Foreword	ix
Preface	xi
Acknowledgments	xiii
<b>GLASS MELTING</b>	
Optimization of Burners in Oxygen-Gas Fired Glass Furnace Marco van Kersbergen, Ruud Beerkens, Wladimir Sarmiento-Darkin, and Hisashi Kobayashi	3
Future Energy-Efficient and Low-Emissions Glass Melting Processes Ruud Beerkens, Hans van Limpt, Adriaan Lankhorst, and Piet van Santen	15
Mathematical Modeling to Optimize a Furnace Length by Width Ratio Erik Muijsenberg, Marketa Muijsenberg, Tomas Krobot, and Glenn Neff	33
A Summary of Almost 50 Years of Glass Furnace Preheating George Kopser	53
Is 50% Energy Efficiency Improvement Possible in the Glass Product and Production Chain in 2030? Léon Wijshoff	65
<b>REFRACTORIES</b>	
Conception of Modern Glass Furnace Regenerators Stefan Postrach, Elias Carillo, Mathew Wheeler, and Götz Heilemann	75

New Cruciform Solutions to Upgrade Your Regenerator D. Lechevalier, I. Cabodi, O. Citti, M. Gaubil, and J. Poiret	91
Bonded Solutions for the Container Market Thierry Azencot and Michele Blackburn	105
Low-Cost Fused Cast Refractories: Some Peculiarities and Connection with Glass Defects P. Carlo Ratto	113
Mullite, Spinel & Calcium Aluminate—Leading the Way for Long Campaign/Energy Efficient Modern Glass Furnace Construction Chris Windle, Trevor Wilson, and Rhiannon Webster	121
MoZrO <sub>2</sub> —A New Material for Glass Melting Electrodes and Molybdenum Glass Tank Reinforcements—Experiences and Insights Mike Ferullo and Rudolf Holzknacht	135
<b>PROCESS CONTROL</b>	
Changing of Gob Temperature from Spout to Blank Gesine Bergmann, Hayo Müller-Simon, Nils-Holger Löber, and Kristina Kessler	147
High Viscosity Glass Sheet Fabrication Daniel Hawtof	159
Closed Loop Control of Blank Mold Temperatures Jonathan Simon and Braden McDermott	167
<b>LEGISLATION, SAFETY, AND EMISSIONS</b>	
The U.S. Policy and Political Landscape and Its Potential Impacts on the Glass Industry: Through a Glass Darkly Shelley N. Fidler and Marisa Hecht	179
Achieving a Global Corporate Safety Culture Jeff Hannis	187
Emission Monitoring in the Glass Industry Steve Roosz	193
<b>RECYCLING AND BATCH WETTING</b>	
Design of a New 25 Ton per Hour Waste Glass Processing Plant for Rumpke Christian Makari and Stefan Ebner	205
Glass Recycling Technology of Today Hoser Moser	217

<b>Cord Testing using Thermal Shock: Virtue or Vice?</b>	221
Gary L. Smay and Henry M. Dimmick, Jr.	
<b>To Wet or Not to Wet, That is the Question—Part B—Using Dry Batch</b>	231
Douglas H. Davis and Christopher J. Hoyle	
<b>Batch Wetting—Another Point of View</b>	243
John Brown, Hisashi Kobayashi, Wladimir Sarmiento-Darkin, and Matthias Lindig	
<b>Author Index</b>	257
