

CONTENTS

	Page
Part I : Production	
1. Biosynthetic Mechanisms of Low Molecular Weight Surfactants and Their Precursor Molecules	3
2. Production of Biosurfactants	65
3. Prospects and Limits for the Production of Biosurfactants Using Immobilized Biocatalysts	99
4. Lipopeptide Production by <i>Bacillus licheniformis</i>	135
5. Integrated Process for Continuous Rhamnolipid Biosynthesis	157
6. Production, Properties, and Practical Applications of Fungal Polysaccharides	175
7. Bioconversion of Oil and Sugars to Glycolipids	205
Part II : Properties	
8. Genetics of Surface-Active Compounds	231
9. Biological Activities of Biosurfactants	251
10. The Biophysics of Microbial Surfactants: Growth on Insoluble Substrates	269
11. Surface Properties and Function of Alveolar and Airway Surfactant	287
12. Microbial Lipopolysaccharides	305
Part III : Applications	
13. Factors Influencing the Economics of Biosurfactants	329
14. Biosurfactants for Cosmetics	373
15. Biosurfactants from Marine Microorganisms	391
16. Biosurfactants in Food Applications	419
17. Biosurfactants for Environmental Control	447
Index	471
