

CONTENTS

Introduction	1
PART I SLIP CASTING	5
1 ION EXCHANGE IN CLAY MINERALS	7
2 RHEOLOGICAL PROPERTIES OF AQUEOUS CLAY SYSTEMS	23
3 PREPARATION AND USE OF PLASTER MOLDS	31
4 CONTROLS REQUIRED AND PROBLEMS ENCOUNTERED IN PRODUCTION SLIP CASTING	40
5 SLIP CASTING NONCLAY CERAMIC	45
PART II PRESSURE FABRICATION	53
6 PRESSURE FORMING OF CERAMICS	55
7 CONTROLS REQUIRED AND PROBLEMS ENCOUNTERED IN PRODUCTION DRY PRESSING	62
8 HYDROSTATIC MOLDING	70
9 AN INTRODUCTION TO THE VIBRATORY COMPACTION OF POWDERS	74
PART III PLASTIC FORMING	79
10 CLAY – WATER PASTES	81
11 PARTICLE ORIENTATION IN CLAYS AND WHITEWARES AND ITS RELATION TO FORMING PROCESSES	89
12 SOME EXPERIENCES WITH THE CONTROL OF PLASTIC BODIES FOR AUTOMATIC JIGGERING	98
13 VERTICAL EXTRUSION OF NONCLAY COMPOSITIONS	107
PART IV DRYING AND FIRING	113
14 WARPING AND ITS CONTROL	115
15 RECRYSTALLIZATION AND SINTERING IN CERAMICS	120
16 SINTERING IN THE PRESENCE A LIQUID PHASE	131
PART V SOME SPECIAL PROCESSES	145
17 THE HOT PRESSING OF CERMICS	147
18 CEMENTITIOUS BONDING IN CERAMIC FABRICATION	171
19 NUCLEATION	189
20 SOME POSSIBLE APPLICATIONS OF METAL-WORKING PROCESSES TO CERAMICS AND CERMETS	195

PART VI CERAMIC MICROSTRUCTURES	199
21 EFFECT OF MICROSTRUCTURE ON THE ELECTRICAL AND MAGNERIC PROPERTIES OF CERAMICS	201
22 EFFECT OF MICROSTRUCTURE ON THE MECHANICAL PROPERTIES OF CERAMICS MATERIALS	213
Author Index	229
Subject Index	233
