

CONTENTS

| | |
|--|----|
| Foreword | ix |
| The International Enamellers Congress: PEI's Role | 1 |
| Overview of the Recent International Enamellers Congress | 3 |
| Metal Preparation for Porcelain Enameling Appliance Components: Clean-Only Systems | 5 |
| Development of a Non-Petroleum-Based Lubricant for the Deep Drawing of Steel | 11 |
| Industrial-Scale Cleaning Using Ultrasonics | 17 |
| Enamel Thickness Optimization Using Sigma Six Methodology | 23 |
| Statistical Process Control and Charts | 25 |
| The Benefits of ISO and QS 9000 | 29 |
| Real-Time Image Analysis of Porcelain Enamel Defects | 37 |
| The Role of the Workforce in the Implementation of New Technology | 41 |
| Environmental Regulatory Outlook | 45 |
| OSHA's Cooperative Compliance Program and the EPA's Risk Management Plan | 47 |
| New Techniques of Monitoring Temperatures in Furnaces | 51 |
| Pyrometric Cones to Monitor Firing of Porcelain Enamel Ware: A Progress Report | 57 |
| A Dedicated Porcelain Furnace System | 59 |
| Stress Reduction in Enamel/Steel Systems | 63 |
| Fractographic Examination of Porcelain Enamel Chipping Defects | 69 |

| | |
|--|-----|
| New Concepts in Two-Coat/One-Fire Enameling | 81 |
| Optimizing Conveyor Loading Space | 83 |
| A View of a Porcelain Enamel Powder Operation | 99 |
| Another View of a Porcelain Enamel Powder Operation | 105 |
| Equipment for a Porcelain Enamel Application | 107 |
| Equipment for Powder Coating with Porcelain Enamel Powders and Some Troubleshooting Tips | 123 |
| The Effects of Powder Resistivity on Transfer Efficiency | 137 |
| A New Major Appliance Plant | 143 |
| Continuous Coating of Commercial Water Heaters | 145 |
| Application of Porcelain Enamel by the Electrophoretic Enameling Process | 151 |
| Production Experiences with an Electrocoat Porcelain Enamel System | 159 |
