

CONTENTS

	Page
Surfaces	1
Conduction and Diffusion Processes	22
The Basic Principles of Electrostatic Coating	28
Product Finishing with Electrostatically Sprayed Powder Coatings	43
The Electrostatic Deposition of Conducting and Semiconducting Powders	52
The Basic Principles of Electrophoretic Coating- A Study	60
The Basic Principles of Electrolytic Deposition	69
Thin Organic Coatings by Electrolysis of Phenol	85
The Basic Principles of Anodization	87
Applications of Electrodeposition and Anodizing	100
The Basic Principles of diffusion Coating	105
Diffusion Coating Metals in molten Fluorides	119
Surface Treatments and Possibilities for their Industrial Use	121
Spark-Hardening _ A technique for Producing Wear-Resistant Surfaces	129
Conversion and Conversion/Diffusion Coating	136
The Basic Principles of Chemical Vapour Deposition (CVD)	149
Deposition of Metal, Carbide and Oxide Films by Thermal Decomposition of Metal Acetylacetonates	159
Chemical Vapour Deposition from an Aerosol	169
The Basic Principles of Electroless Deposition	176
Application of Electroless and Electrolytic Metal Deposition in Semiconductor connection Technology	183
The Basic Principles of Wetting Processes	194
Use of Brush Applied Coatings in Black and White Television Tubes	209
The Basic Principles of Welding as a Surface Coating process	215
The Basic principles of Printing as a Surface Coating Process	222
The Basic Principles of Printing Processes	238
The Application of Screen Printing to the deposition of Metals and insulants	242
The Basic principles of Air and Airless Spraying	248
Use of Spray Applied Coatings in Colour Television Picture Tubes	257
The Basic Principles of Flame Spraying	262
Metal Sprayed, Polymer Impregnated Surface Coatings	270
The Basic principles of Detonation Coating	271
Applications of Detonation Coatings	280
Arc Plasma Spraying	287
Production of Thick Film Circuits by Plasma Spraying	300
The Basic principles of Electric-arc Spraying	308
The Basic Principles of Electrical harmonic Spraying	322
The Basic principles of Evaporation	340
Decoration by Vacuum Metallization of Plastics and Metals	350
Reactive Evaporation	361
The Basic Principles of Sputter Deposition	369
Applications of Sputtering - Past, Present and Future	386
The Basic Principles of Ion Plating	393
The Basic Principles of Ion Implantation	404
Mechanical Aspects of Solid Lubricant and Elastomeric Coatings	411
Examination of Surface Coatings by Microwave Radiometry	423
Periodic Structure of Ultra-thin Semiconductor Films	432
Glossary	435
Subject Index	447
