Preface	ix
SINTERING	
Unveiling Spark Plasma Sintering High-Throughput Processing Robert Aalund	3
Effect of β -Phase Percentage on the Sinterability of SHS Si_3N_4 Powder Yong Jiang, Laner Wu, Youjun Lu, and Zhenkun Huang	11
MICROWAVE PROCESSING	
Microwave Synthesis of Cobalt-Ferrite Nano-Particles by Polyol Method Amal M. Ibrahim, Morsi M. Mahmoud, and M. M. Abd El-Latif	19
Investigation of Selective Microwave Heating by Use of Raman Spectroscopy G. Link, M. Thumm, W. Faubel, St. Heissler, and P.G. Weidler	27
COMPOSITES	
Simulation of Manufacturing Process of Ceramic Matrix Composites Jeffrey S. Crompton, Kyle C. Koppenhoefer, and Sergei P. Yushanov	37
Novel Nontraditional High Alumina Ceramic Composite Evelyn M. DeLiso and Karl-Heinz Schofalvi	47
Production of Ceramic Composite Materials of Aluminum-Silicon Dioxide-Dolomite System Using SHS Process B. B. Khina, K. B. Podbolotov, A. A. Zgurskaya, and A. T. Volochko	57

ULTRA-HIGH TEMPERATURE CERAMIC (UHTC) COMPOSITES

- Fabrication of Carbon Fiber Reinforced Ultrahigh Temperature Ceramics (UHTCs) Matrix Composite 69
Zhen Wang, Shaoming Dong, Le Gao, Xiangyu Zhang, Yusheng Ding, and Ping He
- Effect of Particulate Volume Fraction on Mechanical Properties of Pressureless Sintered ZrB_2 -SiC Ultra-High Temperature Ceramic Composites 77
Manab Mallik, Rahul Miṭra, and Kalyan Kumar Ray

NANOMATERIALS

- Exploring New Routes for the Development of Functional Nanomaterials Using Extreme Pressure 91
K. Lipinska, P. Kalita, O. Hemmers, S. Sinogeikin, G. Mariotto, C. Segre, and Y. Ohki
- In Situ Formation of Carbon Nanostructures in High-Temperature Ceramic-Carbon Nanocomposites 97
Rafael Guimarães de Sá and William Edward Lee
- Effect of Nano-SiC Addition on the Properties of Si_3N_4 (SHS)/SiC (Nano) Composites 109
Yong Jiang, Laner Wu, Qingxiang Qin, and Zhengkun Huang

GLASS AND CERAMICS

- Synthesis and Characterization of Iron-Sodium-Calcium-Phosphate Glasses and Glass Fibers 119
Ena A. Aguilar-Reyes, Carlos A. León-Patiño, Christian O. Ruiz-Cedeño, Showan N. Nazhat, and Robin A.L. Drew
- Activation of SHS Process in Al-SiO₂-C System Using Metallic Powder Activating Reactants 131
K. B. Podbolotov
- New Porosity Inducing Material for Refractory Bricks 137
A.Y. Badmos and S.A. Abdulkareem
- Combined Supercritical Extraction and Thermal Decomposition of Binder from Green Ceramic Bodies 149
Brandon Abeln and Stephen J. Lombardo
- Research on Firing Distortion Prediction and Correction Techniques for Ceramics Design 159
Kiyoshi Soejima and Kiyoshi Tomimatsu

JOINING

- Joining and Integration Issues of Ceramic Matrix Composites for Nuclear Applications 173
M. Ferraris, M. Salvo, V. Casalegno, S. Rizzo, and A. Ventrella

MECHANICAL PROPERTIES

- Mechanical Properties of Hot-Pressed B₄C-SiC Composites 189
Xiao-Lei Shi, Fu-Min Xu, Yi Tan, and Lai Wang
- Mechanical Property of Boron Carbide Ceramics Prepared by Spark Plasma Reactive Sintering 197
S. Zhang, C. B. Wang, G. Chen, Q. Shen, L. M. Zhang
- Tensile and Compressive Properties of 2D Pitch-Based and 3D Pan-Based C/C Composites in Relation to Fiber Orientation Distribution and Microstructure 205
Sardar S. Iqbal and Peter Filip

FOREIGN OBJECT DAMAGE

- Foreign Object Damage in Ceramic Matrix Composites and Monolithic Silicon Nitrides 221
Sung R. Choi
- Static-Contact and Foreign-Object Damages in an Oxide/Oxide (N720/ALUMINA) Ceramic Matrix Composite: Comparison with AN720/Aluminosilicate 243
David C. Faucett, Donald J. Alexander, and Sung R. Choi

CHARACTERIZATION

- Nanoscale Characterization of Polymer Precursor Derived Silicon Carbide with Atomic Force Microscopy and Nanoindentation 257
Arif Rahman, Suraj C. Zunjarrao, and Raman P. Singh
- Measurement of Thermal Conductivity of Basic Refractories with Straight Brick Specimens by Hot Wire Method 269
Yoshitoshi Saito, Kinji Kanematsu, and Taijiro Matsui
- Preparing and Characterizing Natural Hydroxyapatite Ceramics 281
Han Fenglan and Wu Laner
- Intermediate Temperature Oxidation: Review and Test Method Refinement 287
K. Sinnamon, G. Ojard, B. Flandermeyer, and R. Miller

Structural and Thermal Study of Al_2O_3 Produced by Oxidation of Al-Powders Mixed with Corn Starch Juliana Anggono, Soejono Tjitro, Hans H. Magawe, and Gunawan Wibisono	299
Author Index	311
