

CONTENTS

PART 1: SOL-GEL SCIENCE: SILICA	1
1. The Nanostructure of Aerogels: Preparation, Investigations, Modifications, and Utilizations	3
2. A Sol-Gel Route to Very High Porosity Silica Aerogels	19
3. Macropore Morphology Control of Silica Gel by Spinodal Decomposition	29
4. Kinetics and Equilibrium of Acid-catalyzed Tetraethoxysilane Hydrolysis	43
5. Rheological Investigation of the Sol-to-Gel Transition in Acid-Base Systems	51
6. Silicon-29 Nuclear Magnetic Resonance Study of Sol-Gel Transformation in First Steps and after Gel Time	59
7. Structural Analysis of Silica Gels during Densification Using Raman Spectroscopy	69
8. Ultrastructural Models	77
9. Nuclear Magnetic Resonance Studies of the Sol-Gel Process	93
10. Adsorption and Diffusion of Small Molecules in Porous Sol-Gel Glass	103
11. Restricted Diffusion of Chromium Ions within Stabilized Sol-Gel Silica Glasses	115
12. Electron Paramagnetic Resonance of Nitroxide Spin Probe Solutions: An Emerging Technique for Studying Porous Materials	123
13. Structural Studies of Gel Phases (3): A Near-Infrared Spectroscopic Study of Silica and Silica-Titania Gel Glasses	131
14. Characterization of Silicon Sesquioxide and Thermal Behavior of Hydrosilsesquioxane Gels	143
15. Raman Spectroscopy and Molecular Orbital Studies of the Stability of Trisiloxane Rings to Water	159
PART 2: SOL-GEL SCIENCE: VARIOUS OXIDE AND MULTICOMPONENT SYSTEMS	173
16. Preparation and Characterization of Gels of SiO ₂ -Al ₂ O ₃ Composition	175
17. Preparation and Characterization of Sn-Si-O Gels	187
18. Solid-State ²⁹ Si and ⁷ Li Nuclear Magnetic Resonance Spectroscopic Studies of Lithium Aluminosilicate Gels	197
19. Aluminum Oxoalkoxide: A Novel Aluminum Cluster Compound, (AlOBu) ₂ [Al(OBu) ₂] ₂ (μ ₂ -OBu) ₅ (μ ₄ -O)	207
20. Raman Spectroscopy of Phosphorus-dope Silica Gels	215
21. Inorganic Polymerization in Aqueous Solutions	223
22. Heterometallic Acetatoalkoxides Based on Niobium as Precursors to Multicomponent Oxides	239
23. Peptization of Hydrous Titania	247
24. Oxygen-17 Nuclear Magnetic Resonance Spectroscopic Study of Titania Sol-Gel Polymerization	257

25. Tailoring of Cerium (IV) Oxide Precursors through Modification of Cerium (IV) Isopropoxide with β -Diketones	267
26. Tailoring Metal Alkoxides Using Functional Alcohols: Some Examples in Yttrium and Main-Group Chemistry (Bismuth, Barium)	277
27. Preparation, Characterization, and Gelation Kinetics of Alkoxide-derived Gadolinium Oxide	285
PART 3: SOL-GEL APPLICATIONS	295
28. Molecular-Chemical Approach to High-Tc Superconductors	297
29. A Superfine Ceramics Technology Directed toward New High-Tc Superconductors	315
30. New Group 2 Organometallic Precursors to Metal Oxides	327
31. Ultrastructure of Gels Made from Nitrates in the System (Bi,Pb)-Sr-Ca-Cu-O	333
32. Optical and Thermal Properties of Silica Aerogels	341
33. Inorganic Aerogels by Sol-Gel Processing	349
34. Silica Aerogels by Sol-Gel Processing	355
PART 4: THIN FILMS AND COATINGS	363
35. Ultrastructure Processing of Thin Crystalline Films	365
36. Size Effects in Ferroelectric Thin Films	379
37. Sol-Gel Thin-Film Formation	395
38. Characterization of Alkoxide Carboxylates: From Precursor to Cast Film	415
39. Stabilization and Characterization of Niobium and Tantalum Oxide Sols Prepared Via Alkoxide Routes: Optical Applications for High-Power Lasers	423
40. Importance of Sol-Gels to Modern Large Telescopes	431
41. Preparation of Interference Filters Using Low-Temperature Sol-Gel Processing	437
42. Localized Laser Annealing of PT/PZT Films Based on Metallo-Organics in Aqueous Micellar Solutions	449
43. Sol-Gel-derived Coatings for Electrical and Optical Applications	457
44. Sol-Gel Processing of Passive Components for Integrated Optics	467
45. Wet Chemical Synthesis of Optical Films	483
PART 5: MICROMORPHOLOGY SCIENCE	497
46. Molecular Precursors for the Chemical Processing of Advanced Electrical Ceramics	499
47. Control of Powder Morphology	513
48. Synthesis of Ceramic Ultrastructures Utilizing Biologic Processes	529
49. Synthetic and Biological Nanocomposites	543
50. Processing of Composite Powders: Fabrication of Ceramics and Composites by Viscous Sintering and Transient Viscous Sintering	557
51. Preparation of Zircon and Mullite-Zircon Powders by Sol-Gel Techniques	577
52. Organic Gels in the Preparation of Silicate Powders: Examples of Mullite and Cordierite	585

53. Synthesis of AlN Powder from Alumina Gel Containing Residual Organic Matter Entrapped by Sol-Gel Method	595
54. X-Ray Photoelectron Spectroscopy Investigation of Hydrothermal and Commercial Barium Titanate Powders	603
55. Liquid Precursors for Ceramics: Kinetically Limited Crystallization, Spherical Particles, Fibers, and Thin Films	611
56. Effects of Structure and Surface Area on Bioactive Powders Made by Sol-Gel Process	627
PART 6: ULTRASTRUCTURAL POLYMERS	635
57. Multifunctional Polymers	637
58. Developments in the Synthesis of Polyarylene Vinylenes	647
59. Chemicals, Polymers, and Ceramics from the Beach (Silica)	663
60. Organic Aerogels: A New type of Ultrastructured Polymer	671
61. High-Compressive-Strength Articulated PBZT Fibers	685
PART 7: CHEMICALLY PROCESSED FIBERS AND COMPOSITES	697
62. Material Synthesis at the Boundary between Polymer Chemistry and Ceramic Science	699
63. Microwave Syntheses of Materials and Their Precursors	717
64. Processing and Optical Properties of Inorganic-Organic Composites	727
65. Polyaniline-Ormosil Nanocomposites	737
66. Siloxane-Silica Composites Prepared by Sol-Gel Technique with Hydrolysis Water Generated In Situ	745
67. Ceramic Composites from Organometallic Precursors	753
68. Nanocrystalline Silicon Carbide Fibers Derived from Organosilicon Polymers	767
69. Silicon Carbide-Aluminum Nitride Solid Solutions by Pyrolysis of Organometallics	777
70. Preparation of SiC-Cordierite Composites	791
71. Low-Temperature Glass-Polymer Blends	799
72. Novel Ti-PTMO and Zr-PTMO Hybrid Ceramer Materials By Sol-Gel Processing	807
73. Thermal Properties of PMMA-impregnated Silica Gels	815
PART 8: ADVANCED OPTICAL MATERIALS	823
74. A New Class of Sol-Gel Processed Inorganic Oxide: Organic Polymer Composites for Nonlinear Optics and Photonics	825
75. Nonlinear Optical Behavior of Glass and Quantum Clusters in Glass	837
76. Nanomodulated Ceramic Superlattices by Electrodeposition	855
77. Graded Refractive Index Materials Via Sol-Gel Processing	863
78. Sol-Gel Processing of Net Shape and Multifunctional Optics	875
79. Characterization of Type VI Porous Gelsil	891
80. Gas Permeability in Porous Gel Silica	897
81. New Concepts in Optical Imagery	907

82. Laser Methods of Control of Porous Silica Glass Structure	919
83. Fabrication of Microlenses by Laser Densification on Gel Silica Glass	933
84. Spectroscopy and Laser Behavior of Rhodamine-doped ORMOSILs	941
85. Lasing Characteristics of a Porous Gel Silica Matrix with 4PyPO-MePTS Laser Dye	953
86. Absorption Recovery of Malachite Green Doped Xerogel	965
87. Synthesis of Neodymium-Aluminum Doped Silica Xerogels	973
88. Synthesis and Characterization of a Five-Component Amorphous Hydrous Oxide ZBLAN Gel for Fluoride Glasses	981
89. Aerogel Composites for Radioluminescent Light/power Sources	989
90. Lasers and Ultrastructure Processing	997
PART 9: FUTURE DIRECTIONS	1021
91. Solution-Sol-Gel Technology and Science: Past, Present and Future	1023
Author Index	1034
Subject Index	1037
