

CONTENTS

1. Ceramic Research Co-operation within the European Communities	1
2. Pre-standardization Studies as a Means of Helping the Development of Engineering Ceramics	7
3. An Overview of the Movements in the Engineering Ceramics Area 1985-1987	31
4. Protection Materials: Coatings for Thermal Barrier and Wear Resistance	45
5. The Production of High-Grade Technical Ceramics	81
6. Nondestructive Evaluation of Advanced Ceramics	99
7. Non-Oxide Technical Ceramics	151
8. Ceramic Matrix Composites	171
9. Ceramics in Internal Combustion Engines	203
10. Ceramic Heat Engine Programs in the USA	229
11. Developments in the UK Engineering Ceramics Programmes	241
12. The Present Attitude towards High Technology Ceramics in Japan	255
Index	279
