

CONTENTS

Development and Evaluation of Alumina Calcination	1
The Preparation of Ce ∞ -Sialons and Related Unstable Phases	7
Crystallisation Morphologies of Refractory Aluminosilicate Glass Ceramics	19
Crystallisation of CaO-P2O5--SiO2-Al2O3-TiO2 Glass-Ceramics	27
Controlled Heat Treatment-The Way to Prepare New Oxynitride Glass ceramics	39
Crystallisation of Calcium Phosphate Glass Ceramics for Biomedical Applications	53
The Deformation Characteristics of Clay Pastes	67
Comparison of Microstructural Evolution in Kaolinite Powders and Dense Clay Bodies	75
Characterisation of Nano-Sized Colloidal Suspensions for the Preparation of Multilayer Alumina Fibre-Reinforced Mullite CMCs Using Electrophoretic Filtration Deposition (EFD)	93
Processing Properties of Ceramic Paste in Radial Flow	103
Co-extrusion of Multilayered Tubes	113
Solid Freeform Fabrication Methods for Engineering Ceramics	125
Developments in Microwave Processing of Ceramics at Staffordshire University	133
Silicon Carbide Coated Carbon Fibre Tows by Chemical Vapour Deposition	143
Hydrothermal Synthesis and Characterisation of Strontium Doped Lanthanum Manganite Perovskite Powders for Use as a Cathode Material in SOFCs	155
Low-Temperature, Aqueous Processing of Lead Zirconate Titanate (PZT) Ceramics	165
The Effect of Processing Conditions on the Dielectric Properties of SBN Ceramics	177
The Effect of Atmosphere Controlled Sintering on the Piezoelectric Shear Mode Activity of PZT Based Ceramics	189
The Effect of Grain Size on Dielectric Response in the PMNT-PFNW System	197
