

CONTENTS AND SUBJECT INDEX

INTRODUCTION	1.
GLASSMAKING	3.
Melting	3.
Glass Batch Wetting and Mixing Apparatus	3
Melting Apparatus Using Gas-Free Materials	6
Energy-Efficient Fuel-Fired Glass Furnace	9
Energy-Saving Electric Glass Melting Furnace	11
Addition of Barium Carbonate in Electric Furnace Process	13
Differential Extraction of Heat	14
Reduction of Sulfur Emissions	15
Glass-Contacting Member of Platinum-Coated Refractory	16
Molten Glass Homogenizer	17
Inclusion Melting with Radioactive Components	19
Glass Manufacture	20
Electric Glass Sheet Manufacturing Process	20
Production of Glass in a Rotary Furnace	21
Manufacture of Flat Glass by the Float Process	21
Loading Containers into an Annealing Lehr	22
Gob Weighing System	24
High Silica, Metal-Oxide-Containing Granules	27
Moldable Material Containing Crystallizable Glass	28
Blistered, Crystallizable Glass from Waste Materials	30
High Sodium Oxide Composition	32
Glass Coatings	33
Glass-Coated Polycarbonate Article	33
Corrosion-Resistant Coating for Metals	35
Foamed Glass	36
High Silica Borosilicate Composition	36
Oxygen Acids as Bonding Agents	38
Production Without Prolonged Heating Schedule	39
Ash-Coated Pellets	41

GLASS PROCESSING	44
Molding and Shaping	44
Injection Molding of Hydrosilicates	44
Compression Molding of Hydrosilicates	46
Shaping of Glass Sheets by Roll-Forming	47
Shaping of Sheet Glass by Pressure-Molding	48
Glass-Drawing Method	48
Bending of Glass Sheets to Curved V-Bends	50
Bending of Glass Plate Using Electrical Current	51
Extrusion Apparatus	52
Apparatus for Producing Narrow-Necked Containers	53
Production of Large Glass Containers	56
Mold Lubricant and Method	56
Handling of Glass Sheets During Shaping and Cooling	58
Apparatus for Protecting Tong-Suspended Glass Sheets from Buffeting ..	58
Shaping and Tempering Process Employing Pivotal Transfer Apparatus ..	62
Strengthening	65
Application of Potassium Fluoride and Metal Acetate	65
Lithium-Containing Glass Suitable for Ion-Exchange Strengthening	66
Addition of Alumina and/or Zirconia to Soda-Lime-Silica Glass	66
Strengthening Glass Articles with Mixed Potassium Salts	67
Extractable-Alkali-Decreasing Treatment	68
Improving Durability of Spontaneous NaF Opal Glassware	70
Toughening of Glass in a Fluidized Bed of Particulate Material	71
Differentially Toughened Safety Glass from Localized Gas Flow	74
Differentially Toughened Glass from a Fluidized Bed	75
Disposal of Shattered Glass During Tempering	76
Tempering of Flat or Curved Sheets Supported Vertically	77
Restraining of Glass During Tempering	78
Coating	79
Metal Coating of a Glass Ribbon	79
Silicon-Containing Coating	80
Enamel Coating for Opal Glassware	81
Enamel Coating for Borosilicate Glass	82
Metal Oxide Film to Control Solar Energy	82
Electroless Deposition of Cuprous Oxide	84
Magnetizable Surface Layer	85
Welding	86
Welding of Plate Glasses by Electrical Current	86
Manufacture of Double-Glazed Window Units	88
Aqueous Colloidal Graphite Electroconductive Stripe	89
Weld Based Containing Metallic Elements	90
Coloring	92
Glass Incorporating Both Transparent and Opaque Portions	92
Variegated Glass in a Continuous Sheet	94
Edge Treatment	95
Heat Treatment of Plate Glass Edges	95
Grinding the Edges of Cup-Shaped Glasses	96
Hydration	97
Hydration of Silicate Glass in Water-Containing Atmosphere	97
Hydration of Silicate Glass in Alcohol-Water Solutions	98

GLASS FIBERS	100
Fiber Production	100
Centrifugal Fiberization of Hard Glass	101
Fiber Formation by Gas Blast Attenuation	105
Energy-Efficient Fiber-Producing Apparatus	107
Method of Forming and Collecting Fiber Particles	110
Method of Introducing Glass Strand onto Feed Roller	114
Fiber Mat Production Using Variable Speed Attenuator	116
Manufacture of Fiber Mats of Uniform Thickness	118
Bushing for Glass Spinning Apparatus	119
Resistively Heated Silicon Carbide Bushing	122
Bushing Block with Cylindrical Flow Passage	124
Fluid Flow Apparatus with Air Blowers	126
Motor Speed Control Device	128
Microcomputer-Controlled Winder	131
Gas Streams to Reduce Boric Oxide Deposition	131
Nozzle Plate Alloy Composition	132
Cutting of Glass Strands with Lasers	133
Glass Melting Using Electric Furnace	133
Draw Forming Apparatus with Increased Production Rates	135
Environmentally Safe Fiber Collection Apparatus	136
Fiber-Handling Apparatus with Increased Tension	136
Glass Separating Device	138
Recycling of Glass Fibers	141
Glass Pellets from Fiber Glass Cullet	144
Devitrification-Resistant, Amorphous Silica Fibers	145
Fiber Compositions	146
Boron- and Fluorine-Free Glass Composition	146
Glass Composition of Low B_2O_3 Content	147
Basalt Glass-Ceramic Fibers	149
Glass Composition Suitable for Rotary Process	149
Thermally Stable Quartz Glass Containing Cr_2O_3 and/or Mn_2O_3	151
Alkali-Resistant Glass Fiber Compositions	153
Radiant-Energy-Absorbing Glass-Ceramic Fiber	154
Fiber Coatings	155
Alkali-Resistant Coating	155
Coating Applicator System	157
Fiber Size Composition	158
Recycling of Size Material	160
Other Processes	162
Porous, Corrosion-Resistant Platelike Structure	162
Friction Material	164
GLASS-CERAMICS	167
Glass-Ceramic Compositions	167
Anorthite Glass-Ceramic Composition	167
Beta-Spodumene Glass-Ceramic Materials	168
Oxynitride Compositions	169
Dental Restoration Material	171
Decorative Coatings	173
Brown Stain Decoration	173
Gray Stain Decoration	175
Miscellaneous Processes	176

Conversion of Thin Glass Bodies to Glass-Ceramic Bodies	176
Glass Envelope for Isostatic Pressing of Ceramic Articles	178

OPTICAL GLASS	180
Lenses	180
B_2O_3 -ZnO- La_2O_3 - Y_2O_3 Optical Glass	180
Zirconium-Containing Borosilicate Glass	182
P_2O_5 -PbO- Nb_2O_5 Optical Glass	183
Optical Glass with Low Nb_2O_5 Content	184
Lead-Free Optical Glass	185
Optical Element with Refractive Index Gradients	185
Infrared-Transmitting Glass	186
Ion-Exchanged Antireflection Coating	188
Hardened Circular Lens Element	188
Molding Surface of SiC or Si_3N_4	189
Fiber Optics	190
Method of Improving Cross-Sectional Circularity	190
Drawing Filaments from Soot Preforms in Helium Atmosphere	191
Drying of Glass Soot Preform	194
Vitrification of Soot Layer in Inert Gas Atmosphere	195
Production of Glass Films by Thermal Decomposition	196
Apparatus Employing Rotating, Cylindrical Crucible	197
Core Material of Graded Composition and Thickness	199
Optical Wave Guide with Diameter Variations	200
Glass Rod Formed by Gaseous Deposition onto Rotating Base Plate	200
Single Polarization Optical Fibers	201
Elliptical Core Single Mode Fiber	201
High Temperature Internal Cladding Method	202
Optical Fibers Having High Infrared Transmittancy	205
Three-Layer Optical Wave Guide	207
Fusion of a Particulate Tubular Structure	209
Method of Reducing Absorption Losses by UV Radiation	211
Optical Fibers with a Radial Refractive Index Gradient	212
Melting of Core Material Within Glass Tube	214
Removal of Substrate Layer	215
High Tensile Strength Fiber Preform with Protective Layer	216
Relative Motion Between Tube and Plasma-Producing Apparatus	218
Laser Drawing Apparatus	220
Manufacture of Continuous Fibers Without Need for Preforms	221
Multimember Crucible Apparatus	222
Multilayer Optical Isolation Zone	224
Deposition of Variously Doped Layers Upon Tube Bore	226
Joint Doped Porous Glass Fibers	228
Incorporation of Index- and Stress-Modifying Dopants	230
Preform Manufacture Using Volatile Dopant	232
B_2O_3 - or F-Doped Silica Layer	234
Increase of Refractive Index Without Increase of Doping	236
High Purity Glass Using Chemical Vapor Deposition	238
Fluorine-Doped, Synthetic Quartz Glass	239
Fluorine-Doped, Synthetic Quartz Glass Preform	241
Ga_2O_3 - P_2O_5 - GeO_2 Optical Transmission Line Glass	242
Fiber Optics Fused Array with Improved Blemish Quality	242
Protective Coating	243

Manufacture of Continuous Optical Preform	244
Joining of Optical Fibers with a Link Piece	244
Coupling of Glass Fibers Using an Etchant	244
Connection of Optical Fibers Using Vibration	245
Photochromic Glass	246
Lithium Boroaluminosilicate Sheet Glass Compositions	246
Ophthalmic Glass Exhibiting Rapid Darkening and Fading Properties	247
Photochromic Microsheet for Use in Glass-Plastic Composite Lenses	249
Gradient Photochromic Glass Containing Unnucleated Portions	250
Over-Nucleation of Selected Lens Portions	252
Manufacture of Gradient Lenses Using Heat Sink Material	254
Copper-Cadmium Halide Glasses	255
Colored Glasses Exhibiting Photoanisotropic Effects	257
Introduction of Silver Ions into Hydrated Glass	258
Bifocal Lens System	259
Other Processes	262
Glass Microspheres with High Refractive Index	262
Bronze-Tinted Windshield Glass	264
ELECTRICAL GLASS	265
Passivation of Semiconductors	265
Germanate Glass Coating	265
Addition of Cordierite	265
Other Electrical Uses	266
Electrical Coating on Inner Surface of Glass Tubing	266
Sodium-Ion-Conducting Sodium Aluminum Borate Glasses	268
Glass Electrode	269
Stem Sealing Method for Assembling Electron Tubes	271
Glass-Crystalline Material for Microwave Circuits	272
TECHNICAL AND SPECIALTY GLASS	274
Sealing or Bonding Glass	274
Sealing Glass Preform	274
Sealing Glass Not Requiring Devitrification	277
Glass-to-Metal Seal Involving Iron Base Alloys	278
Glass-to-Aluminum Seals	279
Corrosion-Resistant Hermetic Plug Seal	280
Glass-to-Metal Seal for Electrochemical Cells	284
Method of Forming a Lead-Through in a Ceramic Component	285
Sealing of CRT Faceplate to CRT Envelope	287
Capacitive Pressure Sensor	289
Gap Formation in Magnetic Heads	289
Bonding of Bioglass to Metal	290
Halogen Cycle Incandescent Lamps	293
Stained Glass Photomasks	294
Electron Bombardment Method	294
Electromigration Method	297
Heat-Reflecting Glass	300
Aluminum-Containing Coating	300
TiO₂ Layer in Rutile Form	302
Miscellaneous Processes	303
Impact-Resistant Safety Glass	303
Fireproof Glass	305

Glass for Radio-Photoluminescence Dosimetry	307
Stationary Phase Surface for Chromatography	308
Microwave-Safe Vacuum-Insulated Bottle	310
Glass for Faraday Rotation Element	312
Transparent Insulating Bodies	312
Cathode Ray Tube Panel	313
COMPANY INDEX	315
INVENTOR INDEX	317
U.S. PATENT NUMBER INDEX	321
