

CONTENTS

Preface

Introduction	1
---------------------	---

Papers from Richard M. Fulrath Awardees

1. Recent Developments of Piezoelectric Composites in Japan	8
2. Research Trends in Ceramic Sensors	27
3. Organic-Intercalation Compounds	41
4. Piezoelectric Ceramic Actuator	62

Original Review Papers

5. Toughening in ZrO ₂ -Based Materials	76
6. A Review of Creep in Silicon Nitride and Silicon Carbide	95
7. The Glassy State	126
8. Electrical Conductivity of Ceramic Materials	147
9. Preparation and Application of Fine Powder from the Metal Alkoxide	165
10. Alumina Ceramic Substrates	184
11. Bonding between Ceramics and Metals by HIPing	201
12. High Toughened PSZ (Partially Stabilized Zirconia)	210
13. Ceramic Application for Automotive Components	227
14. Pyroelectric Sensors of Lead Germanate Thick Films	240
15. Ferrite Materials	254

Authors' Profile	271
-------------------------	-----

Keywords Index	277
