

CONTENTS

	Page
Physico-Chemical Characterization of Microemulsions : Preparation of Monodisperse Colloidal Metal Boride Particles	1
Structure and Dynamics of a Concentrated microemulsion System	45
Thermal Fluctuations and the Structure of Microemulsions	61
Thermodynamic Analysis of the Breakdown of W/O –Microemulsion Aggregates Due to Changes In the Composition of the Solvent	89
Microemulsions Containing Brine, SDS, Pentanol or Heptanol, and Dedecane or Hexane : Structural Information Derived From Electrochemical and Fluorescent Probe Studies	103
A Viscosity Model of Winsor Microemulsions	123
Geometrical Features of Single-Phase Microemulsions	139
Interphasal Hydration Processes in Water-in-Oil Microemulsions	147
Experimental Evidence of a Nonuniform Microemulsion in the Low Surfactant Concentration Range	159
Kerr Effect in ternary Microemulsions	171
Solubilization in Nonionic Microemulsions	181
Electrical Conductivity in Oil Continuous Microemulsions	191
Microemulsions and the Treatment of Oil Spills	203
Acid-Base Indicator Equilibria in Nonionic Reversed micelles and Water-in-Oil Microemulsions	313
Influence of Electrolytes on the Stability of Polymerized Microemulsions	223
Polymerization of Styrene in an Inverse Microemulsion	243
Formation of Water-in-Oil Microemulsions and Their Applications for CaCO ₃ Particle Preparation	253
Microparticles by Microemulsion	263
Part VII General Papers	
The Use of Surfactants in Electrochemistry	267
Surfactants and Microcapsule Formation	287
Surfactant Induced Weakening of Geologic Materials	297
Thin Films of Non-Ionic Poloxamer Surfactants: Thinning and Polymer isation of Poloxamer 407	321
Surfactant-Mediated Transport Through liquid Hydrocarbon membranes	333

Role of Surfactants in the Deposition of Cationic Polymers on the Surface of Human Hair	341
Abatement of Acid Mine Drainage by Surfactant Application	353
Foam Stability as Affected by the Presence of Small Spreading Particles	361
Measurement of Foaming Properties of Surfactants and Surfactant Products	381
Effect of n-Octanol on the Emulsification of Paraffin Oil in Aqueous Sodium Dodecyl Sulfate Solutions	401
Thermogravimetric, X-Ray and Infrared Studies on Calcium Soaps in Solid State	411
An ESR and Zeta Potential Study of the Surface of a Carboxylated Latex	417
Surfactant Retention in Porous Media in Foam Flooding Processes for Enhanced Oil Recovery	427
The Transport of Underlying Water by Aliphatic Alcohols in Unsaturated Quartz Sand	441
Effect of liquid Surfactant on the Electrolytically Controlled Etching of Micropore Polymer Filters	453
Role of pH and Collector Concentration in Separation of Phosphates From Dolomitic Gangue Using DDA-HCl	457
Surface Activity of Carboxylic Acids and Mercury Floatability	467
Bubble Size Distribution and Mercury Floatability in Solutions of Carboxylic Acids	479
Electrokinetic Characteristics of CrO_2 and Cr_2P_3 in Aqueous Solutions	487
Advant Effect of Surfactants on Herbicidal Formulations	495
About the Contributors	509
Index	521
