

CONTENTS

PART 1 SOL-GEL SCIENCE

1	Inorganic Colloids for Forming Ultrastructures	3
2	physical-Chemical factors in Sol-Gel Processes	21
3	Relationships Between Sol-Gel to Glass Conversions: Structure of Gels During Densification	37
4	Use of Drying Control Chemical Additives (DCCAs) in Controlling Sol-Gel Processing	52
5	Kinetics and Mechanisms of Sol-Gel Polymerization	65
6	NMR, Raman Study of the Effect of Formamide on the Sol-Gel Process	73
7	A Multinuclear (^1H , ^{29}Si , ^{17}O) NMR Study of the Hydrolysis and Condensation of Tetraethylorthosilicate	81
8	Contribution to the Kinetics of Glass Formation From Solutions	87
9	Time-Resolved Raman Spectroscopy of Titanium Isopropoxide Hydrolysis Kinetics	94
10.	Theological Characterization During the Sol-Gel Transition	100
11.	Effects of Water Content on Gel Structure and Sol-Gel Transformations	108
12.	Applications of the Sol-Gel Method: Some Aspects of Initial Processing	113
13.	Structure and Chemistry of Sol-Gel Derived	123
14.	A Model for the Growth of Fractal Silica Polymers	131
15.	Structure of Porous Materials: Silica Aerogels and Organic Foams	140
16.	Comparative Pore Distribution Analysis of Sol-Gel Derived Silica	148
17.	Sintering of Monolithic Silica Aerogels	156
18.	Physical Properties of Partially Densified SiO_2 Gels	168
19.	Kinetic processes in Sol-Gel Processing	173

PART 2 APPLICATIONS OF SOL-GEL PROCESSING

20.	Dielectric Properties of Silicon Dioxide and Silicon-Oxynitride Sol-Gel Thin Films	187
21.	Sol-Gel Derived Silica Optical Filters	21
22.	Gel-Derived Glasses for Optical Fibers Prepared from Alkoxides and Fumed Silica	208
23.	Stronger Glass via Sol-Gel Coatings	217
24.	Processing and Structural Properties of $\text{Li}_2\text{O} - \text{Al}_2\text{O}_3 - \text{TiO}_2 - \text{SiO}_2$ Gels	224
25.	Silicon Carbide/Silica Gel Matrix Composites	231
26.	Sol-Gel Derived Ceramic Matrix Composites	237
27.	Nucleation and Epitaxial Growth in Diphasic (Crystalline and Amorphous) Gels	247
28.	Seeded Transformations for Microstructural Control in Ceramics	259
29.	Processing of Sol-Gel Derived Doped Powders and Substrates	272
30.	Interface Properties of Transition Metal Oxide Gels	278
31.	Preparation of Bulk and Thin Film Ta_2O_5 by the Sol-Gel Process	285
32.	Use of Mixed Titanium Alkoxides for Sol-Gel Processing	304
33.	The Effects of Processing Chemistry on Electrical Properties of High Field ZnO Varistors	311

34. Sol-Gel Processing of Lead Zirconate Titanate Films	320
35. Oxy-Alkoxy Polymer Networks	327
 PART 3 MATERIALS FROM ORGANOMETALLIC PRECURSORS	
36. Crosslinking of Polysilanes as Silicon Carbide Precursors	337
37. Crosslinking and Pyrolysis of Silane Precursors for Silicon Carbide	345
38. A Novel Polymeric Organosilazane Precursor to Si ₃ N ₄ /SiC Ceramics	354
39. Electrochemical and Sonochemical Routes to Organosilazane Precursors	363
40. Silicon Dioxide (O = Si = O): New Routes to Cyclic Spirosiloxanes: Chemical Vapor Deposition of SiO ₂	372
41. Electronic Interactions in Organomultimetallic Systems	384
42. A Theoretical Study of the Pyrolysis of Methysilane and Disilane	390
43. Applications of MNDO to Silicon Chemistry	400
 PART 4 ULTRASTRUCTURE IN MACROMOLECULAR MATERIALS	
44. Network Theory and Gelation	415
45. Morphology of Orientated Poly (P-phenylenevinylene): A Conducting Polymer from a Soluble precursor Polymer	418
46. Design, Ultrastructure, and Dynamics of Polymer Thin Films	427
47. Conformational Analysis of Some Polysilanes, and the Precipitation of Reinforcing Silica into Elastomeric Poly (Dimethylsiloxane) Networks	434
48. Ordered Polymers and Molecular Composites	444
49. Morphology and Properties of Particle /Polymer Suspensions	455
 PART 5 MICROMORHOLOGY SCIENCE	
50. Colloid Science of Composite Systems	463
51. Synthesis and Processing of Submicrometer Ceramic Powders	482
52. Low-Temperature Synthesis of Nonoxide Ceramic Powders for Structural and Electronic Applications	497
53. Two-Dimensional Particulate Structures	504
54. Structures of Colloidal Solids	513
55. Rheological Science in Ceramic Processing	522
56. Colloidal Behavior of Silicon Carbide and Silicon Nitride	539
57. Effect of Surface Hydration on Polymer Adsorption	550
58. AC Field-Induced Order in Dense Colloidal Systems	555
59. Influence of Particle Arrangement on Sintering	561
 PART 6 QUANTUM CHEMISTRY	
60. New Directions in Quantum Chemical Calculations – Particularly as to New Materials	577
 Index	 583
