CONTENTS AND SUBJECT INDEX

INTRODUCTION

PART I. GENERAL PROCESSES

FLUIDIZED BED - SPRAY - POURING TECHNIQUES Fluidized Bed Basic Fluidized Bed Processes
Fluidized Bed Apparatus Self-Supporting Bed
Rotation of Article in Bed
Circulating Unit Auxiliary Agitation
Continuous Flow of Particles
Two Zone Bed with Inclined Grid
Coating and Oven Installation
Subambient Temperature Coating Air Masking Device
Holding Devices
Vacuum Activated Supporting Device
General Techniques Spray - Powder - Miscellaneous
Laminar Flow Powder Gun
Jet Pulverizer Unit
Application to External Surface Dust Cloud Generator
Spray Coating
Dispenser Unit
ELECTROSTATIC
Fluidized Bed Stationary Fluidized Bed
Electrode Design
Addition of Barium Titanate to Increase Efficiency
Polyvinyl Chloride Plasticized with Tricresyl Phosphate Spray Technique
Rotary Discharge Device
Multilayer Process
Heated Article Electrostatic Powder Fixing Device
PART II. COATING COMPOSITIONS
EPOXIES
Curing Agents and Hardeners
Curing Agents and Hardeners Rapid Curing Flexible System Using Stannous Octoate Polyol-Trimellitic Anhydride Adducts and Triphenyl Phosphine Fatty Guanamines
Curing Agents and Hardeners Rapid Curing Flexible System Using Stannous Octoate Polyol-Trimellitic Anhydride Adducts and Triphenyl Phosphine Fatty Guanamines Aminoaryl Phosphates
Curing Agents and Hardeners Rapid Curing Flexible System Using Stannous Octoate Polyol-Trimellitic Anhydride Adducts and Triphenyl Phosphine Fatty Guanamines
Curing Agents and Hardeners Rapid Curing Flexible System Using Stannous Octoate Polyol-Trimellitic Anhydride Adducts and Triphenyl Phosphine Fatty Guanamines Aminoaryl Phosphates Amine Curing Agents Extra-Coordinate Silicon Complex Modified Epoxies
Curing Agents and Hardeners Rapid Curing Flexible System Using Stannous Octoate Polyol-Trimellitic Anhydride Adducts and Triphenyl Phosphine Fatty Guanamines Aminoaryl Phosphates Amine Curing Agents Extra-Coordinate Silicon Complex Modified Epoxies Thermoplastic Resin Blends
Curing Agents and Hardeners Rapid Curing Flexible System Using Stannous Octoate Polyol-Trimellitic Anhydride Adducts and Triphenyl Phosphine Fatty Guanamines Aminoaryl Phosphates Amine Curing Agents Extra-Coordinate Silicon Complex Modified Epoxies Thermoplastic Resin Blends Chlorine-Containing Polyester for Flame Resistant Resin Phenolic Modified
Curing Agents and Hardeners Rapid Curing Flexible System Using Stannous Octoate Polyol-Trimellitic Anhydride Adducts and Triphenyl Phosphine Fatty Guanamines Aminoaryl Phosphates Amine Curing Agents Extra-Coordinate Silicon Complex Modified Epoxies Thermoplastic Resin Blends Chlorine-Containing Polyester for Flame Resistant Resin Phenolic Modified Polyvinyl Acetal and Polyacrylate Compositions
Curing Agents and Hardeners Rapid Curing Flexible System Using Stannous Octoate Polyol-Trimellitic Anhydride Adducts and Triphenyl Phosphine Fatty Guanamines Aminoaryl Phosphates Amine Curing Agents Extra-Coordinate Silicon Complex Modified Epoxies Thermoplastic Resin Blends Chlorine-Containing Polyester for Flame Resistant Resin Phenolic Modified
Curing Agents and Hardeners Rapid Curing Flexible System Using Stannous Octoate Polyol-Trimellitic Anhydride Adducts and Triphenyl Phosphine Fatty Guanamines Aminoaryl Phosphates Amine Curing Agents Extra-Coordinate Silicon Complex Modified Epoxies Thermoplastic Resin Blends Chlorine-Containing Polyester for Flame Resistant Resin Phenolic Modified Polyvinyl Acetal and Polyacrylate Compositions Polyvinyl Acetal, Silica and BF₃-Amine Complex
