

## CONTENTS

<i>List of Contributors</i> . . . . .	vii
<i>Preface</i> . . . . .	ix
<i>Contents of Other Volumes</i> . . . . .	xi
<i>List of Abbreviations</i> . . . . .	xv

**I. Sulfur Dyes***D. G. Orton*

I. Introduction . . . . .	1
II. Intermediates . . . . .	2
III. The Chemistry of Thionation . . . . .	3
IV. New Sulfur Dyes Made by Thionation . . . . .	6
V. Sulfur Dyes of Known Constitution . . . . .	16
VI. Manufacture . . . . .	24
VII. Application . . . . .	26
VIII. Analysis of Sulfur Dyes . . . . .	33

**II. Bunte Salt Dyes***C. D. Weston*

I. Introduction . . . . .	35
II. Chemistry of Bunte Salts: $RSSO_3Na$ , $ArSSO_3Na$ . . . . .	36
III. Dye Synthesis . . . . .	42
IV. Properties and Dyeing Processes . . . . .	56

**III. Physical Chemistry of Dyeing: State of Dye in Dyebath and in Substrate***E. H. Daravalla*

I. General Introduction . . . . .	69
II. State of Dye in the Dyebath . . . . .	70
III. State of Dye in Substrate . . . . .	97

**IV. Physical Chemistry of Dyeing: Kinetics, Equilibrium, Dye-Fiber Affinity, and Mechanisms***S. R. Sivaraja Iyer*

I. Kinetics of Dyeing . . . . .	115
II. Equilibrium Dyeing Processes, Dye-Fiber Affinity, and Mechanisms of Dyeing . . . . .	191

## V. Applications of Synthetic Dyes to Biological Problems

*E. Gurr, Nitya Anand, M. K. Unni, and N. R. Ayyangar*

I. Introduction . . . . .	278
II. Biological Stains . . . . .	280
III. Enzyme Activity and Histochemistry . . . . .	305
IV. Chemical Modification of Proteins . . . . .	315
V. Dye-Binding by Nucleic Acids and Nucleoproteins . . . . .	336
VI. Dyes as Antibacterial and Therapeutic Agents . . . . .	347
<i>Author Index</i> . . . . .	353
<i>Subject Index</i> . . . . .	368
