

CONTENTS

	Page
Chapter 1 High Temperature coatings – The Background	1
1.1 Introduction	1
1.2 High Temperature Materials	2
1.3 High Temperature Systems	6
Chapter 2 High Temperature Coating Systems	11
2.1 General	11
2.2 Metallic Coating Systems	13
2.3 Ceramic Coating Systems	20
2.4 Composite Coating Systems	32
2.5 Amorphous Coatings	33
2.6 Coating Processes	35
2.7 List of Acronyms	44
Chapter 3 Physical Vapour Deposition (PVD)	49
3.1 Introduction	49
3.2 Evaporation Process	52
3.3 Sputtering Process	70
3.4 Ion Plating & Ion Implantation	86
Chapter 4 Chemical Vapour Deposition (CVD)	103
4.1 Introduction	103
4.2 The CVD Process	117
4.3 CVD Reactor	120
4.4 CVD Reactors : Line Diagrams	124
4.5 The Fundamentals of CVD & CVD Technology	137
4.6 CVD Reactions ; A Selection	146
4.7 CVD Products & Process Routes – A cross Section	149
4.8 Plasma Assisted CVD (PACVD); Plasma Enhanced CVD(PECVD)	161
4.9 Laser – CVD	172
Chapter 5 Coatings by Pack, Slurry, Sol-Gel, Hot-Dip, Electrochemical & Chemical Methods	173
5.1 Introduction	173
5.2 The Pack Coating	174
5.3 Slurry Coating Technique	198
5.4 The Sol-Gel Coating Technique	200
5.5 Hot Dip Coating Process	203
5.6 Electrochemical & Chemical Coating Methods	204
Chapter 6 Coatings by Laser Surface Treatment, Rapid Solidification Processing, Spraying, Welding, Cladding & Diffusion Methods	229
6.1 In this Chapter	229
6.2 Laser Coating Technology	230
6.3 Rapid Solidification Processing (RSP)	246
6.4 Droplet Transfer Coatings by Spraying	249
6.5 Coating by Plasma Spraying	252
6.6 Other Droplet transfer Coating Methods	269
6.7 Coating by Welding	275
6.8 Clad Surfacing	281
6.9 Diffusion Bonding	288

Chapter 7	Physical & Mechanical Properties of Coatings	297
7.1	Introduction	297
7.2	Evolution & Microstructure of Coatings	297
7.3	Thermal Expansion, Thermal Cycling	305
7.4	Thermal Conductivity, Thermal Barrier Coatings	309
7.5	Interdiffusion	313
7.6	Adhesion	316
7.7	Bonding	322
7.8	Internal Stresses, Strain & Fatigue Life	328
7.9	Strength	334
7.10	Ductility, Creep	340
7.11	Hardness vs Wear & Erosion resistance	345
Chapter 8	Chemical Properties of Coatings	371
8.1	Introduction	371
8.2	Coating/ Substrate/ Environment vs Degradation	372
8.3	Environmental Conditions for Coating Degradation	385
8.4	Chemical Degradation Mechanisms	401
8.5	Oxidation & High Temperature Corrosion	415
8.6	Hot Corrosion	418
8.7	Carburization / Oxidation Degradation	419
8.8	The Liquid Phase Effect	424
8.9	Fluxing Mechanisms in hot Corrosion	427
8.10	Hot Corrosion in S ₂ & SO ₂ Environments	435
8.11	Erosion – Corrosion	443
8.12	Degradation of Aluminide Coatings	454
8.13	Degradation of MCrAl Systems	461
8.14	Degradation of Silicide Coatings	475
8.15	Degradation of Thermal Barrier Coatings	481
8.16	Burner Rig Degradation Data	489
Chapter 9	Characterization, Repair & Functions of Coatings	499
9.1	General	499
9.2	Modeling & Simulation	501
9.3	Non- Destructive Testing (NDT) Methods	502
9.4	Adhesion	507
9.5	Tests on Mechanical properties	508
9.6	Structural Characterization	510
9.7	Spectroscopy	512
9.8	Degradation Characterization	520
9.9	Pack Coating Characterization	524
9.10	Coating Repair & Joining Techniques	524
9.11	Functions of High Temperature Coatings	531
Chapter 10	Strategic metal Conservation, Coatings Achievements & Future	547
10.1	Introduction	547
10.2	Coatings to Conserve Strategic Metals	547
10.3	Present Achievements & Future Requirements of coatings	554
10.4	High Temperature Coatings : Present & Future Applications	563
10.5	Coating Production Methods : Future Work	566
10.6	Coating Properties – Further Work	573
10.7	Testing Methods – Further Work	574
Bibliography		575
References		587
