

CONTENTS

Chapter 1.	Historical Development of Glass Chemistry	1
Chapter 2.	Freezing of a Melt to a Vitreous Solid	16
Chapter 3.	Structural Elements of Silicates	25
Chapter 4.	Classical Theories of Glass Structure	33
Chapter 5.	Methodology in Glass Research	48
Chapter 6.	Microphase Separation	69
Chapter 7.	Structure and Properties of Colorless Glasses	96
Chapter 8.	Structure and Properties of Colored Glasses	153
Chapter 9.	Crystallization of Glasses	212
Chapter 10.	The Strength of Glass	254
Chapter 11.	Interaction Between High Energy Radiation and Glass	263
Chapter 12.	Survey of the Physical Basis of Some Glass Properties	283
	Bibliography	300
	Index	318
