

CONTENTS

Chapter 1. Introduction to the Characterization of Ceramics	1
PART 1 – CHEMICAL ANALYSIS	
Chapter 2. General Analytical Chemistry	9
Chapter 3. X-Ray Spectroscopy	39
Chapter 4. Atomic Absorption Flame Spectrometry	89
PART 2 – PHASE STATE AND STRUCTURE	
Chapter 5. X-Ray Diffraction	135
Chapter 6. Transmission Electron Microscopy and Electron Diffraction	177
Chapter 7. Analysis of Microstructural Defects	219
Chapter 8. Petrographic Analysis	257
Chapter 9. Thermal Analysis	273
Chapter 10. Point Defect Analysis	307
PART 3 – SIZE, SHAPE, STRAIN, AND SURFACE OF POWDERS	
Chapter 11. Physical Characterization	349
Chapter 12. Small Angle X-Ray Scattering	371
Chapter 13. X-Ray Line Profile Analysis	395
Chapter 14. Scanning Electron Microscopy	419
Chapter 15. Light Scattering	435
Chapter 16. Characterization of Powder Surfaces	457
PART 4 - MICROSTRUCTURE	
Chapter 17. Electron Microprobe	505
Chapter 18. Quantitative Stereology	529
Chapter 19. Applied Stereology	555
PART 5 - SURFACES	
Chapter 20. Characterization of Ceramic Surfaces	583
