

CONTENTS

	Page
1. Introduction	1
1.1 Why analyse surfactants?	1
1.2 Sampling	3
1.3 Features peculiar to surfactant analysis	8
1.4 Calculations	9
1.5 Accuracy and precision	12
1.6 analysis of Competitors' products	13
1.7 National and International standards	15
References	16
2. Surfactant types; classification, identification, separation	17
2.1 Definitions	17
2.2 Common types of surfactants of all four classes	18
2.3 Classification of surfactants using indicators	24
2.4 Classification by acid and alkaline hydrolysis	26
2.5 Elemental analysis	31
2.6 Spectroscopic identification	36
2.7 Separation/extraction techniques	37
References	40
3. Basic Techniques	42
3.1 Introduction	42
3.2 Extraction of surfactants	42
3.3 Acid-base titration	48
3.4 Potentiometric titration	52
3.5 Methods for esters, amines, alcohols and unsaturated fatty materials	53
3.6 Two-phase titration of ionic surfactants with surfactants of opposite charge	59
3.7 Potentiometric titration with surfactants of opposite charge using a surfactant Sensitive electrode	65
3.8 Direct potentiometry : calculation of results	70
3.9 Open-column chromatography	73
References	75
4. Ion exchange	77
4.1 Introduction	77
4.2 What is ion exchange?	77
4.3 Ion-exchange media	78
4.4 Properties of ion-exchange resins	79
4.5 Guidelines on using ion-exchange resins	85
4.6 Practical applications	94
4.7 Analysis of column effluents	101
References	104
5. Analysis of anionics	105
5.1 Introduction	105
5.2 General methods	106
5.3 Alkyl, alkylether and alkylphenylether sulphates	110
5.4 Monoalkanolamide and ethoxylated monoalkanolamide sulphates	113
5.5 Mono- and diglyceride sulphates	114
5.6 Alkylbenzene sulphonates	116
5.7 Alkane sulphonates	119

5.8	Alpha-olefin sulphonates	124
5.9	Oil-soluble sulphonates	129
5.10	Acylisethionates	129
5.11	Fatty ester α -sulphonates	130
5.12	Mono- and dialkylsulphosuccinates	136
5.13	Sulphonated amides	139
5.14	Carboxylates	142
5.15	Alkyl and alkyether phosphates	143
	References	147
6.	Analysis of Nonionics	149
6.1	Introduction	149
6.2	Ethoxylated alcohols, alkyphenols and fatty acids	149
6.3	Block copolymers of ethylene and propylene oxide	161
6.4	Esters of polyhydroxy compounds and ethoxylated derivatives	162
6.5	Alkylpolyglycosides	164
6.6	Alkanolamides and ethoxylated alkanolamides	164
	References	169
7.	Analysis of cationics and amphoterics	171
7.1	Introduction	171
7.2	Quaternary ammonium salts	171
7.3	Carboxybetaines	177
7.4	Amphoterics with weakly basic nitrogen	179
7.5	Sulphobetaines	180
7.6	Amines	182
7.7	Fatty diamines : determination	185
7.8	Ethoxylated amines and diamines	186
7.9	Amine oxides	189
	References	190
8.	Analysis of Mixtures without separation	192
8.1	Introduction	192
8.2	Mixtures of anionics	193
8.3	Mixtures of nonionics	197
8.4	Mixtures of cationics and amphoterics	198
8.5	Mixtures of anionics and cationics	202
8.6	Mixtures with more than one component in each class	205
	References	206
9.	Chromatographic analysis of surfactants	207
9.1	Introduction	207
9.2	Gas chromatography	209
9.3	high performance liquid chromatography	214
9.4	Thin layer chromatography	227
9.5	Other techniques	229
9.6	Summary	232
9.7	References	232
10.	Infrared spectroscopy	234
10.1	What infrared spectroscopy offers the analyst	234
10.2	Theory	235
10.3	The infrared spectrometer	237
10.4	Sample presentation	248
10.5	Data manipulations	256
10.6	Examples and applications	264
10.7	Multicomponent analysis	289
10.8	Buying a spectrometer	293
10.9	Further information	295
	References	296
11.	Nuclear magnetic resonance (NMR) spectroscopy	297

11.1	Introduction	297
11.2	Theory of NMR	298
11.3	The NMR spectrometer	299
11.4	The NMR sample	301
11.5	The NMR spectrum	303
11.6	Applications of NMR to surfactant analysis	310
	References	317
12.	Mass spectrometry	318
12.1	Introduction	318
12.2	Sample introduction	319
12.3	Methods of ionisation	320
12.4	Mass analysis	325
12.5	Detection, sensitivity and data processing	328
12.6	applications	328
	References	341
	Appendix I List of ISO Standards relating to surfactant analysis	342
	Appendix II List of relevant ASTM Methods	344
	Index	346
