

## CONTENTS

**PART ONE: INTRODUCTUIN**

- |    |  |   |
|----|--|---|
| 1. | Concepts of Ultrastructure Processing                                    | 3 |
| 2. | Potential Impact of Ultrastructure processing on Government and Industry | 6 |

**PART TWO: SOL-GEL PROCESSING**

- |     |   |     |
|-----|---|-----|
| 3.  | Applications of Sol-Gel Methods for Glass and Ceramics Processing   | 15  |
| 4.  | Monolithic Xero- and Aerogels for Gel-Glass Processes   | 27  |
| 5.  | Relationships Between the Sol-to-Gel and Gel-to-Glass Conversions   | 43  |
| 6.  | Modification of Oxides by Polymerization Process  | 60  |
| 7.  | Behavior of Monolithic Silica Aerogels at Temperatures Above 1000°C   | 70  |
| 8.  | Drying and Firing Monolithic Silica Shapes from Sol-Gels  | 88  |
| 9.  | Physical Chemical Factors in Sol-Gel Processing   | 100 |
| 10. | Phase Transformation in Sol-Gel Derived Aluminas  | 126 |
| 11. | Alpha Alumina Formation in $A_{12}O_3$ Gels   | 142 |
| 12. | Preparation of Monolithic Lead-Titanate by a Sol-Gel Process  | 152 |
| 13. | Nitridation of Silica Sol-Gel Thin Films  | 161 |
| 14. | Deposition of Transparent Noncrystalline Metal Oxide Coatings the Sol-Gel Process   | 178 |
| 15. | Sol-Gel Derived Indium-Tin-Oxide Coatings   | 189 |
| 16. | TiO <sub>2</sub> Coated Glass Beads: A Novel Approach to Preparation of Supports for Glass-TiO <sub>2</sub> -Pd Catalysts in Hydrogenation of Olefins | 197 |
| 17. | Morphological Consequences of Freezing Gels   | 207 |
| 18. | Fabrication of Zirconia Fibers from Sol-Gels  | 219 |

**PART THREE: ORGANOMETALLIC PRECURSORS**

- |     |  |     |
|-----|--|-----|
| 19. | Polysilane precursors to Silica Carbide    | 235 |
| 20. | Some Organometallic Routes to Ceramics     | 245 |
| 21. | Pyrolysis of Polysilanes                   | 256 |
| 22. | Silazane Organometallic Routes to Ceramics | 245 |
| 23. | Silazane precursors to Silicon Nitride     | 265 |
| 24. | Photolysis of Polysilanes                  | 272 |
| 25. | Ordered Block Copolymers                   | 307 |

**PART FOUR: MICROMORPHOLOGY BASED PROCESSING**

26.	Processing Monosized Powders	315
27.	Monodispersed Colloidal Metal Oxides, Sulfides, and Phosphates: New Materials for Research and Applications	334
28.	Growth of precisely Controlled Powders from Laser Heated Gases	353
29.	RF Plasma Synthesis of Ultrafine, Ultrapure Silicon Carbide Powder	367
30.	Surface Chemistry of Oxides in Water	374
31.	Stability of Ceramic Suspensions	391
32.	Agglomerates and Agglomeration in Ceramic Processing	404
33.	The Influence of the Physicochemical Environment on Wet Milling	418
34.	Colloidal Filtration Route to Uniform Microstructures	439
35.	Applications of Soil Mechanics Theory to the Processing of Ceramics	448
36.	Sintering of TiO <sub>2</sub> from Organometallic Precursors	464
37.	Microstructural Effects Influencing Strength of Sintered Silicon Nitride	476

**PART FIVE: PHASE TRANSFORMATION BASED PROCESSING**

38.	Some Processing Requirements for Transformation Toughened Ceramics	493
39.	Tougher Ceramics Using Tetragonal ZrO <sub>2</sub> or HfO <sub>2</sub>	507
40.	Behavior of Plasma-Sprayed Coatings	524

**PART SIX: CHARACTERIZATION**

41.	Promise of Resonance Techniques for Characterizing the Cation and Anion Constituents	535
42.	Light Scattering Studies of Silica Aerogels	549
