

CONTENTS

Chapter 1. Introduction	1
1.1. The Strength of Ceramics	1
1.2. Strengthening by Compressive Surface Stresses	13
1.3. Characterization and Property Measurements	20
Chapter 2. Thermal Treatments	31
2.1. Strengthening Sintered Alumina by Quenching	31
2.2. Strengthening Hot Pressed Alumina by Quenching	81
2.3. Strengthening Sapphire by Polishing, Reheating and Quenching	110
2.4. Strengthening Other Oxide and Silicate Ceramics by Quenching	120
2.5. Strengthening Non-Oxide Ceramics by Heating and Quenching	132
2.6. Status of Research on Thermal Treatments	145
Chapter 3. Coatings and Chemical Treatments	155
3.1. Glazes	155
3.2. Low Expansion Solid Solution Surface Layers	163
3.3. Low Expansion Compound Surface Layers Formed by Reaction with the Surface	188
3.4. Low Expansion Coatings	203
3.5. Phase Transformations	205
3.6. Status of Research on Coatings, Chemical Treatments and Phase Transformations	208
Chapter 4. Potential Applications	215
4.1. Applications	215
4.2. Limitations of Treatments	215
4.3. Design Considerations	216
4.4. Costs	220
References	223
Index	237
