property Measurements	31
Chapter 4	Property-Composition-Structure Relations	40

PART II ELECTROMAGNETIC PROPERTIES

Chapter 5	Dielectric Properties	65
Chapter 6	Refractive Index and Dispersion	87
Chapter 7	Stress-Optical Effects in Glasses	115
Chapter 8	Magnetic Properties	130
Chapter 9	Spectral absorption	138
Chapter 10	Color Formation in Glasses	166
Chapter 11	Electrolytic Conduction	179

PART III MECHANICAL PROPERTIES

Chapter 12	Definitions and Nomenclature	197
Chapter 13	Elastic Behavior	203
Chapter 14	Viscosity	222
Chapter 15	Relaxation Phenomena	237
Chapter 16	Surface Tension	254

PART IV THERMAL PROPERTIES

Chapter 17	Heat Transfer	263
Chapter 18	Thermal Expansion	274

PART V GLASSMAKING PROPERTIES

Chapter 19	Glass Melting	285
Chapter 20	Glass Forming	293
Chapter 21	Annealing and Tempering	300
