

CONTENTS

	Page
1. Background and Perspective	1
I Detergent Revolution – Environmental Reaction	1
II Biodegradation for Waste Surfactant Control	6
III Biodegradation Test Methods and Their Limitations	12
2. Surfactants – Their Nature, Behavior, and Structure	19
I Hydrophilic Hydrophobes – Their Physical Properties	19
II Hydrophobic Groups and Their Sources	22
III Hydrophilic Groups	32
IV Surfactants	32
3. The Analytical Methods	39
I Limitations and Precautions	39
II Surfactancy Methods	42
III Specific Chemical Methods	47
IV Physicochemical Methods	59
V Metabolic and Other Nonspecific Methods	65
4. The Biological Background	77
I The Microorganisms	77
II Bacterial Development, Decline, and End Products; of, How Ultimate Is Ultimate Biodegradation?	80
III Acclimation and Deacclimation	84
IV Surfactant-Bacteria Interactions	96
V Surfactant Adsorption by Bacterial matter	110
5. Biodegradation Test Methods	123
I Basic Principles	123
II References Standards and Normalization	128
III Feeds and Media	131
IV BOD and Respirometric Tests	140
V Die-Aways	145
VI Trickle Filters	156
VII Activated Sludge	161
VIII The Soil – Drainage Fields and Lysimeters	186
IX Anaerobic Systems	188
X Megatests and Field Tests	192
XI Biodegradation Potential – Comparison of Methods	197
XII Nonbiological Methods	201
6. Chemical Structure and Primary Biodegradation	203
I Molecular Structure, Chain branching, and Chain Length	203
II Alkylbenzenesulfonates	207
III Other Alkylaryl Sulfonates	230
IV Sulfonates from Aliphatic Hydrocarbons	233
V Sulfosuccinic Acid Esters	235
VI Fatty Acylamide Sulfonates	236
VII Alkyl Sulfates	236
VIII Ethoxylate Sulfates	238
IX Ethoxylate Nonionics	243
X Miscellaneous Surfactants and Soaps	254
7. Metabolic Pathways and Ultimate Biodegradation	257
I Biochemical Oxidation	257
II Biodegradation of Lower Sulfonates	268
III The Biodegradation Process in LAS	274
IV Quaternary Alkylbenzenesulfonates (QBS)	294

	V	Ultimate Biodegradation of TBS	299
	VI	Sulfonated Esters and Amides	301
	VII	Alkyl Sulfates and Ethoxylate Sulfates	302
	VIII	Ethoxylate nonionics	310
8.		Biodegradation DATA	327
	I	Organization and Scope of Tables	327
	II	Substrate – Chemical Nature : Column 1	327
	III	Extent of Biodegradation : Column 2	330
	IV	Conditions – Test Methods : Column 3	331
	V	Biodegradation Time: Column 4	332
	VI	Analytical Methods: Column 5	332
	VII	Biodegradation Tables	334
