

CONTENTS

Preface	XV
ZEOLITES OF ENVIRONMENTAL IMPORTANCE	
Application of zeolite membranes, films and coatings	1
Study of the influence of silica source on the properties of silicate solutions and the particulate properties of zeolite X	13
A method for the preparation of silicalite-1 microspheres	21
<i>In situ</i> crystallization of MFI-type zeolites over cordierite support	29
Particular features of the introduction of In into MCM-41 by reductive solid-state ion exchange	37
Influence of synthesis media on the TS-1 characteristics	45
Pore-size control of A1-MCM-41 materials by spontaneous swelling	53
Enhanced hydrothermal stability obtained for <i>in situ</i> synthesized micro- and mesoporous MFI/MCM-41 like phases	61
Analysis of the influence of kinetic and chemical factors on the rate of crystal growth of zeolite A	69
FER-type catalysts: synthesis and characterization	77
Factors controlling the coatings of a metal with zeolite Y	85
Synthesis of ZSM-5 and A zeolites on porous alumina substrates	93
The stability of zeolite coatings grown on metal supports for heat pump applications	101
Preparation and characterization of TON type zeolite catalysts	109
Crystal population balance model for nucleation and growth of colloidal TPA-silicalite-1	117
Zeolite synthesis using 1,6-diammonohexane-based organic diammonium salt as templates	125
The synthesis of small colloidal crystals of TPA-silicalite-1 with short synthesis times and high yields	133
Synthesis of nanosized FAU-type zeolite	141
Synthesis of VS-1 zeolite wetness impregnated SiO ₂ -V ₂ O ₅ xerogels	149
Analysis of distribution of nuclei in matrices of differently prepared and treated aluminosilicate gels	157
Incorporation of iron in MFI structure in fluoride media	165
New routes to synthesis of reproducible, high-performance supported silicalite-1 membranes	173
Synthesis of thin zeolite Y films on polished α -alumina wafers using a seeding technique	181
Preparation and permeation properties of different zeolite tubular membranes	189
Spectroscopic and catalytic characterization of basic zeolites and related porous materials	197
2D multiple quantum ²⁷ Al NMR and ²⁹ Si NMR characterization of levynite	205
Valency and coordination of iron in FeAlPO molecular sieves: and <i>in situ</i> Mossbauer study	213
A vibrational spectroscopic study of the growth of silicalite-1 films on seeded gold surfaces	221

¹⁵ N-NMR characterization and quantitative NMR determination of nitrogen adsorbed in MX zeolites	229
Grafting on nitroxyl (TEMPO) radical on the surface of silica gel and micelle-templated silica (MTS)	237
Spectroscopic investigations of the decomposition of CCl ₂ F ₂ on three different types of zeolites	245
Behaviour of benzene molecules in large pore zeolite structures as studied by FTIR and ² H NMR techniques	253
Ground and excited states of vanadium incorporated in inorganic matrices	261
Chemisorption of hydrogen on Ag-Y studied by ¹ H MAS NMR	269
Free volumes in zeolites as probed by positrons	277
Study of electrostatic properties in three model sodalites: a different perspective on Bronsted acidity and host-guest interactions in zeolite cages	285
Photoluminescent (PL) investigation on mesoporous molecular sieve materials	293
Site preference and reducibility of substituted ferric iron in Fe-ETS-10	301
Acidity investigations and determination of integrated molar extinction coefficients for infrared absorption bands of ammonia adsorbed on acidic sites of MCM-41	307
Calorimetric studies of ion-exchange equilibria on clinoptilolite involving uncharged cations	315
Investigation of liquid crystals in porous materials	321

ENVIRONMENTAL APPLICATIONS

Layered double hydroxides as solid base catalysts and catalyst precursors	329
Pre-stationary stage in the ethylbenzene disproportionation over zeolite catalysts	341
The effects of zeolite structure on the disproportionation of trimethylbenzenes to xylenes and tetramethylbenzenes	351
Effects of ceria-modification of H-mordenite on the isopropylation of naphthalene and biphenyl	359
Cesium-modified mesoporous molecular sieves as basic catalysts for Knoevenagel condensations	367
The hydroconversion of n-heptane over reduced and oxidized Pt/H-zeolite catalysts	375
Skeletal isomerisation of 1-butene over ferrierites dealuminated in solid state with crystalline (NH ₄) ₂ [SiF ₆]	383
Ring-opening and dimerization reactions of methyl-substituted oxiranes on HZSM-5 zeolite	391
Production of environmentally friendly octane booster (methyl-t-butylether, MTBE) using zeolite catalysts	399
Cyclohexanol conversion as a test reaction for acid properties of solids-investigation of faujasites, mordenites and MCM-41	409
Benzene saturating isomerization	417
Hydroisomerisation of n-heptane over palladium loaded SAPO-11 molecular sieves with varying concentration of acid sites	425
Reactions of methylcyclohexane over bifunctional zeolite catalysts	433

Effect of pre-treatment of Zn-loaded ZSM-5 zeolites in reductive and oxidative atmosphere on the n-hexane aromatization	441
Catalytic cracking of n-butane over rare earth-loaded HZSM-5 catalysts	449
Effect of trivalent elements in the framework on the basicity of zeolites	457
MCM-41 supported TEMPO as an environmentally friendly catalyst in alcohol oxidation	465
New transition metal-containing molecular sieves for selective liquid phase oxidation	473
Conversion of polyethylene into aromatic hydrocarbons using MEL and BEA zeolites	481
Oxidative methylation of toluene with methane over alkali modified X zeolite catalysts	489
Stability and deactivation of Ru/Na Y and Ru-Co/Na Y catalysts in CO hydrogenation	495
Selective nitration of toluene with acetyl nitrate and zeolites	501
Synthesis of 3-methyl-3-butene-1-ol from isobutene and formaldehyde on FeMCM-22 zeolites	507
Homogeneous and heterogeneous asymmetric reactions. Part 13. Clay-supported noble metal catalysts in enantioselective hydrogenations	515
Synthesis, characterization and catalytic activity of selective oxidation zeolite catalysts	523
Hydrodesulfurization over noble metals supported on mesoporous silicate MCM-41	531
Chemoselective hydrogenation of the C=O group in unsaturated aldehydes over clay-supported platinum catalysts	539
Selective synthesis of lactones over Ru-Sn-Al ₂ O ₃ catalysts prepared by complexing agent-assisted sol-gel method	547
The adsorption and catalytic properties of Cu-ETS and Cu-ZSM molecular sieves in NO _x removal by reduction	555
Selective catalytic reduction of NO with methane or ethene on ferrierite and mordenite-type zeolites containing copper, cobalt and indium	563
Catalytic properties of Pt and tungstophosphoric acid supported on MCM-41 for the reduction of NO _x in the presence of water vapor	571
Nitrous oxide decomposition over iron-exchanged [Al]-ZSM-22 zeolites	579
Selective reduction of nitric oxide by methane over Pd-exchanged H-ZSM-5: influence of activation	587
Characteristics of V ₂ O ₅ /Ti-PILC catalyst for reduction of NO by NH ₃	595
Sorption of CO and N ₂ in CuZSM-5 studied by IR spectroscopy	603
Role of carbonaceous deposits and effect of temperature swing reaction (TSR) in selective catalytic reduction of nitric oxide over Ru-HZSM-5 catalyst	611
Different methods for preparation of Fe-ZSM5 as catalyst for the selective catalytic reduction of nitrogen oxides	619
On the role of acid site in NO _x decomposition over Pt/ZSM-5 and Pt-Co/ZSM-5 catalysts	627
NO adsorption and decomposition on Cu-containing mesoporous molecular sieves - comparison with Cu-ZSM-5	633
Natural zeolites in environmentally friendly processes and applications	641
Breakthrough study of SO ₂ and H ₂ O adsorption on zeolites from ternary mixtures	657

Sorption properties and search for correlations between analytical parameters of sorption and content of metal in CeAPO-5 containing V or Zr	675
Use of dealuminated faujasite Y and ZSM-5 zeolites for VOC's adsorption. Application of air cleaning	683
The possible usage of mesoporous molecular sieves for deodorization	691
Wastewater treatment with natural clinoptilolite: a new additive	699
Zeolite content and cation exchange capacity of zeolite-rich rocks	707
Natural zeolites of Georgia: occurrences, properties, and application	715
Chromium removal from water by ion exchange using zeolites and solidification of the resulting sludge in a cement matrix	723
Application of clinoptilolite as an additive for the photostabilization of the <i>Bacillus thuringiensis</i> formulation	731
Characterization and utilization of MFI zeolites and MCM-41 materials for gaseous pollutant adsorption	737
Kinetics of continuous exchange of Zn ²⁺ ions from solutions with Na ⁺ ions from thin layers of zeolite A	745
Zeolite matrices for pigments	753
Monitoring of hydrolysis in natural zeolite-H ₂ O system by means of pH and electrical conductivity measurements	761
Sorption of transient metal ions into clinoptilolite from waste water and recycling the used zeolite into a composite fertilizer	769
Potential use of MCM-41 for adsorptive separation of methylalumoxane	777
Removal and recovery of harmful compounds from waste water of photographic processes by synthetic zeolite-Y	785
Destruction of chlorobenzenes by catalytic oxidation over transition metal containing ZSM-5 and Y (FAU)-zeolites	793
Skeletal isomerization of n-butenes to isobutylene on ferrierite and H-ZSM-5 catalysts	801
Author Index	809
Subject Index	813
