Preface	xi
Acknowledgements	xv

Chapter A Physical Aspects of Cleaning Processes

WOLFGANG VON RYBINSKI

1. Introduction	1
2. Components in cleaning processes	3
3. Interfacial effects for the cleaning of particulate and oily soil	5
4. Bulk properties of the cleaning solution	32
5. Dispersed systems in cleaning	49
References	53

Chapter B.1.I Laundry Cleaning of Textiles

JAMES BURCKETT ST. LAURENT, FRANCESCO DE
BUZZACCARINI, KAREN DE CLERCK, HUGO DEMEYERE,
REGINE LABEQUE, RAINER LODEWICK AND
LIEVA VAN LANGENHOVE

1. Introduction	57
2. Textiles	58
3. Soil	62
4. Product forms	66
5. Ingredients and cleaning mechanisms	72
6. Test methods	93
7. Future trends	98
Acknowledgements	99
References	100

Chapter B.1.II Formulation of Carpet Cleaners

JESSE J. WILLIAMS

1. Introduction	103
2. Carpet soil and soiling	104
3. Carpet fibers and carpet construction	105
4. Carpet cleaning methods	107
5. Formulation technology for carpet cleaning agents	108
6. Applications	119
References	123

Chapter B.2.I Dish and Household Cleaning

GREGORY SZEWCZYK AND KAREN WISNIEWSKI

1. Introduction	125
2. Household cleaners	131
3. Hand dishwashing products	175
4. Conclusion	188
References	189

Chapter B.2.II A Review of Key Ingredients Used in Past and Present Auto-Dishwashing Formulations and the Physico-Chemical Processes They Facilitate

ALAN TOMLINSON AND JOSEPH CARNALI

1. Introduction	197
2. Evolution of the field	199
3. Hand dishwashing vs machine dishwashing	201
4. Components	202
5. Additives	234
6. Market progressions	239
7. Ingredients and functionalities of mainwash products; overview	244
8. Summary/future	246
9. Where to next?	247
References	248

Chapter C.1 Personal Cleansing

KUMAR SUBRAMANYAN AND
K.P. ANANTHAPADMANABHAN

1. Introduction	257
2. Anatomy of a skin cleanser	259
3. Commonly used surfactants in cleansing	260
4. Other elements of a skin cleanser	262
5. Effects of cleansing on skin structure and function	263
6. Effect of surfactants on SC	263
7. Technology of mild cleansing	269
8. Minimizing surfactant protein damage	269
9. Minimizing surfactant lipid damage	271
10. Compensating for damage: enhancing moisturization	273
11. Summary	275
References	275

Chapter C.2 Shampoo Formulation

KEN KLEIN AND IRWIN PALEFSKY

1. Anionic surfactants	278
2. Amphoteric surfactants	283
3. Pseudoamphoteric surfactants	284
4. Nonionics	285
5. Cationic materials and “other” conditioning agents	286
6. Thickening shampoos	287
7. Shampoo additives	292
8. Other additives	295
9. Fragrance and color	297
10. Shampoo evaluation	297
11. Shampoo formulations	301

**Chapter C.3 Surfactant Action on Skin and Hair:
Cleansing and Skin Reactivity Mechanisms**

L. RHEIN

1. Introduction	305
2. Surfactants in cleansing systems for skin and hair	305
3. Cleaning mechanisms	314

4. Efficacy of soil removal by cleansers	322
5. Interactions of surfactants with skin – understanding and controlling irritation	339
References	363

Chapter C.4 The Cleaning of Teeth

ANDREW JOINER

1. Introduction	371
2. The human dentition and its environment	372
3. Oral accumulations	374
4. Oral care products	380
5. Evaluation of oral care products	384
6. Cleaning agents in oral care products	390
References	399

Chapter D.1 Dry Cleaning of Textiles

KASPAR D. HASENCLEVER

1. Dry cleaning – definition	407
2. Dry cleaning – history	407
3. Dry cleaning – characteristics	409
4. Dry cleaning – solvents	410
5. Dry cleaning – detergents	414
6. Dry cleaning – machines	416
7. Dry cleaning – process technology	419
8. Spotting	422
9. Finishing	424
References	425

Chapter D.2 Wet Cleaning of Textiles

KASPAR D. HASENCLEVER

1. What is wet cleaning?	427
2. What can wet cleaning achieve?	432
3. What advantages do wet cleaning offer?	435

Chapter E.1 Vehicle Cleaning

MAHNAZ COMPANY AND DAVID R. KARSA

1. Introduction	439
2. Exterior cleaners for domestic vehicles	440

3. Interior cleaners	451
4. Commercial vehicles	455
References	458
Further reading	458

Chapter E.2.I Back-End-of-Line Cleaning

S. RAGHAVAN, R. SMALL AND V. LOWALEKAR

1. Introduction	459
2. Old and new generation stripper formulations	463
3. All-aqueous chemistries for removal of etch residues	473
4. Post-CMP cleaning solutions	477
5. Corrosion issues	478
6. Summary	482
References	482

Chapter E.2.II Cleaning of Trace Metallic Impurities from Solid Substrates Using Liquid Media

STEVEN VERHAVERBEKE

1. Introduction	485
2. Adsorption forces – types of solid surfaces – surface termination – removal mechanisms	488
3. State of the metallic and ionic contaminants in liquid solutions	493
4. Chemisorption/desorption in liquids of metallic contaminants on inorganic dielectric surfaces	500
5. Chemisorption/desorption of metallic contaminants on bare semiconducting and conducting surfaces	519
6. Chemisorption/desorption of metallic contaminants on thin oxide surfaces	534
7. Conclusions	535
References	535

Chapter E.2.III Elevated Pressure CO₂-Based Fluids Containing Polar Co-Solvents for Cleaning in Microelectronic Device Fabrication

GALIT LEVITIN AND DENNIS W. HESS

1. Introduction	539
---------------------------	-----

2. Conclusions	565
References	565

Chapter F.1 Chemical Disinfection of Hard Surfaces – Household, Industrial and Institutional Settings

EDWARD FU, KAREN McCUE AND DIANE BOESENBERG

1. Introduction	573
2. Historical background	573
3. Role of disinfectants in infection control	576
4. Regulation of disinfectants	581
5. Chemical disinfectants	582
6. Summary	590
References	590

Chapter F.2 Biocides

DAVID R. KARSA

1. The biocides market and regulatory environment	593
2. Hygiene applications of biocides	594
3. Classification of biocides	595
4. Conclusions	622
References	623
Further reading	623

Contents

Preface	ix
Acknowledgements	xiii

Chapter 1 Understanding the Environmental Safety of Surfactants: A Historical Perspective

MARK STALMANS, DARIUS SABALIUNAS AND
SCOTT BELANGER

1. Introduction	626
2. Main categories of surfactants	628
3. Concerns over environmental safety of surfactants	629
4. Understanding the environmental properties and safety of surfactants	633
5. Development of chemical analytical methods for surfactants	633
6. Environmental safety of surfactants: landmark cases	641
7. Conclusions	649
8. Acronyms	650
References	651

Chapter 2.1 Ultimate Biodegradation of Ingredients Used in Cleaning Agents

C.G. VAN GINKEL

1. Introduction	655
2. Biodegradability tests	657
3. Surfactants	660
4. Water-soluble polymers	682
5. Chelating agents	683
References	689

Chapter 2.2 Life Cycle Assessment

JOHAN WIDHEDEN AND EMMA RINGSTRÖM

1. Introduction to life cycle assessment	695
2. LCA within a chemical company	705
3. LCA of cleaning products	706
4. Benefits from using LCA	715
5. LCA in relation to other tools	716
6. Further reading	718
7. Explanations	718
References	719

Chapter 3 The Ecotoxicity of Cleaning Product Ingredients

JOSEF STEBER

1. Basic aspects of the environmental safety assessment of chemical substances	721
2. Assessment of environmental effects	722
3. Ecotoxicological characterization of cleaning product ingredients	729
References	745

Chapter 4 Surface Analytical Techniques Applied to Cleaning Processes

MARIE ERNSTSSON AND TORBJÖRN WÄRNHEIM

1. Introduction	747
2. Surface analytical techniques	751
3. One example illustrating some useful combinations of surface analysis techniques – automotive coatings analysed by XPS, ToF-SIMS, FT-IR (ATR), SEM and EDX	780
4. Conclusions	781
Acknowledgements	784
References	784

Chapter 5 Self-Cleaning Surfaces Using the Lotus Effect

FELIX MÜLLER, WERNER MICHEL, VOLKER SCHLICHT,
ANDREA TIETZE AND PATRICK WINTER

1. Introduction	791
2. Applications of the lotus effect	793
3. Conclusion	809
References	810

Chapter 6 Anti-Bacteriological Effect of Nanoscaled Inorganic Particles in Coating Matrices

CHRISTIAN GÖBBERT

1. Introduction	813
2. Biocide coatings using nanoscaled silver-coated TiO ₂ particles	816
3. Production of nanopowder	816
4. Inhibition mechanism of the biocide nanoparticles	818
5. Microbiological testing	820
6. Conclusion	827
References	829

Chapter 7 Application of Microemulsions in Cleaning Technologies and Environmental Remediation

EDGAR J. ACOSTA, JEFFREY H. HARWELL,
JOHN F. SCAMEHORN AND DAVID A. SABATINI

1. Introduction	831
2. Microemulsion fundamentals	832
3. Application of microemulsions in cleaning technologies	846
4. Applications of microemulsions in environmental remediation	864
5. Summary and outlook	875
References	876

Chapter 8 New Techniques for Optimization of Particulate Cleaning

PER M. CLAESSON, ALBERT VAN DER WAL AND
ANDREW FOGDEN

1. Introduction	885
2. Experimental methods and results	887
3. Summary	923
Acknowledgement	924
References	924
Index	929

See Color Plate Section at the back of this volume
