

CONTENTS

Introduction

- 1 Historical Perspective on Whiteware Science 3

Characterization

- 2 The Methylene Blue Index for Whiteware Body Control 21
3 Limits in Particle Size Characterization 33
4 Cathodoluminescence Properties of Refractory Raw Materials and products 49

Rheology and Plasticity

- 5 Concentrated Kaolinite Suspensions: Polymer Adsorption and Rheological properties 65
6 Mechanisms of Plasticity in Clay-Water Systems 79
7 The Characterization of Plasticity 89

Forming

- 8 Influences of Particle Size Distributions on Whitewares Properties and Processing 105
9 Regulating Density Gradients in Slip Consolidation: A New Methodology 117
10 Applications of Granular Mechanics to Slip Casting, Filter Pressing and Drying 133
11 Advanced Organic Binder Systems for Whitewares 147
12 Mechanics of Extrusion 157
13 Advances in Spray-Dried Powder Processing for Tile Manufacture 169
14 Solid Free Form Fabrication Methods and Ceramic Components 183

Drying and Firing

- 15 Fundamentals of Drying and Shrinkage 199
16 Recent Innovations in the Fast Firing Process 213
17 Pyroplastic Deformation of Whiteware Bodies 225
18 Time, Temperature, and Atmosphere Effects on Firing 235
19 Designing Firing Schedules with Thermal Analysis 249
20 Advanced Manufacturing of Fast Fired Whiteware Bodies via Dynamic Characterization 265

Mechanical Properties

- 21 Thermal Shock of Triaxial Porcelains 281
22 Fracture Mechanics: Applications for Whitewares 293
23 Fractography of Whitewares 305
24 Calculation of Thermal Stresses in Whitewares Bodies via Finite Element Analysis 317
25 Sonic Methods for Flaw Detection 327

Glazing

26 Glaze Problems from a Glass Science Perspective	339
27 Evolution of Ceramic Tile Glazes	357
28 Modern Methods of Glaze Characterization	373
29 Colors, Pigments, and Decoration	395
30 Acid Corrosion Behavior of Lead-Containing Silicate Glasses: Scientific Basis and International Standards	407

Banquet Guest Lecture

31 The Gift of Process and the Responsibility of Civilization	425
