CONTENTS

Introductory Lecture: Attractive Forces at Solid-Liquid Interfaces 3.1 Contact Angles and The Free Surface Energies of Solids 3.1 Contact Angles on Deformable Solids 5.7 Contact Angles on Deformable Solids 5.7 Contact Angles, their Significance and Measurement 9.99 SECOND SESSION Free Energy Changes in Wetting and displacement 123 Contact Angle Hysteresis – Porous Surfaces 144 Some Basic Considerations Concerning the Kinetics of Wetting Processes in Capillary Systems 164 The State of liquid Water near Solid Interfaces 174 A Method for the Measurement of Adhesion Tension of Liquids in contact with Powders 175 Estimation of the Wettability of Small Particles by Measurements of the Apparent 186 Boundary Tensions at Contaminated Interfaces 174 Estimation of the Wettability of Small Particles by Measurements of the Apparent 187 Boundary Tensions at Contaminated Interfaces 174 Estimation of Surfactants on VanDer Wall's Forces at a Solid-Liquid Interface 175 Energy Adsorption and Wetting and Non-Wetting 176 Surface-Active Agents at the 176 Solid – Liquid Interface 177 Energy Adsorption and Wetting of a Polymer Latex by Cationic Surfactants 177 Energy Adsorption and Wetting of a Polymer Latex by Cationic Surfactants 177 Energy Adsorption and Wetting of a Polymer Latex by Cationic Surfactants 177 Energy Adsorption of Surface of Parameters γ_c , γ_a and ϕ , That Govern Spreading on Adsorbed Films 178 Wetting Studies on Binary Polymer Systems 179 Energy Adsorption of Surface Parameters 178 ENERGIAN 179 Energy Adsorption of Surface Parameters 179 Energy Adsorption of Surface Parameters 179 Energy Adsorption of Surface Parameters 179 Energy Department 179 Energy Departmen		Page				
Contact Angles and The Free Surface Energies of Solids 57 Contact Angles on Deformable Solids 57 Contact Angles, their Significance and Measurement 99 SECOND SESSION Free Energy Changes in Wetting and displacement 123 Contact Angle Hysteresis – Porous Surfaces 144 Some Basic Considerations Concerning the Kinetics of Wetting Processes in Capillary Systems 164 The State of liquid Water near Solid Interfaces 174 A Method for the Measurement of Adhesion Tension of Liquids in contact with Powders 174 A Method for the Measurement of Adhesion Tension of Liquids in contact with Powders 175 Boundary Tensions at Contaminated Interfaces 123 The Effect of Surfactants on VanDer Wall's Forces at a Solid-Liquid Interface 123 The Dependence of Contact Angle on the Adsorption of Surface-Active Agents at the Solid – Liquid Interface 125 Chemisorption and Wetting and Non-Wetting 127 Adsorption and Wetting of a Polymer Latex by Cationic Surfactants 129 The Thickness of Wetting Films 127 Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil 138 Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil 138 Wetting Studies on Binary Polymer Systems 150 The Heat of Adsorption of Surface-Active Agents on Graphon 162 Heats of Immersion of α – and γ - Alumina 170 The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters 180 The Relationship Between the heat of Wetting Surfaces 141 Behaviour of Water on Surface at Extreme Limits of Contact Angles 143	FIRST SESSION					
Contact Angles on Deformable Solids 57 Contact Angles, their Significance and Measurement 99 SECOND SESSION Free Energy Changes in Wetting and displacement 123 Contact Angle Hysteresis – Porous Surfaces 144 Some Basic Considerations Concerning the Kinetics of Wetting Processes in Capillary Systems 164 The State of liquid Water near Solid Interfaces 174 A Method for the Measurement of Adhesion Tension of Liquids in contact with Powders 174 The Estate of Liquid Water near Solid Interfaces 174 A Method for the Wettability of Small Particles by Measurements of the Apparent 185 Boundary Tensions at Contaminated Interfaces 123 The Effect of Surfactants on VanDer Wall's Forces at a Solid-Liquid Interface 1234 THIRD SESSION The Dependence of Contact Angle on the Adsorption of Surface-Active Agents at the 185 Solid – Liquid Interface 125 Chemisorption and Wetting and Non-Wetting 127 Adsorption and Wetting of a Polymer Latex by Cationic Surfactants 129 The Thickness of Wetting Films 129 Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil 18 Physical Significance of Parameters γ_{c} , γ_{s} and Φ , That Govern Spreading on Adsorbed Films 182 Wetting Studies on Binary Polymer Systems 183 FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon 1863 Heats of Immersion of α – and γ – Alumina 1870 The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters 1880 The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons 189 Impact and Spreading of Spray Drops on Foliar Surfaces 1417 Behaviour of Water on Surface at Extreme Limits of Contact Angles 183	Introductory Lecture: Attractive Forces at Solid-Liquid Interfaces					
Contact Angles, their Significance and Measurement SECOND SESSION Free Energy Changes in Wetting and displacement 123 Contact Angle Hysteresis – Porous Surfaces 144 Some Basic Considerations Concerning the Kinetics of Wetting Processes in Capillary Systems 164 The State of liquid Water near Solid Interfaces 174 A Method for the Measurement of Adhesion Tension of Liquids in contact with Powders 200 The Estimation of the Wettability of Small Particles by Measurements of the Apparent Boundary Tensions at Contaminated Interfaces 213 The Effect of Surfactants on VanDer Wall's Forces at a Solid-Liquid Interface 234 THIRD SESSION The Dependence of Contact Angle on the Adsorption of Surface-Active Agents at the Solid – Liquid Interface 253 Chemisorption and Wetting and Non-Wetting 272 Adsorption and Wetting of a Polymer Latex by Cationic Surfactants 292 The Thickness of Wetting Films 300 Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil 318 Physical Significance of Parameters γ_c , γ_s and Φ , That Govern Spreading on Adsorbed Films 328 Wetting Studies on Binary Polymer Systems 351 FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon 363 Heats of Immersion of α – and γ - Alumina 370 The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters 380 Impact and Spreading of Spray Drops on Foliar Surfaces 433						
SECOND SESSION Free Energy Changes in Wetting and displacement Contact Angle Hysteresis – Porous Surfaces 123 Contact Angle Hysteresis – Porous Surfaces 144 Some Basic Considerations Concerning the Kinetics of Wetting Processes in Capillary Systems 164 The State of liquid Water near Solid Interfaces 174 A Method for the Measurement of Adhesion Tension of Liquids in contact with Powders The Estimation of the Wettability of Small Particles by Measurements of the Apparent Boundary Tensions at Contaminated Interfaces 175 The Effect of Surfactants on VanDer Wall's Forces at a Solid-Liquid Interface 276 THIRD SESSION The Dependence of Contact Angle on the Adsorption of Surface-Active Agents at the Solid – Liquid Interface 277 Adsorption and Wetting and Non-Wetting Adsorption and Wetting of a Polymer Latex by Cationic Surfactants 279 The Thickness of Wetting Films 300 Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil Physical Significance of Parameters γ_c , γ_s and Φ , That Govern Spreading on Adsorbed Films 328 Wetting Studies on Binary Polymer Systems 529 FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon 436 Heats of Immersion of α — and γ - Alumina The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons Impact and Spreading of Spray Drops on Foliar Surfaces 438 Heatsor of Water on Surface at Extreme Limits of Contact Angles						
Free Energy Changes in Wetting and displacement Contact Angle Hysteresis – Porous Surfaces 144 Some Basic Considerations Concerning the Kinetics of Wetting Processes in Capillary Systems 164 The State of liquid Water near Solid Interfaces A Method for the Measurement of Adhesion Tension of Liquids in contact with Powders The Estimation of the Wettability of Small Particles by Measurements of the Apparent Boundary Tensions at Contaminated Interfaces THIRD SESSION The Dependence of Contact Angle on the Adsorption of Surface-Active Agents at the Solid – Liquid Interface Chemisorption and Wetting and Non-Wetting Adsorption and Wetting of a Polymer Latex by Cationic Surfactants The Thickness of Wetting Films Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil Physical Significance of Parameters γ_{c_i} γ_s and Φ , That Govern Spreading on Adsorbed Films Wetting Studies on Binary Polymer Systems FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon Heats of Immersion of α – and γ - Alumina The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons Impact and Spreading of Spray Drops on Foliar Surfaces 413	Contact Angles, their Significance and Measurement	99				
Contact Angle Hysteresis – Porous Surfaces Some Basic Considerations Concerning the Kinetics of Wetting Processes in Capillary Systems The State of liquid Water near Solid Interfaces A Method for the Measurement of Adhesion Tension of Liquids in contact with Powders The Estimation of the Wettability of Small Particles by Measurements of the Apparent Boundary Tensions at Contaminated Interfaces The Effect of Surfactants on VanDer Wall's Forces at a Solid-Liquid Interface 234 THIRD SESSION The Dependence of Contact Angle on the Adsorption of Surface-Active Agents at the Solid – Liquid Interface Solid – Liquid Interface Chemisorption and Wetting and Non-Wetting Adsorption and Wetting of a Polymer Latex by Cationic Surfactants The Thickness of Wetting Films Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil Physical Significance of Parameters $\gamma_{c, \gamma_{s}}$ and Φ , That Govern Spreading on Adsorbed Films Wetting Studies on Binary Polymer Systems FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon 363 Heats of Immersion of α – and γ - Alumina The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons Impact and Spreading of Spray Drops on Foliar Surfaces 433	SECOND SESSION					
Some Basic Considerations Concerning the Kinetics of Wetting Processes in Capillary Systems The State of liquid Water near Solid Interfaces A Method for the Measurement of Adhesion Tension of Liquids in contact with Powders The Estimation of the Wettability of Small Particles by Measurements of the Apparent Boundary Tensions at Contaminated Interfaces THIRD SESSION The Dependence of Contact Angle on the Adsorption of Surface-Active Agents at the Solid – Liquid Interface Chemisorption and Wetting and Non-Wetting Adsorption and Wetting of a Polymer Latex by Cationic Surfactants The Thickness of Wetting Films Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil Physical Significance of Parameters γ_c , γ_s and Φ , That Govern Spreading on Adsorbed Films Wetting Studies on Binary Polymer Systems FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon Heats of Immersion of α – and γ - Alumina FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon Heats of Immersion of α – and γ - Alumina The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons Impact and Spreading of Spray Drops on Foliar Surfaces 433		123				
The State of liquid Water near Solid Interfaces 174 A Method for the Measurement of Adhesion Tension of Liquids in contact with Powders 200 The Estimation of the Wettability of Small Particles by Measurements of the Apparent Boundary Tensions at Contaminated Interfaces 213 The Effect of Surfactants on VanDer Wall's Forces at a Solid-Liquid Interface 234 THIRD SESSION The Dependence of Contact Angle on the Adsorption of Surface-Active Agents at the Solid – Liquid Interface 253 Chemisorption and Wetting and Non-Wetting 272 Adsorption and Wetting of a Polymer Latex by Cationic Surfactants 292 The Thickness of Wetting Films 300 Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil Physical Significance of Parameters γ_{c} , γ_{s} and Φ , That Govern Spreading on Adsorbed Films 328 Wetting Studies on Binary Polymer Systems 351 FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon 363 Heats of Immersion of α – and γ – Alumina 370 The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters 380 The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons 194 Impact and Spreading of Spray Drops on Foliar Surfaces 417 Behaviour of Water on Surface at Extreme Limits of Contact Angles 433						
A Method for the Measurement of Adhesion Tension of Liquids in contact with Powders The Estimation of the Wettability of Small Particles by Measurements of the Apparent Boundary Tensions at Contaminated Interfaces 213 The Effect of Surfactants on VanDer Wall's Forces at a Solid-Liquid Interface 234 THIRD SESSION The Dependence of Contact Angle on the Adsorption of Surface-Active Agents at the Solid –Liquid Interface 253 Chemisorption and Wetting and Non-Wetting 272 Adsorption and Wetting of a Polymer Latex by Cationic Surfactants 292 The Thickness of Wetting Films 300 Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil 318 Physical Significance of Parameters γ_c , γ_s and Φ , That Govern Spreading on Adsorbed Films Wetting Studies on Binary Polymer Systems 351 FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon 433 Heats of Immersion of α – and γ - Alumina 370 The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters 380 The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons Impact and Spreading of Spray Drops on Foliar Surfaces 417 Behaviour of Water on Surface at Extreme Limits of Contact Angles						
The Estimation of the Wettability of Small Particles by Measurements of the Apparent Boundary Tensions at Contaminated Interfaces 213 The Effect of Surfactants on VanDer Wall's Forces at a Solid-Liquid Interface 234						
Boundary Tensions at Contaminated Interfaces 213 The Effect of Surfactants on VanDer Wall's Forces at a Solid-Liquid Interface 234 THIRD SESSION The Dependence of Contact Angle on the Adsorption of Surface-Active Agents at the Solid – Liquid Interface 253 Chemisorption and Wetting and Non-Wetting 272 Adsorption and Wetting of a Polymer Latex by Cationic Surfactants 292 The Thickness of Wetting Films 300 Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil 318 Physical Significance of Parameters γ_{c} , γ_{s} and Φ , That Govern Spreading on Adsorbed Films 328 Wetting Studies on Binary Polymer Systems 351 FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon 363 Heats of Immersion of α – and γ - Alumina 370 The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters 380 The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons 394 Impact and Spreading of Spray Drops on Foliar Surfaces 417 Behaviour of Water on Surface at Extreme Limits of Contact Angles 433	ı	200				
THIRD SESSION The Dependence of Contact Angle on the Adsorption of Surface-Active Agents at the Solid –Liquid Interface Chemisorption and Wetting and Non-Wetting Adsorption and Wetting of a Polymer Latex by Cationic Surfactants Thickness of Wetting Films Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil Physical Significance of Parameters γ_c , γ_s and Φ , That Govern Spreading on Adsorbed Films Wetting Studies on Binary Polymer Systems FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon Heats of Immersion of α – and γ - Alumina The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons Impact and Spreading of Spray Drops on Foliar Surfaces 417 Behaviour of Water on Surface at Extreme Limits of Contact Angles		213				
THIRD SESSION The Dependence of Contact Angle on the Adsorption of Surface-Active Agents at the Solid –Liquid Interface 253 Chemisorption and Wetting and Non-Wetting 272 Adsorption and Wetting of a Polymer Latex by Cationic Surfactants 292 The Thickness of Wetting Films 300 Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil 318 Physical Significance of Parameters γ_c , γ_s and Φ , That Govern Spreading on Adsorbed Films 328 Wetting Studies on Binary Polymer Systems 351 FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon 363 Heats of Immersion of α – and γ - Alumina 370 The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters 380 The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons Impact and Spreading of Spray Drops on Foliar Surfaces 417 Behaviour of Water on Surface at Extreme Limits of Contact Angles 433						
The Dependence of Contact Angle on the Adsorption of Surface-Active Agents at the Solid –Liquid Interface 253 Chemisorption and Wetting and Non-Wetting 272 Adsorption and Wetting of a Polymer Latex by Cationic Surfactants 292 The Thickness of Wetting Films 300 Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil 318 Physical Significance of Parameters γ_c , γ_s and Φ , That Govern Spreading on Adsorbed Films 328 Wetting Studies on Binary Polymer Systems 351 FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon 363 Heats of Immersion of α – and γ - Alumina 370 The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters 380 The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons 394 Impact and Spreading of Spray Drops on Foliar Surfaces 417 Behaviour of Water on Surface at Extreme Limits of Contact Angles 433	The Effect of Surfaciants on Yumber Wan & Foress at a Sona Enquira interface	23 .				
Solid – Liquid Interface 253 Chemisorption and Wetting and Non-Wetting 272 Adsorption and Wetting of a Polymer Latex by Cationic Surfactants 292 The Thickness of Wetting Films 300 Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil 318 Physical Significance of Parameters γ_c , γ_s and Φ , That Govern Spreading on Adsorbed Films 328 Wetting Studies on Binary Polymer Systems 351 FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon 363 Heats of Immersion of α – and γ - Alumina 370 The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters 380 The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons 394 Impact and Spreading of Spray Drops on Foliar Surfaces 417 Behaviour of Water on Surface at Extreme Limits of Contact Angles 433						
Chemisorption and Wetting and Non-Wetting Adsorption and Wetting of a Polymer Latex by Cationic Surfactants The Thickness of Wetting Films Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil Physical Significance of Parameters γ_{c} , γ_{s} and Φ , That Govern Spreading on Adsorbed Films Wetting Studies on Binary Polymer Systems FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon Heats of Immersion of α – and γ - Alumina The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons Impact and Spreading of Spray Drops on Foliar Surfaces Hehaviour of Water on Surface at Extreme Limits of Contact Angles						
Adsorption and Wetting of a Polymer Latex by Cationic Surfactants The Thickness of Wetting Films Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil Physical Significance of Parameters γ_c , γ_s and Φ , That Govern Spreading on Adsorbed Films Wetting Studies on Binary Polymer Systems FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon Heats of Immersion of α – and γ - Alumina The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons Impact and Spreading of Spray Drops on Foliar Surfaces Behaviour of Water on Surface at Extreme Limits of Contact Angles						
The Thickness of Wetting Films Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil Physical Significance of Parameters γ_c , γ_s and Φ , That Govern Spreading on Adsorbed Films Wetting Studies on Binary Polymer Systems FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon Heats of Immersion of α – and γ - Alumina The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons Impact and Spreading of Spray Drops on Foliar Surfaces Behaviour of Water on Surface at Extreme Limits of Contact Angles						
Wetting of Polymers: Contact Angles of Aqueous Surfactant Solutions on Polar Polymers in Oil Physical Significance of Parameters γ_c , γ_s and Φ , That Govern Spreading on Adsorbed Films Wetting Studies on Binary Polymer Systems Solution Studies on Binary Polymer Systems FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon Heats of Immersion of α – and γ - Alumina The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons Impact and Spreading of Spray Drops on Foliar Surfaces Hehaviour of Water on Surface at Extreme Limits of Contact Angles						
Physical Significance of Parameters γ_c , γ_s and Φ , That Govern Spreading on Adsorbed Films Wetting Studies on Binary Polymer Systems 328 FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon Heats of Immersion of α – and γ - Alumina The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons Impact and Spreading of Spray Drops on Foliar Surfaces Hehaviour of Water on Surface at Extreme Limits of Contact Angles						
Wetting Studies on Binary Polymer Systems 351 FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon 363 Heats of Immersion of α – and γ - Alumina 370 The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters 380 The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons 180 Impact and Spreading of Spray Drops on Foliar Surfaces 417 Behaviour of Water on Surface at Extreme Limits of Contact Angles 433						
FOURTH SESSION The Heat of Adsorption of Surface-Active Agents on Graphon Heats of Immersion of α – and γ - Alumina The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons Impact and Spreading of Spray Drops on Foliar Surfaces Hehaviour of Water on Surface at Extreme Limits of Contact Angles 433						
The Heat of Adsorption of Surface-Active Agents on Graphon 363 Heats of Immersion of α – and γ - Alumina 370 The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters 380 The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons 394 Impact and Spreading of Spray Drops on Foliar Surfaces 417 Behaviour of Water on Surface at Extreme Limits of Contact Angles 433						
Heats of Immersion of α – and γ - Alumina 370 The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters 380 The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons 394 Impact and Spreading of Spray Drops on Foliar Surfaces 417 Behaviour of Water on Surface at Extreme Limits of Contact Angles 433						
The Dependence of Heats of Immersion of Inorganic Oxides on the Surface Parameters The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons Impact and Spreading of Spray Drops on Foliar Surfaces Behaviour of Water on Surface at Extreme Limits of Contact Angles 380 394 417						
The Relationship Between the heat of Wetting and the adsorption Isotherm for Porous Carbons Impact and Spreading of Spray Drops on Foliar Surfaces 417 Behaviour of Water on Surface at Extreme Limits of Contact Angles 438						
Impact and Spreading of Spray Drops on Foliar Surfaces 417 Behaviour of Water on Surface at Extreme Limits of Contact Angles 433						
Behaviour of Water on Surface at Extreme Limits of Contact Angles 433						
	Closing Discussion	443
