

## TABLE OF CONTENTS

	<i>Page</i>		<i>Page</i>		
<b>1</b>	INTRODUCTION . . . . .	1	3-9 Suboxides and Gaseous Phases . . . . .	27	
<b>2</b>	NOMENCLATURE . . . . .	3	<b>4</b>	<b>STRUCTURE AND MINERALOGICAL PROPERTIES . . . . .</b>	29
<b>3</b>	PREPARATION OF ALUMINA PHASES . . . . .	7	4-1	Structure of the Alumina Phases . . . . .	29
3-1	Bauxite . . . . .	7	4-2	Pseudomorphosis . . . . .	35
3-2	Preparation of Bayer Alumina . . . . .	7	4-3	Surface Area of Alumina . . . . .	35
3-2-1	Wet Alkaline Processes . . . . .	8	4-4	Porosity . . . . .	36
3-2-2	Wet Acid Processes . . . . .	9	4-5	Sorptive Capacity . . . . .	38
3-2-3	Furnace Processes . . . . .	10	<b>5</b>	<b>MECHANICAL PROPERTIES OF ALUMINA . . . . .</b>	43
3-2-4	Carbothermic Processes . . . . .	10	5-1	General Considerations . . . . .	43
<b>3-2-5</b>	<b>Electrolytic Processes . . . . .</b>	<b>10</b>	5-2	Bending, Compressive, Tensile, and Torsional Strengths . . . . .	47
3-3	Amorphous and Gel Aluminas . . . . .	11	5-3	Impact Strength . . . . .	52
3-4	Preparation of the Alumina Trihydroxides . . . . .	12	5-4	Moduli of Elasticity (E), and Rigidity (G) . . . . .	52
3 4 1	Gibbsite . . . . .	12	5-5	Poisson's Ratio ( $\mu$ ) . . . . .	54
3 4 2	Bayerite . . . . .	12	5 4	Creep Characteristics . . . . .	55
<b>3-4-3</b>	<b>Nordstrandite, Bayerite II, Randomite . . . . .</b>	<b>13</b>	5-7	<b>Thermal Shock . . . . .</b>	58
3-5	Preparation of the Alumina Monohydroxides . . . . .	13	5-8	Internal Friction . . . . .	59
3-5-1	Boehmite . . . . .	<b>13</b>	5-9	Fatigue . . . . .	60
3-5-2	Diaspore . . . . .	14	5-10	Hardness and Abrasiveness of Alumina . . . . .	60
3-6	Transition <b>Aluminas</b> . . . . .	14	<b>6</b>	<b>THERMAL PROPERTIES . . . . .</b>	63
3	Dehydration Mechanism . . . . .	14	6-1	<b>Thermophysical and Thermochemical Constants . . . . .</b>	63
<b>3-6-2</b>	<b>Sequence of Transition . . . . .</b>	<b>17</b>	6-2	Specific Heat . . . . .	68
<b>3-6-3</b>	<b>Phases Formed on Aluminum . . . . .</b>	<b>19</b>	6-3	Thermal Expansion . . . . .	68
34-4	Rehydration . . . . .	20	6-4	Thermal Conductivity . . . . .	70
3-7	Alpha Alumina . . . . .	20	6-5	Thermal Diffusivity . . . . .	72
3-7-1	Preparation . . . . .	<b>20</b>	<b>7</b>	<b>SONIC EFFECTS IN ALUMINA . . . . .</b>	73
3-7-2	Factors Affecting Alumina . . . . .	<b>23</b>	7-1	Velocity of Sound in Alumina . . . . .	73
3-7-3	Special Ceramic <b>Aluminas</b> . . . . .	24	7-2	Ultrasonic Absorption . . . . .	73
3-8	Beta and Zeta <b>Aluminas</b> . . . . .	27	<b>8</b>	<b>ELECTRICAL PROPERTIES OF ALUMINA . . . . .</b>	75
			8-1	Introduction . . . . .	75
			8-2	Electrical Conductivity of Alumina . . . . .	75

TABLE OF CONTENTS—Continued

	<i>Page</i>		<i>Page</i>
8-3 Dielectric Constant and Loss Factor of Alumina . . . . .	78	16 SINTERING . . . . .	127
8-4 Dielectric Strength . . . . .	83	16-1 Introduction . . . . .	127
9 MAGNETIC PROPERTIES OF ALUMINA . . . . .	85	16-2 Sintering Atmosphere . . . . .	130
9-1 Magnetic Susceptibility . . . . .	85	16-3 Sintering Additives . . . . .	131
9-2 Magnetic Resonance of Alumina . . . . .	86	17 ALUMINA IN REFRACTORIES . . . . .	135
10 OPTICAL PROPERTIES OF ALUMINA . . . . .	89	17-1 General . . . . .	135
10-1 Refractive Index of Alumina . . . . .	89	17-2 High-Alumina Refractories . . . . .	135
10-2 Transmission, Emissivity, and Absorption of Alumina . . . . .	91	17-3 Fused Cast Alumina Refractories . . . . .	137
10-3 Phosphorescence, Fluorescence, and Thermoluminescence . . . . .	92	17-4 Clay-Bonded Alumina Refractories, Mullite Refractories . . . . .	139
10-4 Optical Spectra of Alumina . . . . .	93	17-5 Spinel, Cordierite, Alumina-Chromite . . . . .	141
10-5 Color in Alumina . . . . .	95	17-6 Refractory Equipment . . . . .	143
10-6 Chromia-Alumina System, Laser Applications . . . . .	96	17-7 Refractories for Aluminum and Other Nonferrous Uses . . . . .	145
11 RADIATION AND ALUMINA . . . . .	99	17-8 Lightweight Alumina Refractories . . . . .	145
12 CHEMICAL PROPERTIES OF ALUMINA . . . . .	103	17-9 Binders for Alumina Refractories . . . . .	146
12-1 Wet Chemical Reactions of Sintered Alumina . . . . .	103	18 ALUMINA AS AN ABRASIVE MATERIAL . . . . .	149
12-2 Reaction of the Chemical Elements with Alumina . . . . .	104	18-1 Introduction . . . . .	149
12-3 Slagging Effects . . . . .	106	18-2 Loose Grain Abrasive . . . . .	150
12-3-1 Ash Slags . . . . .	106	18-3 Grinding Wheels . . . . .	151
12-3-2 Slags Containing Sulfates . . . . .	107	18-4 Ceramic Tools . . . . .	152
12-3-3 Steel Furnace Slags . . . . .	107	19 ELECTRICAL APPLICATIONS . . . . .	157
12-3-4 Glass Furnace Reactions . . . . .	108	19-1 Spark Plug Insulators . . . . .	157
12-3-5 Calcium Aluminate Slags . . . . .	109	19-2 Electron Tube Elements, High-Frequency Insulation . . . . .	158
12-3-6 Aluminum Slag Reactions . . . . .	110	19-3 Alumina Porcelain Insulation . . . . .	160
12-3-7 Miscellaneous Reactions . . . . .	110	19-4 Resistors and Semiconductors . . . . .	160
13 COLLOIDAL PROPERTIES OF ALUMINA . . . . .	111	20 CEMENT . . . . .	163
13-1 Plasticity . . . . .	111	20-1 Calcium Aluminate Cement . . . . .	163
13-2 Surface Charge and Zeta Potential of Alumina . . . . .	111	20-2 Barium Aluminates . . . . .	167
13-3 Flocculation and Deflocculation Effects . . . . .	112	21 ALUMINA IN GLASS . . . . .	169
13-4 Additives . . . . .	114	21-1 Introduction . . . . .	169
14 GRINDING CERAMIC ALUMINA . . . . .	117	21-2 Bottle Glass . . . . .	170
15 FORMING ALUMINA CERAMICS . . . . .	121	21-3 Devitrified Glasses Containing Alumina . . . . .	170
15-1 Cold Forming of Alumina . . . . .	121	21-4 Boron Glasses . . . . .	171
15-2 Hot-Pressing . . . . .	125	21-5 Lithium Glasses, Phosphate Glasses . . . . .	172
15-3 Miscellaneous Forming Methods . . . . .	126	21-6 Optical Glasses . . . . .	172
		22 ALUMINA IN COATINGS . . . . .	173
		22-1 Introduction . . . . .	173
		22-2 Anodic Coatings on Aluminum . . . . .	173
		22-3 Glazes and Enamels . . . . .	174
		22-4 Flame-Sprayed Coatings . . . . .	175
