

## CONTENTS

Preface	5
<b>1 Characteristics of glass-ceramic materials</b>	<b>9</b>
1.1 Phase equilibria in glass-forming systems	9
1.2 Glass formation	11
<b>2 Basic types of phase transformation in glass-forming systems</b>	<b>29</b>
2.1 Separation in the phase	31
2.1.1 Thermodynamic determination of the immiscibility regions	35
2.1.2 The mechanism and kinetics of phase separation	46
2.1.3 Growth of the separated phase	53
2.2 Bulk crystallization	55
2.2.1 Homogeneous nucleation	56
2.2.2 Heterogeneous nucleation	58
2.2.3 Photonucleation (nucleation produced by radiation)	63
2.2.4 Crystal growth	63
2.2.5 The kinetics of crystallization	69
2.2.6 Secondary crystal growth	71
2.2.7 The effect of nucleating agents and metastable liquid phase separation on crystallization	72
<b>3 Bulk crystallization in simple systems</b>	<b>76</b>
3.1 SiO <sub>2</sub> -R <sub>2</sub> O system	76
3.2 The SiO <sub>2</sub> -Al <sub>2</sub> O <sub>3</sub> system	81
3.3 The SiO <sub>2</sub> -Al <sub>2</sub> O <sub>3</sub> -Li <sub>2</sub> O system	85
3.4 The SiO <sub>2</sub> -Al <sub>2</sub> O <sub>3</sub> -MgO system	97
3.5 The SiO <sub>2</sub> -Al <sub>2</sub> O <sub>3</sub> -ZnO system	101
3.6 The SiO <sub>2</sub> -Al <sub>2</sub> O <sub>3</sub> -CaO system	105
3.7 The SiO <sub>2</sub> -Al <sub>2</sub> O <sub>3</sub> -MgO-K <sub>2</sub> O-F system (fluoromicas)	107
3.8 Other systems	110
<b>4 Procedures for the preparation of glass-ceramic materials</b>	<b>114</b>
4.1 Raw materials and preparation of the glass batch	114
4.2 Melting	115
4.3 Forming	117
4.4 Heat treatment	121
4.5 Some special methods for preparing glass-ceramic materials	127

<b>5</b>	<b>Methods of study</b>	<b>141</b>
5.1	Methods of heat treatment of the samples	141
5.2	Differential thermal analysis	145
5.3	Electron microscopy	150
5.4	X-ray diffraction analysis	158
5.5	Viscosity measurements	162
<b>6</b>	<b>The properties of glass-ceramic materials</b>	<b>166</b>
6.1	Density	167
6.2	Mechanical properties	167
6.2.1	Strength and elasticity	167
6.2.2	Hardness and abrasion resistance	173
6.3	Thermal properties	174
6.3.1	The coefficient of thermal expansion and resistance to thermal shocks	174
6.3.2	Specific heat and thermal conductivity	176
6.3.3	Thermal stability and deformation during mechanical stresses at increased temperatures	177
6.4	Electrical properties	179
6.4.1	Electrical resistivity	179
6.4.2	Dielectric constant, dielectric losses and dielectric strength	180
6.4.3	Ferroelectric and magnetic properties	181
6.5	Chemical properties	182
6.6	Optical properties	183
<b>7</b>	<b>Survey of manufactured glass-ceramic materials, their properties and use</b>	<b>185</b>
7.1	Pyroceram	190
7.2	Fotoform, Fotoceram	195
7.3	Sitalls	199
7.4	Cer-Vit	203
7.5	Hercuvit	205
7.6	Heatron	207
7.7	Neoceram	210
7.8	Neoparies	214
7.9	Miraclon	216
7.10	Schott glass-ceramic materials	218
7.11	Kryston and Nukryst	224
7.12	Machinable glass-ceramic materials	226
7.13	Slastiall	230
7.14	Slagceram	235
7.15	Glass-ceramic solders and cements	235
7.16	Other glass-ceramic materials	244
