Introduction	1
Elements in the testing of exterior finishes	4
Exterior durability and accelerated tests	14
The salt fog test on organic coatings	30
Coating adhesion is basic and molecular	42
Flexibility	69
Hardness	80
Cold check test-wood	91
Low temperature flexibility	101
Abrasion	111
Scrubbability and washability	128
Chip or impact resistance	137
Water resistance	149
Filiform corrosion	164
Mathematics of finishing	170
Tests on liquid coating	180
Dry film thickness	201
Fungus and mildew	221
Fire retardancy	236
Miscellaneous tests and conclusions	256
