	Page
Part III : Thermodynamic and Kinetic Aspects of Micellization	
Micellization as a Nucleation Phenomenon with Variable Surface Tension and Cut – off at Zero Surface Tension	709
Computation of the Micelle-Size-Distribution from Experimental Measurements	731
Thermodynamics of Micelle Formation in Aqueous Media = “Second Virial Coefficient”	745
Thermodynamics of Micellization and Solubilization of Pentanol in the System Water + Sodium N – Octanoate + N- Pentanol at 25 °C – Part 2. Solubilization of Pentanol	755
Dissolution and Micellization of long-chain Alkylsulfonic Acids and Their Sodium Salts in Water	771
The Effect of Cosolvents on the Formation of Micelles of Cetyltrimethylammonium Bromide in Aqueous Solutions	789
The Sphere to Rod Transition of CPX and CTAX Micelles in High Ionic Strength Aqueous Solutions: The Specificity of Counterions	805
Salt - Induced Sphere – Rod Transition of Ionic Micelles	825
Quasielastic light Scattering Studies of the Micelle to Vesicle Transition in Aqueous Solutions Of Bile Salt and Lecithin	841
The Applicability of Micellar Models to the Activity Coefficients of Sodium Carboxylates In Aqueous Solution	857
Kinetic Applications of Bile Salt Amphiphiles	875
Electrostatics of Micellar Systems	897
Part IV Solubilization	
Solubilization Equilibria Studied by the FT-PGSE-NMR Multicomponent Self - Diffusion Technique	917
Selective Solubilization in Aqueous Surfactant Solutions	923
Thermodynamics and Mechanisms of Solubilization of Alcohols in Aqueous Ionic Surfactant Systems	949
Solubilization of Phenothiazine and its N – Alkyl Derivatives into Anionic Surfactant Micelles	963
Cholesterol Solubilization and Supersaturation in Bile: Dependence on Total Lipid Concentration And Formation of Metastable Dispersions	981
Further Investigations on the Micellar Solubilization of Biopolymers in Apolar Solvents	999

Part V Micellar Catalysis and Reactions in Micelles

Micellar Effects on Reaction Rates and Equilibria	1015
Reversed Micellar Enzymology	1069
Comparison of Rate Enhancements in Micellar and nonmicellar Aggregates	1093
On the Validity of the Pseudo-Phase Model for Micellar Catalysis	1107
Analysis of the Effect of Micelles and Vesicles on the Reactivity of Nucleophiles Derived from The Dissociation of Weak Acids	1121
Micelle – Mediated Luminescence and Chromatography	1139
Micellar Effects on Kinetics and Equilibria of Electron Transfer Reactions	1159
Catalysis of Ester Hydrolysis by Functionalized Counterion Surfactants	1169
Specific Micellar Effects in the Temporal Behaviour of Excited Benzophenone: Consequences Upon the Polymerization Kinetics	1177
Quantitative Treatment for salt Effects and Equilibria Shifts in Micellar Solutions	1191
The Nickel (II) – PADA Reaction as a Solubilization Probe in Anionic Micellar Solutions	1207
The Application of Surfactants in Spectrophotometric Determination of Metal Ions: The Interaction Between Cationic Surfactants and Some Organic Dyes	1217

Part VI Adsorption and Binding of Surfactants

Study of the Hydrophobic and the Electrostatic Interactions in Microphases Concentrated in Surfactant Via Adsorption at Charged Interfaces	1233
Thermodynamics of Binding Cationic and Anionic Surfactants to Binary and Ternary Mixtures of Proteins	1249
An Internal Reflection Infrared Spectroscopic Study of AOT Adsorption onto Solid Surfaces	1271
Relation Between Adsorption on a Metal Surface and Monolayer Formation at the Air/Water Interface from Amphiphilic Solutions	1291
Quantitative Ellipsometry of Protein Adsorption at Solid-Liquid Interfaces	1301
Association of Surfactants in Dilute Aqueous Solutions: Effect on Their surface Properties	1313
Polydisperse Non-Ionic Surfactants: Their Solution Chemistry and Effect on the Wettability of Solid Surfaces	1329
Conditions of Phase Separation, Both at the Interface and in Solution the Adsorption Isotherm And the Consequence of Critical Phenomena on the Behaviour of the System	1339
Carotenoid Films at the Air/Water Interface	1349
Comparison of Interfacial Active Properties of Glycolipids from Microorganisms	1365
Study of the Interaction Between Surfactants and Polyacrylamide of Various Hydrolysis Degree	1377
Studies on the Interaction of Sodium Saccharin with Alkyltrimethylammonium Bromides	1391

Thermodynamic Studies on the Interaction Between Lysozyme and Sodium n – Decyl Sulphat In Aqueous Solutions	1403
About the Contributors	1417
