

Contents

Foreword	ix
Preface	xi
Acknowledgments	xiii
GLASS MELTING	
Energy Recovery from Waste Heat in the Glass Industry and Thermochemical Recuperator Hans van Limpt and Ruud Beerkens	3
Development of DFC (Direct Fusion Combustion) using Oxy-Fuel Burner Takayuki Fujimoto	17
Finding Optimal Glass Compositions Oleg A. Prokhorenko and Sergei O. Prokhorenko	27
MELTING, RAW MATERIALS, BATCH REACTIONS, AND RECYCLING	
Advanced Melting Technologies with Submerged Combustion I.L. Pioro, L.S. Pioro, D. Rue, and M. Khinkis	45
The Influence of Borate Raw Material Choice on the Glass Manufacturing Process Andrew Zamurs, David Lever, Simon Cook, and Suresh Donthu	67
Electrical Heating Systems for Melting Tanks, Forehearths, and Feeders Werner Bock, Gunther Bock, and David Boothe	75

A Furnace Combustion System Conversion by Flammatec during Operation at Libbey, Inc.—How Flame Geometry Improvement and Excess Air Control Contributes to Fuel Savings Dan Cetnar, Petr Vojtech, and H.P.H. Muijsenberg	91
--	----

COATINGS AND STRENGTHENING

Color Control of Glass and Multilayer Coatings on Glass David Haskins, Paul A. Medwick, and Mehran Arbab	105
Hard Glass—Thermal Strengthening of Container Glass Steven Brown	119
Effects of Glass Coatings on the Glass Tempering Process Charles Cocagne	131
The Usable Glass Strength Coalition Initiative to Provide Funding for Fundamental Research in Glass Strength Robert Weisenburger Lipetz	141

REFRACTORIES

Performance of Fusion-Cast and Bonded Refractories in Glass Melting Furnaces Amul Gupta, Kevin Selkregg, Matthew Wheeler, and Goetz Heilemann	161
Energy Savings and Furnace Design Matthias Lindig-Nikolaus	177
New Tin Oxide Electrodes for Glass Melting Julien Fourcade and Olivier Citti	183
Structural Health Monitoring of Furnace Walls Eric K. Walton, Yakup Bayram, Alexander C. Ruege, Jonathan Young, Robert Burkholder, Gokhan Mumcu, Elmer Sperry, Dan Cetnar, and Thomas Dankert	201
New CIP SEFPRO Refractory Solution to Extend Soda Lime Glass Furnace Life C. Linnot, M. Gaubil, T. Consales, O. Citti, T. Champion, and J. Poiret	207

PROCESS CONTROL AND MODELING

Non-Isothermal Pendant Drops of Molten Glass: Part 1 Byron L. Bemis	211
--	-----

ICG TC21 Modeling of Glass Melting Processes—How Reliable and Validated Simulation Tools can Help to Improve Glass Melting Efficiency and Productivity H.P.H. Muijsenberg	227
Proper Modeling of Radiative Heat Transfer in Clear Glass Melts A.M. Lankhorst, L. Thielen, P.J.P.M. Simons, and A.F.J.A. Habraken	249
Novel Method for Stress Inspection of Tempered or Thermally Strengthened Glass Sarath Tennakoon	259
Author Index	267
