

## CONTENTS

PREFACE	v
Acknowledgements	viii
<b>Chapter 1. The Physical and Chemical Nature of Inorganic Glasses</b>	<b>1</b>
A. Introduction	1
B. The Physical Nature of Glass	3
C. The Chemical Nature of Inorganic Glasses	6
<b>Chapter 2. Structural Theories of Glass Formation</b>	<b>11</b>
A. The Crystal Structure of Glass-forming Oxides	11
B. The Relationship Between Glass Formation and Bond Type	19
C. Criteria Relating Glass Formation and Bond Strength	23
<b>Chapter 3. The Kinetic Theory of Glass Formation</b>	<b>31</b>
A. The Rate of Nucleus Formation	31
B. The Rate of Crystal Growth	35
C. Determination of Minimum Activation Energies for Glass Formation	37
D. Relation Between Bond Strength and Activation Energies Controlling Crystallization	39
E. The Significance of Melting Point and the Effect of Structure upon it	41
<b>Chapter 4. Vitreous Silica</b>	<b>45</b>
A. Chemical Composition	45
B. Devitrification of Fused Silica	48
C. The Kinetics of Melting of Quartz and Cristobalite	61
<b>Chapter 5. Silicate Glasses</b>	<b>69</b>
A. Binary Systems	69
B. The Na <sub>2</sub> O – CaO – SiO <sub>2</sub> System	84
C. Some Special Silicate Glasses	89
<b>Chapter 6. Boric Oxide and Borate Glasses</b>	<b>95</b>
A. The Preparation and Properties of Boric Oxide Glass	95
B. Glass Formation in Binary Borate Systems	97
C. Ternary Systems	106
D. The Structure of Vitreous Boric Oxide and Borate Glasses	108

<b>Chapter 7. Immiscibility in Oxide Melts</b>	<b>115</b>
A. Free Energy of Phases in Two-component Systems	115
B. Stable Immiscibility in Borate and Silicate Systems	121
C. The Relationship between Immiscibility and Structure	121
D. Elimination of Immiscibility	136
<b>Chapter 8. Metastable Immiscibility and Microphase Separation</b>	<b>141</b>
A. Mechanisms of Phase Separation	143
B. Experimental Studies of the Separation Processes	147
C. Microphase Separation in Borate and Silicate Systems	149
<b>Chapter 9. Phosphorus Pentoxide and Phosphate Glasses</b>	<b>155</b>
A. Phosphorus Pentoxide	155
B. Glass Formation in Binary Phosphate Systems	160
<b>Chapter 10. Germanium Dioxide and Germanate glasses</b>	<b>175</b>
A. Germanium Dioxide	175
B. Glass Formation in GeO <sub>2</sub> Systems	177
<b>Chapter 11. Tellurite and Vanadate Glasses</b>	<b>185</b>
A. Tellurite Glasses	186
B. Vanadate Glasses	191
<b>Chapter 12. Miscellaneous Oxide Glasses</b>	<b>199</b>
A. Aluminate glasses	199
B. Glasses Based on Ga <sub>2</sub> O <sub>3</sub>	200
C. Carbonate glasses	201
D. Titanate Glasses	201
E. Glasses Based on As <sub>2</sub> O <sub>3</sub> , Sb <sub>2</sub> O <sub>3</sub> and Bi <sub>2</sub> O <sub>3</sub>	203
F. Glasses Based on MoO <sub>3</sub> and WO <sub>3</sub>	206
G. Sulphate and Selenite Glasses	209
<b>Chapter 13. Nitrate Glasses</b>	<b>213</b>
A. Glass-forming Systems	213
B. The Systems KNO <sub>2</sub> – and Ca(NO <sub>3</sub> ) <sub>2</sub>	215
C. Theories of Glass Formation	217
D. The Mechanism of Melting	220

<b>Chapter 14. Glasses Based on Water</b>	<b>225</b>
A. Vitreous Water	225
B. The System $\text{H}_2\text{O} - \text{H}_2\text{O}_2$	227
C. Other Aqueous Solutions	228
D. Structure of Water	230
E. Hydrogen Bonding in $\text{KHSO}_4$	233
<b>Chapter 15. Halide Glasses</b>	<b>235</b>
A. $\text{BeF}_2$ Glasses	236
B. Other Fluoride Glasses	245
C. $\text{ZnCl}_2$ Glasses	247
<b>Chapter 16. Chalcogenide Glasses</b>	<b>249</b>
A. Comparison with Other Systems	249
B. Structure and Melting Behaviour of Elements in Groups IV, V and VI	250
C. Sulphur, Selenium and Tellurium	254
D. Binary Glasses	262
E. Ternary glasses	267
F. Halogen-containing Glasses	273
G. Viscosity of Binary Glasses	275
H. Phase Diagrams of Binary Chalcogenide Systems	280
I. Structure of Chalcogenide Compounds and Glasses	282
<b>Chapter 17. Concluding Remarks</b>	<b>287</b>
