

CONTENTS

	Page
Chapter 1	
The Choice of Raw Materials for Plant Construction	
Chapter 2	
The Properties of Raw Materials for Plants	9
Chapter 3	
Storage of Raw Materials, Intermediates and Finished Products	82
Storage of Raw Materials and Intermediates	82
Storage of Finished Products	90
Chapter 4	
Heat Transfer	93
Coal and Coke Furnaces	94
Coke	96
Town Gas (Coal-Gas)	100
Producer-Gas	110
Fuel Oil	114
Immersion Heating	117
Electricity	119
Induction Heating	123
Flexible Electric Surface Heating	125
Fluid Heat Transmission	126
Vapour Phase Condensation	133
Radiant Heating	139
Heat Exchange	140
Tubular Heat Exchangers	141
Double Pipe Exchangers	145
U-Tube Exchangers	146
Miscellaneous Heating Tubes and Coils	147
Chapter 5	
Transportation of Fluids	149
Gas Equipment	149
Turbo Blowers	150
Positive Blowers	151
Reciprocating Compressors	151
Liquid Equipment	152
Centrifugal Pumps	152
Rotary Pumps	157
Reciprocating Pumps	159
Compresses Air Devices, Ejectors and Special Types	160
Chapter 6	
Valves and Cocks	161
Plug Cocks	162
Diaphragm Valves	164
Globe Valves	164
Gate Valves	164
Other Valves	165

	Chapter 7	
	Vapour Condensation	166
Types of Condensers		168
Surface Condensers		168
Contact Condensers		184
Scrubbers, Washers, and Absorption Towers		187
Vapour Removal by Combustion		191
Electrical Precipitation		193
Sublimation Plant		193
Removal of Copal Fumes		194
Removal of Oil Fumes		211
Removal of Condensate from Dehydrated Castor Oil Production		213
Removal of Fumes from Alkyd Resin Manufacture		215
Phthalic Anhydride Dry Condensation Unit		216
Phthalic Anhydride Wet Condensation Unit		221
Removal of Fumes from Production of Phenolic Varnishes		221
Vapours from the Production of Bituminous Finishes		222
Vapours from the Production of Fused Driers		223
Condensers for Processes Involving High Temperature Esterification with Glycerol		224
Condensation of Fumes Evolved in Aldehyde Resin manufacture		225
Condensation of Vapours from Thinning Vessels		225
Condensation of Recovered Solvent		227
	Chapter 8	
	Mixing	228
Methods of Mixing		229
Manual Stirrers		229
Mechanical Stirrers		231
Rotating Churns		245
“Steele-Shaw” High Speed Mixer		245
Colloid Mills		246
Air Streams		246
Steam Jets		247
Ball and Tube Mills		247
Thinning of Varnishes or Resins		248
The Incorporation of Liquid Driers		254
The Mixing of Varnishes		255
Mixing of Treated Oils		255
Mixing of Thinners		255
Dispersion of Filter Aid and Decolorising Charcoal		256
Preparation of Emulsions		257
Dissolution of Metallic Salts in Water		257
The Preparation of cold cut Varnishes, Etc		258
Preparation of Hot Solutions		260
Preparation of Wax Solutions and Dispersions		262
Preparation of Very Viscous Products		263
	Chapter 9	
	Cleansing	265
Settling		266
Straining		267
Centrifuging		269
The High Speed Centrifuge		270
The Low-Speed Centrifuge		271
Special Centrifuges		272
The Applications of Centrifuges in the Varnish Factory		272
Filter Presses		276
Incorporation of Filter Aids		288
Types of Pump		291

Materials of Construction	292
Washing of Cloths and Papers	293
The Metafilter	294
Chapter 10	
The Manufacture of Treated Oils	296
Open Pot Stand Oils	296
Closed Pot Stand Oils	297
Hard Oil Stand Oils	302
Mixed Stand Oils	305
Boiled Oils	306
Blown Oil	306
Metals for Oil-Boiling Vessels	308
Chapter 11	
Manufacture of Dehydrated Castor Oil	309
Chapter 12	
The Manufacture of Driers and Other Metallic Soaps	314
The Precipitated Drying and Anti-Rot Salts	314
Fused Salts	314
Precipitated Salts	318
The Preparation of Precipitated Soaps in Solution	324
Salts with Resinous Properties	324
Chapter 13	
Manufacture of Copal and Rosin Esters	327
Disintegration of Starting Resin	329
Condensing Arrangements	329
Stirring Arrangements	330
Addition of Polyalcohol	331
Prevention of Discoloration as the Result of Oxidisation	332
Removal of Unreacted Polyalcohol	332
Discharging of the Ester	332
Choice of Metal for Reaction Vessel	333
Chapter 14	
The manufacture of Alkyd Resins	334
Choice of Metals for Construction	336
Stirrer	339
Removal of Unreacted Resin Constituents	340
The Administration of Inert Gas	341
Further Factors Influencing Plant Design	344
Other Processes of Alkyd Manufacture	350
General Layout of Alkyd Plant	350
Alkyd Manufacture by Azeotropic or Solvent Method	357
Continuous Method of Polycondensation	360
Chapter 15	
The Manufacture of Phenolic and Urea- Formaldehyde Resins	363
Chapter 16	
The Manufacture of Natural Copal Varnishes	371
Disintegration or Size Reduction of the Copal	371
Method of Heating	374
Stirring	375
Capacity of the Kettle	377
Condensation of Vapours	378
Addition of Drying Oil	378
Addition of Driers – Litharge, Etc	379

Addition of liquid Driers and Thinners	380
Temperature Measurement	380
Discharging	381
Access to the Inside of the Kettle	382
Flanged or Welded Bottoms	382
Choice of Metal	383
Special Accessories	384
Fire Risks	384
Special Plant Designs	384
Choice of Running Kettle	385
General Plant Arrangement	387

Chapter 17

The Manufacture of Black Varnishes 390

Charging the Vessel with Bitumen	392
Heating and Sweating	393
Addition of Resin	393
Addition of Oil	393
Addition of Driers	394
Cooling and Thinning	394
Cleansing	394
Storage	395
Oil-Free Black Varnishes	395
Special Equipment	395

Chapter 18

The Manufacture of Spirit Varnishes 396

Spirit Manila Varnishes	396
Shellac Varnishes	398
Accroides Varnishes	400
Oxidised Rosin Varnishes	400
Phenolic Resin Varnishes	400
Urea-Formaldehyde Resin Varnishes	400
Hydrocarbon Base Varnishes	400

Chapter 19

The Manufacture of Paint Removers 402

Chapter 20

The layout of a Varnish Factory 404

The Processes of Varnish Manufacture	405
Reception and Storage of Raw Materials	405
Processes Involving Chemical Reactions	409
Physical Processes of Finished Products	409
Types of Product to be Made	415
Form and Arrangement of Plant Required	416
The Treatment of Drying Oils	416
Preparation of Monoglycerides	418
Preparation of Driers and Other Metallic Soaps	418
Preparation of Run Copal, Rosin and copal Esters	418
Preparation of Alkyds and Maleic Resins	420
Preparation of Phenolic-, Urea-, and Melamine-Formaldehyde Resins	420
Preparation of Copal Varnishes and Grinding Media	420
Preparation of Modified Natural Resin Varnishes	421
Preparation of Reactive Phenolic Resin Varnishes	421
Preparation of Bituminous Finishes	422
Cold and Hot Solutions	422
Preparation of Emulsions	422
Location of the Site	422
Welfare Arrangements	424

Fire Precautions	425
Efficient Exercise of Control	425
Miscellaneous Considerations	425
Office Buildings	425
Small-Scale Plant	425
Suggested General Layout arrangement	426

Chapter 21

Some Legal Aspects of Varnish Manufacture	427
The Factories Act, 1937	427
Chemical Works Regulations, 1922	429
The London Buildings Act	430
The Alkali Act, 1906	430
Rivers Pollution Act, 1876	430
Public Health Act, 1925	430
The Petroleum (Mixtures) Order, 1929, and Petroleum (Consolidation) Act, 1928	430
Spirit Act, 1880	430
Index	431
