

## CONTENTS

Foreword	v
Preface	vii
<b>Section 1 GLASS TECHNOLOGY</b>	
1. Composition and Constitution	3
2. Properties of Glass	16
3. Chemical Durability	61
4. Stress Release and Annealing	103
5. Glass-Metal Seals	119
6. Strength Testing and Stress Determination	132
<b>Section 2 GLASS MANUFACTURE</b>	
7. Raw Materials and Melting	155
8. Primary Forming Operations	163
9. Secondary, or Finishing, Operations	176
10. Manufacturing Tolerances and Glass Design	185
<b>Section 3 APPLICATIONS</b>	
11. Glass Containers	197
12. Flat Glass and Glazing	207
13. Laboratory Glassware and Thermometers	227
14. Applications in the Chemical Industry	242
15. Sight and Gage Glasses	260
16. Electric Lamps and Electron Tubes	272
17. Illumination	303
18. Electronic Circuit Components	334
19. Special Glasses and Their Applications	356
<b>Section 4 FIBROUS GLASS</b>	
20. Composition and Properties of Fibers	375
21. Manufacturing Processes and Products	381
22. Applications of Fibers-glass Wool	390
23. Applications of Fibers-glass Textile products	411
24. Fibrous-glass-reinforced Plastics	426
<b>APPENDIXS</b>	
A. Federal and Military Specifications on Glass	465
B. Definition of Glass Terms	467
Index	473
