

TABLE OF CONTENTS

1. INTRODUCTION	1
2. NOMENCLATURE	3
3. PREPARATION OF ALUMINA PHASES	7
3-1 Bauxite	7
3-2 Preparation of Bayer Alumina	7
3-3 Amorphous and Gel Aluminas	11
3-4 Preparation of the Alumina Trihydroxides	12
3-5 Preparation of the Alumina Monohydroxides	13
3-6 Transition Aluminas	14
3-7 Alpha Alumina	20
3-8 Beta and Zeta Aluminas	27
3-9 Suboxides and Gaseous Phases	27
4. STRUCTURE AND MINERALOGICAL PROPERTIES	29
4-1 Structure of the Alumina Phases	29
4-2 Pseudomorphosis	35
4-3 Surface Area of Alumina	35
4-4 Porosity	36
4-5 Sorptive Capacity	38
5. MECHANICAL PROPERTIES OF ALUMINA	43
5-1 General Considerations	43
5-2 Bending, Compressive, Tensile, and Torsional Strengths	47
5-3 Impact Strength	52
5-4 Moduli of Elasticity (E), and Rigidity (G)	52
5-5 Poisson's Ratio (μ)	54
5-6 Creep Characteristics	55
5-7 Thermal Shock	58

5-8 Internal Friction	59
5-9 Fatigue	60
5-10 Hardness and Abrasiveness of Alumina	60
6. THERMAL PROPERTIES	63
6-1 Thermophysical and Thermochemical Constants	63
6-2 Specific Heat	68
6-3 Thermal Expansion	68
6-4 Thermal Conductivity	70
6-5 Thermal Diffusivity	72
7. SONIC EFFECTS IN ALUMINA	73
7-1 Velocity of Sound in Alumina	73
7-2 Ultrasonics Absorption	73
8. ELECTRICAL PROPERTIES OF ALUMINA	75
8-1 Introduction	75
8-2 Electrical Conductivity of Alumina	75
8-3 Dielectric Constant and Loss Factor of Alumina	78
8-4 Dielectric Strength	83
9. MAGNETIC PROPERTIES OF ALUMINA	85
9-1 Magnetic Susceptibility	85
9-2 Magnetic Resonance of Alumina	86
10. OPTICAL PROPERTIES OF ALUMINA	89
10-1 Refractive Index of Alumina	89
10-2 Transmission, Emissivity, and Absorption of Alumina	91
10-3 Phosphorescence, Fluorescence, and Thermoluminescence	92
10-4 Optical Spectra of Alumina	93
10-5 Color in Alumina	95
10-6 Chromia-Alumina System, Laser Applications	96

11. RADIATION AND ALUMINA	99
12. CHEMICAL PROPERTIES OF ALUMINA	103
12-1 Wet Chemical Reactions of Sintered Alumina	103
12-2 Reaction of the Chemical Elements with Alumina	104
12-3 Slagging Effects	106
12-4	
13. COLLOIDAL PROPERTIES OF ALUMINA	111
13-1 Plasticity	111
13-2 Surface Charge and Zeta Potential of Alumina	111
13-3 Flocculation and Deflocculation Effects	112
13-4 Additives	114
14. GRINDING CERAMIC ALUMINA	117
15. FORMING ALUMINA CERAMICS	121
15-1 Cold Forming of Alumina	121
15-2 Hot-Pressing	125
15-3 Miscellaneous Forming Methods	126
16. SINTERING	127
16-1 Introduction	127
16-2 Sintering Atmosphere	130
16-3 Sintering Additives	131
17. ALUMINA IN REFRACTORIES	135
17-1 General	135
17-2 High-Alumina Refractories	135
17-3 Fused Cast Alumina Refractories	137
17-4 Clay-Bonded Alumina Refractories, Mullite Refractories	139
17-5 Spinel, Cordierite, Alumina-Chromite	141
17-6 Refractory Equipment	143

7	7 Refractories for Aluminum and Other Nonferrous Uses	145
	17-8 Lightweight Alumina Refractories	145
	17-9 Binders for Alumina Refractories	146
18.	ALUMINA AS AN ABRASIVE MATERIAL	149
	18-1 Introduction	149
	18-2 Loose Grain Abrasive	150
	18-3 Grinding Wheels	151
	18-4 Ceramic Tools	152
19.	ELECTRICAL APPLICATIONS	157
	19-1 Spark Plug Insulators	157
	19-2 Electron Tube Elements High-Frequency Insulation	158
	19-3 Alumina Porcelain Insulation	160
	19-4 Resistors and Semiconductors	160
20.	CEMENT	163
	20-1 Calcium Aluminate Cement	163
	20-2 Barium Aluminates	167
21.	ALUMINA INGLASS	169
	21-1 Introduction	169
	21-2 Bottle Glass	170
	21-3 Devitrified Glasses Containing Alumina	170
	21-4 Boron Glasses,	171
	21-5 Lithium Glasses, Phosphate Glasses	172
	21-6 Optical Glasses	172
22.	ALUMINA IN COATINGS	173
	22-1 Introduction	173
	22-2 Anodic Coatings on Aluminum	173
	22-3 Glazes and Enamels	174

2	4 Flame-Sprayed Coatings	175
	22-5 Printed, Cast, or Troweled Coatings	176
	22-6 Electrolytic Coatings	176
	22-7 Evaporated Coatings	176
	22-8 Dip Coatings, Cementation Coatings	176
	22-9 Coatings on Alumina and Other Ceramic Bases	176
	22-10 Alumina Coatings for Electrical Insulation	177
	22-11 Alumina Coatings by Sputtering	178
23.	ALUMINA IN CERMETS AND POWDER METALLURGY	179
	23-1 Introduction	179
	23-2 Chromium-Alumina Cements	179
	23-3 (Iron, Nickel, Cobalt)—Alumina Cements	180
	23-4 Aluminum-Alumina Alloys	181
	23-5 Miscellaneous Cermets	183
24.	ALUMINA IN AIRBORNE CERAMICS	185
	24-1 Introduction	185
	24-2 Gas-Turbine Accessories	185
	24-3 Radomes and Rocket Equipment	186
25.	SEALS, METALLIZING, WELDING	189
26.	FIBERS, WHISKERS, FILAMENTS	193
	26-1 Introduction	193
	26-2 Alumina Fibers	193
	26-3 Glass Fibers	195
27.	MISCELLANEOUS CERAMIC APPLICATION OF ALUMINA	197
