
Contents

Foreword	ix
Preface	xi
Acknowledgments	xiii
ENERGY AND GLASS MELTING	
Strength of Glass and Glass Fibers Hong Li	3
Operating Experience with OPTIMELT™ Regenerative Thermo- Chemical Heat Recovery for Oxy-Fuel Fired Glass Furnaces A. Gonzalez, E. Solorzano, S. Laux, U. Iyoha, K.T. Wu, and H. Kobayashi	17
BATCHING	
Optimization Program for Batch Wetting Offers Benefits in Furnace Life, Energy Efficiency, and Operational Reliability Thomas S. Hughes, F. Philip Yu, and Blaine Krause	29
Effect of Borate Raw Material Choices on the Batch Reactions of Alkali-Lean Borosilicate Glasses Mathieu Hubert, Anne Jans Faber, Simon Cook, and David Lever	43
Glass Cullet: Impact of Color Sorting on Glass Redox State Stefano Ceola, Nicola Favaro, and Antonio Daneo	57
COMBUSTION, REFRACTORIES, AND SENSORS	
Oxygen-Solid Fuel Combustion in Glass Melting Furnaces Mark D. D'Agostini, Jinghong Wang, and Juping Zhao	71

Hydroprime® Gas Generators Provide Low Cost, Reliable Hydrogen for Float Glass Manufacturing	83
Goutam Sháhani, Kyle Finley, and Nick Onelli	
Corrosion of AZS Refractories—Source of Defects in Tableware Glass	89
P. Šimurka, J. Kraxner, P. Vrábek, and T. Paučo	
How Fused Cast AZS Take Care of Secure and High Quality Glass Manufacturing	103
Michel Gaubil, Isabelle Cabodi, Jessy Gillot, and Jie Lu	
Advanced Furnace Inspection and Monitoring Based on Radar Sensors	117
Yakup Bayram, Alexander C. Ruege, Peter Hagan, Elmer Sperry, and Dan Cetnar	

ENVIRONMENTAL

Optimizing Low Momentum Oxy-Fuel Burner Performance in Glass Furnaces to Minimize Furnace Emissions and Alkali Volatilization	135
Uyi Iyoha, Hisashi Kobayashi, Euan Evenson, and Elmer Sperry	
Heat Oxy-Combustion: An Innovative Energy Saving Solution for Glass Industry	149
Hwanho Kim, Taekyu Kang, Kenneth Kaiser, Scott Liedel, Luc Jarry, Xavier Paubel, Youssef Jumani, and Levent Kaya	

MODELING

Intelligent Furnace Design and Control to Increase Overall Glass Furnace Efficiency	159
Erik Muijsenberg	
Glass Melt Quality Optimization by CFD Simulations and Laboratory Experiments	169
A.F.J.A. Habraken, A.M. Lankhorst, O.S. Verheijen, and M. Rongen	

FORMING

Forehearth Heating	181
Alan Stephens, Clive Morgan, and Stephen Sherlock	
Improvements to Emhart Glass Vertiflow Mold Cooling Applications in Glass Container Production	185
Pierre S. Lankeu Ngankeu	

Multi-Layer Glass Thickness Measurement Jason Ness, Filipp Ignatovich, and Steve Heveron-Smith	193
The Qualification of a New Glass Strengthening Process Steven Brown and Dubravko Stuhne	201
Author Index	207
